1Z0-1061-24 Latest Questions & 1Z0-1061-24 Valid Test Voucher

It is known to us that our 1Z0-1061-24 study materials have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the 1Z0-1061-24 Study Materials. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their exam and get the related certification.

Oracle CX Sales 2024 Implementation Professional Sample Questions (Q339-Q344):

NEW QUESTION # 339
What is the purpose of a role in Oracle Profitability and Cost Management Cloud Service?

- A. To grant users access to a specific data source
- B. To grant users access to a specific job or task
- C. To grant users access to a specific application
- D. To grant users access to a specific dimension or member

Answer: D

Explanation:
Option 1: Roles are used to grant users access to specific dimensions or members within an application. Option 2: This answer is incorrect because roles do not grant access to a specific data source. Option 3: This answer is incorrect because roles do not grant access to a specific job or task. Option 4: This answer is correct because roles are used to grant users access to specific dimensions or members within an application.

NEW QUESTION # 340
When creating applications and dimensions in Oracle Profitability and Cost Management Cloud Service 2023, what are some best practices to follow? Choose the best answer.

- A. Define applications and dimensions based on your reporting and analysis requirements
- B. Define fewer applications and dimensions to simplify the hierarchy structure.
- C. Use a large number of dimensions to capture all possible attributes of your business data.
- D. Avoid using parent-child relationships in hierarchies to minimize complexity.

Answer: A

Explanation:
Option 1: Incorrect. Defining fewer applications and dimensions may lead to a lack of granularity and make it difficult to capture specific business attributes. Option 2: Incorrect. Using a large number of dimensions can result in increased complexity and potentially impact performance. It is important to strike a balance between capturing necessary information and keeping the system manageable. Option 3: Incorrect. Parent-child relationships in hierarchies are common and often required to represent the structure of business data accurately. Option 4: Correct. It is best practice to define applications and dimensions based on your reporting and analysis requirements, ensuring that you can capture the necessary attributes and structure your data appropriately.

NEW QUESTION # 341
What is the recommended frequency for running allocations in Oracle Profitability and Cost Management Cloud Service?

- A. Monthly
- B. Annually
- C. Weekly
- D. Daily

Answer: C

Explanation:
Option 1: Incorrect. Running allocations on a daily basis may lead to excessive processing and slow performance. Option 2: Correct. The recommended frequency for running allocations in Oracle Profitability and Cost Management Cloud Service is on a weekly basis. This allows for regular updates to the allocations without overwhelming the system with excessive processing. Option 3: Incorrect. Running allocations on a monthly basis may result in delays in reporting and analysis due to the infrequent updates. Option 4: Incorrect. Running allocations on an annual basis may result in outdated data and limited ability to perform timely analysis.

NEW QUESTION # 342
Which of the following options allows users to drill down from summary data to transaction level detail?

- A. Oracle Fusion Subledger Accounting
- B. Oracle Profitability and Cost Management Cloud Service
- C. Oracle Fusion General Ledger
- D. Smart View

Answer: D

Explanation:
Option 1: Correct. Oracle Fusion General Ledger allows users to drill down from summary data to transaction level detail through its drill-down functionality. Option 2: Incorrect. Smart View is a Microsoft Excel plug-in that provides ad hoc query and analysis capabilities, but it does not have the specific functionality to drill down from summary data to transaction level detail. Option 3: Incorrect. Oracle Fusion Subledger Accounting is responsible for generating accounting entries and does not provide drill-down functionality. Option 4: Incorrect. Oracle Profitability and Cost Management Cloud Service focuses on cost calculations and allocation, and does not have the drill-down functionality required for this question.

NEW QUESTION # 343
Which of the following authentication types is NOT supported by Oracle Profitability and Cost Management Cloud Service for integrating with other applications?

- A. OAuth 2.0
- B. Kerberos
- C. SAML 2.0
- D. NTLM

Answer: D

Explanation:
Option 1: SAML 0 is a supported authentication type for integrating with other applications in Oracle Profitability and Cost Management Cloud Service. Option 2: OAuth 0 is a supported authentication type for integrating with other applications in Oracle Profitability and Cost Management Cloud Service. Option 3: Kerberos is a supported authentication type for integrating with other applications in Oracle Profitability and Cost Management Cloud Service. Option 4: NTLM is NOT a supported authentication type for integrating with other applications in Oracle Profitability and Cost Management Cloud Service. Therefore, option 4 is the correct answer.

NEW QUESTION # 344
.....
