

Reliable 1Z0-1109-25 Test Answers & 1Z0-1109-25 Actual Test

2025 Latest ITDumpsfree 1Z0-1109-25 PDF Dumps and 1Z0-1109-25 Exam Engine Free Share: <https://drive.google.com/open?id=17hFUwfaZZHF5OYNhqB468zNXIFozUx1c>

ITDumpsfree is website that can take you access to the road of success. ITDumpsfree can provide the quickly passing Oracle certification 1Z0-1109-25 exam training materials for you, which enable you to grasp the knowledge of the certification exam within a short period of time, and pass Oracle Certification 1Z0-1109-25 Exam for only one-time.

Oracle 1Z0-1109-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Implementing Monitoring and Observability (O&M): This section evaluates the expertise of Site Reliability Engineers (SREs) and Monitoring Specialists in tracking system performance using OCI Monitoring, Logging, and Events services. It analyzes metrics, logs, and events to maintain system reliability and troubleshoot operational issues effectively.

Topic 2	Managing Containers Using Container Orchestration Engine: This part assesses the abilities of Kubernetes Administrators and Containerization Specialists in managing Oracle Container Engine for Kubernetes (OKE). It covers cluster creation, scaling, upgrades, networking, storage, and security configurations to optimize containerized applications in OCI environments.
Topic 3	Understand DevOps Principles and Effectively Work with Containerization Services: This section of the exam measures the skills of DevOps Engineers and Cloud Architects in applying DevOps methodologies and containerization practices. It covers implementing a microservices architecture, creating Docker containers, and managing Oracle Cloud Infrastructure Registry (OCIR) and Container Instances to streamline application deployment and scalability.

1Z0-1109-25 Actual Test | 1Z0-1109-25 Relevant Answers

The research and production of our 1Z0-1109-25 exam questions are undertaken by our first-tier expert team. The clients can have a free download and tryout of our 1Z0-1109-25 test practice materials before they decide to buy our products. They can use our products immediately after they pay for the 1Z0-1109-25 Test Practice materials successfully. There are so many advantages of our 1Z0-1109-25 learning guide that we can't summarize them with several simple words. You'd better look at the introduction of our 1Z0-1109-25 exam questions in detail as follow by yourselves.

Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q34-Q39):

NEW QUESTION # 34

How do OCI DevOps Deployment Pipelines reduce risk and complexity of production applications?

- A. By scaling builds with service-managed build runners
- **B. By reducing change-driven errors introduced by manual deployments**
- C. By working with existing Git repositories and CI systems
- D. By eliminating downtime of production applications

Answer: B

Explanation:

OCI DevOps Deployment Pipelines automate the process of deploying applications to production environments. By using automated, repeatable deployment processes, they help reduce the risk of change-driven errors, which are often introduced during manual deployments. This automation reduces human errors and ensures consistency across environments, thus minimizing complexity and risk in production.

NEW QUESTION # 35

Observability helps understand system behavior, but it has limitations.

Which of the following tasks cannot be accomplished solely through observability?

- A. Identifying resource consumption
- **B. Automating software deployments**
- C. Optimizing resource utilization
- D. Identifying infrastructure bottlenecks

Answer: B

Explanation:

Observability refers to the ability to understand a system's internal state by observing its outputs. It involves metrics, logs, and tracing to provide insights into the system's behavior, which helps in monitoring and identifying issues.

NEW QUESTION # 36

You're using Oracle Cloud Infrastructure (OCI) DevOps to deploy your application on an Oracle Container Engine for Kubernetes (OKE) environment. You push your code to the OCI Code Repository, add all the required stage and configure the build and deployment pipeline. When you run the build, you see "unable to clone the repository" error. What could the configuration error be?

- A. CA bundle for Transport Layer Security (TLS) verification to download the build source during the build run is missing.
- **B. Dynamic Groups and OCI IAM policies to access the code repository are missing.**
- C. The Docker image used in the pipeline is incompatible with the OKE environment.
- D. The OKE cluster is not configured to allow external access to the code repository.

Answer: B

Explanation:

The error "unable to clone the repository" typically indicates that there is an authentication or authorization issue preventing access to the OCI Code Repository. In OCI DevOps, the build pipeline must have the appropriate permissions to access the code repository. To allow the build pipeline to clone the repository, you need to set up Dynamic Groups and OCI IAM policies that provide the necessary permissions for the build runner to access the code repository.

NEW QUESTION # 37

Which statement is false about OCI Resource Manager (RM)?

- A. RM can render custom "Application Information" pages for stacks.
- B. RM can mirror repositories from GitHub and GitLab.
- C. RM can generate Terraform based on the resources in a compartment.
- **D. Resources provisioned through RM cannot be destroyed from outside of RM.**

Answer: D

Explanation:

Resources provisioned through OCI Resource Manager (RM) can still be modified or destroyed from outside of RM, such as using the OCI Console, CLI, or other APIs. RM manages the lifecycle of resources created by its Terraform configurations, but it does not prevent other tools or methods from modifying or deleting those resources.

NEW QUESTION # 38

Which command creates the docker registry secret required in the application manifests for OKE to pull images from Oracle Cloud Infrastructure Registry?

- A.

```
kubect1 create passwd docker-registry <secret-name> --docker-server=  
<region-key>.oke.io --docker-username=<tenancy-namespace>/<oci-  
username> --docker-password='<oci-auth-token>' --docker-email=<email-  
address>
```

- B.
- C.

```
kubect1 create passwd docker-registry <secret-name> --docker-server=  
<region-key>.oke.io --docker-username=<oci-username> --docker-  
password='<oci-auth-token>' --docker-email=<email-address>
```

- D.

```
kubect1 create secret docker-registry <secret-name> --docker-server=  
<region-key>.ocir.io --docker-username=<tenancy-namespace>/<oci-  
username> --docker-password='<oci-auth-token>' --docker-email=<email-  
address>
```

```
kubectl create secret docker-registry <secret-name> --docker-server=
<region-key>.ocir.io --docker-username=<oci-username> --docker-
password='<oci-auth-token>' --docker-email=<email-address>
```

Answer: C

Explanation:

To create a Docker registry secret to pull images from the Oracle Cloud Infrastructure Registry (OCIR), you need to specify the correct parameters such as the region key, namespace, OCI username, and OCI authentication token.

Chosen command is correct because:

The `kubectl create secret docker-registry` command creates a Docker registry secret.

The `--docker-server=<region-key>.ocir.io` specifies the correct endpoint for OCIR.

The `--docker-username=<tenancy-namespace>/<oci-username>` provides both the tenancy namespace and the OCI username, which is the required format for authentication with OCIR.

The `--docker-password='<oci-auth-token>'` specifies the OCI auth token, which acts as a password for authentication.

The `--docker-email=<email-address>` is also included.

The other commands have errors, such as missing tenancy namespace or using incorrect flags (`passwd` instead of `secret`).

NEW QUESTION # 39

.....

We are dedicated to help you pass the exam and gain the corresponding certificate successful. 1Z0-1109-25 exam cram is high-quality, and you can pass your exam by using them. In addition, 1Z0-1109-25 exam braindumps cover most of knowledge points for the exam, and you can also improve your ability in the process of learning. You can obtain the download link and password within ten minutes, so that you can begin your learning right away. We have free update for 365 days if you buying 1Z0-1109-25 Exam Materials, the update version for 1Z0-1109-25 exam cram will be sent to your email automatically.
