## Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional Sample Questions (Q18-Q23):

### NEW QUESTION # 18

In FAW there are many Subject Areas, with their corresponding data, available for you to use when creating and editing analyses and reports.

How are the Subject Areas secured?

- A. Duty roles secure the access to FAW Subject Areas.
- B. Unlike Fusion Applications, the Subject Areas are not secured in FAW. Any FAW-licensed user can access them.
- C. There is no need to secure Subject Areas as the data security provides the necessary security access.

### Answer: A

Explanation:

Explanation

The way that the Subject Areas are secured in FAW is by using duty roles. Duty roles define the functional security for a user, such as which tasks they can perform or which objects they can view. Duty roles also determine which subject areas a user can access based on their job functions. There is a need to secure Subject Areas as the data security alone does not provide the necessary security access. Unlike Fusion Applications, the Subject Areas are not open to any FAW-licensed user, but only to those who have the appropriate duty roles.

### NEW QUESTION # 19

Which data sources are available for Data Augmentation?

- A. The Oracle Fusion Application transactional database
- B. Fusion Applications and additional data connections available in FAW
- C. The same data sources as OAC connectors

### Answer: B

Explanation:

Explanation

The data sources that are available for Data Augmentation are Fusion Applications and additional data connections that are available in FAW. You can use Manage Connections to create connections to various data sources, such as Oracle Database, Oracle Autonomous Database, Oracle Object Storage, Oracle Applications Cloud, and others<sup>4</sup>. You can then use Data Augmentation to select the columns from these data sources and create datasets for analysis

#### **NEW QUESTION # 20**

Currently, you have set up SSO for Fusion Applications between Active Directory and Fusion Applications is it possible to also set up SSO between Fusion Applications and FAW in this case?

- A. No, this configuration is not supported.
- B. **possible, and the configuration process to set up SSO between Fusion Applications and FAW stays the same.**
- C. This is a complex configuration, and it is highly discouraged.

**Answer: B**

Explanation:

Explanation

It is possible to set up SSO between Fusion Applications and FAW in this case, where you have already set up SSO for Fusion Applications between Active Directory and Fusion Applications. The configuration process to set up SSO between Fusion Applications and FAW stays the same, regardless of whether you use Active Directory or another IdP as your primary authentication source<sup>5</sup>. This configuration is supported and not complex or discouraged by Oracle.

#### **NEW QUESTION # 21**

When choosing a Cloud Account for activating Fusion Analytics Warehouse (FAW), which recommendation does Oracle provide?

- A. Activate your FAW subscription in a separate Oracle Cloud account. The Oracle Cloud account for your Oracle Fusion Cloud Applications should be exclusively for use by the cloud applications.
- B. **Activate FAW subscription into the same Oracle Cloud account as your Oracle Fusion Cloud Applications.**
- C. No recommendation is provided by Oracle on your choice of Cloud Account for the activation of FAW.

**Answer: B**

Explanation:

Explanation

The highly recommended best practice is to activate your new UCC subscription into your Oracle Fusion Cloud Applications account followed by activating your Oracle Fusion Analytics Warehouse subscription into the same Oracle Cloud account as your Oracle Fusion Cloud Applications<sup>12</sup>

#### **NEW QUESTION # 22**

You have decided to use Data Augmentation to bring additional content from Fusion Applications What is the best way to identify the Fusion Applications object that you want to extract?

- A. You must open an SR to identify the required Public View Object (PVO).
- B. **The Public View Object (PVO) that contains the content you are looking for.**
- C. You have to identify the physical database table in Fusion Applications that contains the content you are looking for.

**Answer: B**

Explanation:

Explanation

The best way to identify the Fusion Applications object that you want to extract using Data Augmentation is to find the Public View Object (PVO) that contains the content you are looking for. A PVO is a Business Intelligence view object that is exposed for external consumption and is available for Data Augmentation<sup>3</sup>. You do not need to open an SR or identify the physical database table in Fusion Applications to use Data Augmentation.

## NEW QUESTION # 23

Professional 1z0-1118-23 exam using Exam4Free free exam discussions.
