## Oracle Realistic Oracle Cloud Database Services 2025 Professional Pass Guide

Appian ACD100Appian Certified Associate Developer2

and efficiency when preparing for [ACD100 Exams](#), thus inspiring them obtain the targeted ACD100 certificate successfully. There are many advantages of our ACD100 question torrent that we are happy to introduce you and you can pass the exam for sure.

### Appian Certified Associate Developer Sample Questions (Q16-Q21):

**NEW QUESTION # 16**  
You want to retrieve data from the database to show on your form.  
Which option should you use?

- A. `a!queryColumn()`
- B. `a!querySelection()`
- C. `a!query()`
- D. `a!queryEntity()`

**Answer: D**

**NEW QUESTION # 17**  
When designing a new interface, you have to create a table populated with record data. The table needs to link to the relevant record.  
With component should you use?

- A. Editable Grid
- B. Rich Text Display
- C. Text Layout
- D. Read-Only Grid

**Answer: D**

**NEW QUESTION # 18**  
A form has 5 rule inputs, as follows:  
1 CDT variable  
3 Text variables  
1 Integer variable  
According to best practices, how many process variables are required in the process model's user input task?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

**NEW QUESTION # 19**

Valid ACD100 Sample Questions Answers:  
Appian Certified Associate Developer

Work hard and practice with our Oracle 1z0-1093-25 dumps till you are confident to pass the Oracle 1z0-1093-25 exam. And that too with flying colors and achieving the Oracle 1z0-1093-25 Certification on the first attempt. You will identify both your strengths and shortcomings when you utilize Oracle Cloud Database Services 2025 Professional practice exam software.

Oracle 1z0-1093-25 Practice tests are formatted like real tests. The Actual4Exams platform provides an exceptional level of support for individuals preparing for and taking the Oracle 1z0-1093-25 exam. Their dedicated support team is available to assist candidates with any issues or concerns related to Oracle 1z0-1093-25 Test Preparation. Additionally, the platform offers a money-back guarantee for those who do not pass the 1z0-1093-25 test on their first attempt.

## 1z0-1093-25 Pass Guide, Exam 1z0-1093-25 Vce Format

Our company constantly increases the capital investment on the research and innovation of our 1z0-1093-25 training materials and expands the influences of our 1z0-1093-25 study materials in the domestic and international market. Because the high quality and passing rate of our 1z0-1093-25 Practice Questions more than 98 percent that clients choose to buy our study materials when they prepare for the test 1z0-1093-25 certification. We have established a good reputation among the industry and the constantly-

enlarged client base.

## Oracle Cloud Database Services 2025 Professional Sample Questions (Q24-Q29):

### NEW QUESTION # 24

During the provisioning of a Base Database Service (BaseDB) virtual machine (VM), what is the significance of the "Compute Shape" selection?

- A. It determines the maximum number of databases that can be created on the VM.
- B. It dictates the availability domain in which the VM will be created.
- C. It specifies the pre-installed database software version.
- **D. It defines the CPU, memory, and network bandwidth allocated to the VM.**

**Answer: D**

Explanation:

C: Defines CPU, memory, and network bandwidth:

\* The Compute Shape specifies the resources allocated to the VM.

\* Shapes vary in the number of OCPUs, amount of RAM, and network performance.

\* Selecting an appropriate shape ensures the database has enough computational power and memory to meet workload demands.

Why the other options are incorrect:

\* A. Number of databases: Limited by storage and resource capacity, not the shape itself.

\* B. Availability domain: Chosen separately during provisioning.

\* D. Pre-installed software version: The shape does not determine the database version.

### NEW QUESTION # 25

Which of the following actions would typically require the highest level of IAM permissions on a NoSQL table within Oracle NoSQL Database Cloud Service?

- A. Performing a simple read operation on a single row.
- B. Updating an existing row in the table.
- C. Inserting a new row into the table.
- **D. Dropping the entire table.**

**Answer: D**

Explanation:

D: Dropping the entire table:

\* Deleting a table is a destructive operation that permanently removes the data.

\* Requires the highest level of permissions due to the potential for data loss and disruption.

\* Usually restricted to administrators or highly privileged users.

Why the other options are incorrect:

\* A. Simple read operation: Basic permission, often granted to most users.

\* B. Inserting a row: Requires write permissions, but not as critical as table deletion.

\* C. Updating a row: Similar to insertion, modifies existing data but does not destroy the table.

### NEW QUESTION # 26

Which two functionalities can be accomplished using the Performance Hub within Database Management for monitoring?

- **A. Execute ADDM (Automatic Database Diagnostic Monitor) analysis on a historical workload.**
- **B. Identify blocking sessions that are impacting database performance.**
- C. Directly modify database initialization parameters.
- D. Upgrade the database to a newer version.

**Answer: A,B**

Explanation:

A: Execute ADDM (Automatic Database Diagnostic Monitor) analysis on a historical workload:

- \* Performance Hub allows users to analyze performance data collected over time.
  - \* ADDM analysis provides insights into performance bottlenecks and recommendations for tuning.
- C: Identify blocking sessions that are impacting database performance:
- \* Performance Hub helps identify active blocking sessions, enabling quick resolution of performance issues.
  - \* It provides real-time and historical data for better troubleshooting.
- Why the other options are incorrect:
- \* B. Modify database parameters: Performance Hub does not have the ability to change database configurations directly.
  - \* D. Upgrade the database: Upgrades are managed through other tools, such as Database Upgrade Assistant (DBUA).

#### NEW QUESTION # 27

Which of the following characteristics is most indicative of a NoSQL database's focus on scalability and availability over strict consistency?

- A. Enforcement of strict referential integrity constraints.
- B. Reliance on a centralized, single-instance architecture.
- C. Support for complex joins and transactions across multiple tables.
- **D. Partitioning and replication of data across multiple nodes.**

**Answer: D**

Explanation:

C: Partitioning and replication of data across multiple nodes:

- \* NoSQL databases typically prioritize horizontal scalability by distributing data across multiple nodes.
- \* Replication ensures data availability even if one node fails.
- \* This approach leads to eventual consistency rather than strict ACID compliance.
- \* The system can continue to operate despite some nodes being offline, maintaining high availability.

Why the other options are incorrect:

- \* A. Complex joins and transactions: Typical of relational databases prioritizing consistency.
- \* B. Strict referential integrity: More common in SQL databases requiring ACID transactions.
- \* D. Centralized architecture: Opposite of scalable, distributed NoSQL models.

#### NEW QUESTION # 28

Which two options correctly describe methods for accessing and managing the Exadata Infrastructure?

- A. Direct SSH access to the Exadata Infrastructure compute nodes is permitted for customers with root privileges.
- B. Customers have direct access to the Exadata storage cells, allowing them to modify storage configurations.
- **C. Exadata Infrastructure management is solely managed by Oracle and is not directly accessible to customers.**
- **D. Management of the Exadata Infrastructure is primarily performed through the Oracle Cloud Infrastructure (OCI) console and APIs.**
- E. The dbcli utility, used for database administration on VM DB Systems, can also be used to manage the Exadata Infrastructure.

**Answer: C,D**

Explanation:

Managing Exadata Infrastructure:

- \* OCI Console and APIs (B): The primary method for managing Exadata Infrastructure is through the Oracle Cloud Infrastructure Console and associated APIs. This includes provisioning, scaling, patching, and monitoring the Exadata environment.
- \* Oracle-Managed Infrastructure (E): Exadata Infrastructure management is fully handled by Oracle, which means customers do not have direct access to the underlying hardware. This managed approach ensures high availability and security.

Why the other options are incorrect:

- \* A: Customers do not have root access to Exadata compute nodes to ensure security and system integrity.
- \* C: The dbcli utility is designed for VM DB Systems, not Exadata Infrastructure management.
- \* D: Exadata storage cells are managed by Oracle, and customers cannot directly modify storage configurations.

#### NEW QUESTION # 29

.....

If you have your own job and have little time to prepare for the exam, you can choose us. 1z0-1093-25 exam bootcamp of us is high quality, and you just need to spend about 48 to 72 hours, you can pass the exam. In addition, 1z0-1093-25 exam bootcamp contains most of knowledge points of the exam, and you can also improve your professional ability in the process of learning. We offer you free update for 365 days after you buy 1z0-1093-25 Exam Dumps. The update version will be sent to your email automatically.
