

Reliable 1z0-1104-25 Braindumps Free - 1z0-1104-25 Dumps Reviews

Reliable DEA-1TT5 Braindumps Free - Reliable DEA-1TT5 Test Braindumps

Now I am glad to introduce a useful resource for all of you candidates to pass the exam as well as get the related certification without any more fee. our DEA-1TT5 study materials. We aim to help as many people as possible rather than earning as much money as possible. With our DEA-1TT5 practice test, you only need to spend 20 to 30 hours to prepare the exam. There are no previous contents in our study material. What's more, if you need any after service help on our DEA-1TT5 Exam Guide, our after service staffs will always here to offer the most thoughtful service for you.

Dell EMC DEA-1TT5 Exam Syllabus Topics:

Topic	Examine	Percentage
Storage Systems	Explain the components of an object-based storage system, and S3FS Describe storage provisioning and tuning Explain the features and components of block, file, object, and hybrid storage system	25%
Storage Networking Technologies	Explain the FC SAN components, FC ports, topology, and configuration, and SAN replication Explain the components and connectivity of iSCSI, NFS, and FCIF Explain the NVMe over Fabric, Software defined storage and networking	19%

The learning material is available in three different easy-to-use forms. The first one is a PDF form. The students can save the 1z0-1104-25 questions by taking out their prints or can access them on their smartphones, tablets, and laptops. The PDF form can be used anywhere anytime and is essential for applicants who like to learn from their smart devices. The second form is Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) web-based practice test which can be taken from browsers.

The Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) web-based practice test works on all major browsers such as Safari, Chrome, MS Edge, Opera, IE, and Firefox. Users do not have to install any excessive software because this Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) practice test is web-based. It can be accessed through any operating system like Windows, Linux, iOS, Android, or Mac. Another format of the practice test is the desktop software. It works offline only on Windows. Our Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) desktop-based practice exam software comes with all specifications of the web-based version.

Oracle 1z0-1104-25 Dumps Reviews & Exam 1z0-1104-25 Questions Pdf

The customers don't need to download or install excessive plugins or software to get the full advantage from web-based Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) practice tests. Additionally, all operating systems also support this format. The third format is the desktop 1z0-1104-25 practice exam software. It is ideal for users who prefer offline Oracle Cloud

Infrastructure 2025 Security Professional (1z0-1104-25) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.

Oracle 1z0-1104-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Implementing Identity and Access Management (IAM): This section of the exam measures skills of OCI Administrators and focuses on identity and access controls. It covers IAM domains, users, groups, and compartments, as well as the use of IAM policies to manage access to resources. Candidates are also tested on configuring dynamic groups, network sources, and tag-based access control, along with managing MFA, sign-on policies, and activity monitoring.
Topic 2	Protecting Data: This section of the exam measures the skills of Cloud Security Professionals and highlights data security practices in OCI. It tests knowledge of using the Key Management Service for encryption keys, managing secrets in the OCI Vault, and applying features of OCI Data Safe to ensure sensitive data remains protected.
Topic 3	Protecting Infrastructure - Network and Applications: This section of the exam measures the skills of Cloud Security Professionals and covers methods for securing networks and applications on OCI. Topics include network security groups, firewalls, and security lists, while also focusing on the use of load balancers for availability. The section further addresses the configuration of OCI certificates and web application firewalls to strengthen infrastructure security.

Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q31-Q36):

NEW QUESTION # 31

A company has deployed OCI Zero Trust Packet Routing (ZPR) to secure its network. They have two compute instances, VM1-01 and VM-02, in a public subnet. VM-01 is tagged with the security attribute app:vm01, and VM-02 is tagged with app:vm02. The VCN is labeled with network:vcn01. The ZPR policy states:

```
IN ZPR:network:vcn01 VCN ALLOW ZPR:app:vm01 TO CONNECT ZPR:app:vm02 ON PORT 22
```

"What is the expected outcome of this policy?"

- A. Both VM-01 and VM-02 can SSH into each other.
- B. VM-02 can SSH into VM-01, but VM-01 cannot SSH into VM-02.
- C. Neither VM-01 nor VM-02 can SSH into each other."
- D. VM-01 can SSH into VM-02, but VM-02 cannot SSH into VM-01.

Answer: D

NEW QUESTION # 32

When trying to encrypt plaintext using Command Line Interface (CLI), the developer gets a Service Error. This is the command the developer tried to run:

What is the reason for this error?

- A. The user should pass the key version OCID instead of the key OCID.
- B. The developer has the wrong endpoint.
- C. The developer forgot to specify the region.
- D. The plaintext needs to be in JSON form.

Answer: A

NEW QUESTION # 33

"A business has a hybrid cloud infrastructure with Oracle Linux instances running in OCI and on-premises. They want to reduce the amount of bandwidth used when patching systems. Which component of OS Management Hub can help to reduce the bandwidth usage for patching?"

- A. Dynamic groups
- B. Management stations
- C. Profiles"
- D. Management agents

Answer: C

NEW QUESTION # 34

A company is securing its compute instances (VMs and Bare Metal Machines) in Oracle Cloud infrastructure (OCI) using a network firewall. As shown in the diagram, traffic flows from the internet Gateway (IGW) to the firewall in the Public DMZ Subnet, and then to the compute instances in the Public Subnet.

When configuring security lists and network security groups (NSGs) in this setup, what should they consider?

- A. Add stateful rules to the security list attached to the firewall subnet or include the firewall in an NSG containing stateful rules for better performance.
- B. Ensure that any security list or NSG rules allow the traffic to enter the firewall for appropriate evaluation.
- C. Security list and NSG rules associated with the firewall subnet and VNICs are evaluated after the firewall.
- D. If the policy used with the firewall has no rules specified, the firewall allows all traffic.

Answer: B

NEW QUESTION # 35

"Your company is in the process of migrating its sensitive data to Oracle Cloud Infrastructure (OCI) and is prioritizing the strongest possible security measures. Encryption is a key part of this strategy, but you are particularly concerned about the physical security of

Which characteristic of OCI Key Management Service (KMS) helps ensure the physical security of your encryption keys?

- Answer: D**
