

Reliable 300-620 Test Cost & 300-620 Reliable Test Blueprint

DOWNLOAD the newest ExamsReviews 300-620 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1soOIuFDcfCtPm74Z1LVZgjdAFcA1QAcb>

The content system of 300-620 exam simulation is constructed by experts. After-sales service of our study materials is also provided by professionals. If you encounter some problems when using our 300-620 study materials, you can also get them at any time. After you choose 300-620 Preparation questions, professional services will enable you to use it in the way that suits you best, truly making the best use of it, and bringing you the best learning results.

To pass the exam, candidates must demonstrate a deep understanding of ACI architecture and be able to configure, manage, and troubleshoot ACI deployments. They must also understand how to automate ACI tasks using REST APIs and Python scripts. Implementing Cisco Application Centric Infrastructure certification exam consists of 60-70 multiple-choice questions and lasts 90 minutes. Candidates who pass the exam will receive the Cisco Certified Specialist - ACI Implementation certification, which demonstrates their expertise in ACI implementation and management.

To pass the Cisco 300-620 Exam, candidates need to demonstrate their understanding of ACI architecture, policies, and operations, as well as their ability to configure and troubleshoot ACI fabric components, such as switches, routers, and controllers. 300-620 exam also covers topics related to automation and orchestration, including the use of APIs and scripting languages to automate routine tasks and the integration of ACI with other IT systems and services.

100% Pass Quiz 2025 Cisco 300-620 Perfect Reliable Test Cost

Learning with our 300-620 learning guide is quite a simple thing, but some problems might emerge during your process of 300-620 exam materials or buying. Considering that our customers are from different countries, there is a time difference between us, but we still provide the most thoughtful online after-sale service on 300-620 training guide twenty-four hours a day, seven days a week, so just feel free to contact with us through email anywhere at any time. Our commitment of helping you to pass 300-620 exam will never change.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q268-Q273):

NEW QUESTION # 268

Refer to the exhibit.

1. Identity 2. Nodes And Interfaces 3. Protocols 4. External EPG

Nodes and Interfaces

The L3Out configuration consists of node profiles and interface profiles. An L3Out can span across multiple nodes in the fabric. All nodes used by the L3Out can be included in a single node profile and is required for nodes that are part of a VPC pair. Interface profiles can include multiple interfaces. When configuring dual stack interfaces a separate interface profile is required for the IPv4 and IPv6 configuration, that is automatically taken care of by this wizard.

Use Defaults: ☒

Interface Types

Layer 3: **Routed** Routed Sub SVI Floating SVI

Layer 2: **Port** Direct Port Channel

Nodes

Node ID: F1P1L1 (Node - 1001) Router ID: 10.1.7.1 Loopback Address: 10.1.1.1

Interface: Select a port IP Address: address/mask MTU (bytes): inherit

Previous Cancel Next

An engineer must configure an L3Out peering with the backbone network. The L3Out must forward unicast and multicast traffic over the link. Which two methods should be used to configure L3Out to meet these requirements? (Choose two.)

- A. VPC with SVI
- B. port channel with SVI
- C. Layer 3 routed port
- D. Layer 3 routed subinterface
- E. Layer 3 floating SVI

Answer: C,D

Explanation:

https://www.cisco.com/c/en/us/solutions/collateral/data-center-virtualization/application-centricinfrastructure/guide-c07-743150.html#_L3Out_sStatic_rRoutes

https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/4-x/L3-configuration/Cisco-APIC-Layer-3-Networking-Configuration-Guide-401/Cisco-APIC-Layer-3-Networking-Configuration-Guide-401_chapter_010010.html

- PIM is supported on Layer 3 Out routed interfaces and routed subinterfaces including Layer 3 port-channel interfaces. PIM is not supported on Layer 3 Out SVI interfaces.

NEW QUESTION # 269

Refer to the exhibit.

```
aaa authentication login fallback
 realm radius
 group radius-1

aaa authentication login console
 realm radius
 group radius-1

aaa authentication login default
 realm radius
 group radius-1

aaa banner 'WELCOME TO ACI'
aaa group radius radius-1
 server 10.1.1.1 priority 0
 server 10.2.2.2 priority 1

aaa user default-role-no-login
```

Which action should be taken to ensure authentication if the RADIUS servers are unavailable?

- A. Adjust the priority of server 10.1.1.1 to 1.

- B. Set the fallback login to local.
- C. Set the default login realm to LDAP
- D. Assign the user to the default role.

Answer: B

Explanation:

Explanation

Changing the server priority is not logical answer.

The command "aaa user default-role no-login" means that remote users who do not have a user role cannot login. This means that assigning the user to default role will not be able to login.

The "aaa authentication login default" and "aaa authentication login fallback" has identical configuration. The fallback uses RADIUS server. We should change is to local.

NEW QUESTION # 270

Refer to the exhibit. An engineer configures a Layer 4 to Layer 7 device object. The device is a virtual firewall with a single network adapter and it must be deployed in routed mode. Which action completes the configuration of the device object?

Create L4-L7 Devices

Cisco ACI device package functionality for L4-L7 devices will be deprecated starting in Cisco APIC 5.2 release. The use of configurations without device package is recommended.

General

Name: test-device

Service Type: Firewall

Device Type: **PHYSICAL** **VIRTUAL**

VMM Domain: west

Trunking Port: ☐

VM Instantiation Policy: select an option

Promiscuous Mode: ☐

Context Aware: **Multiple** **Single**

Function Type: **GoThrough** GoTo L7

Devices

The configuration can comprise a single device, two devices (such as an active-standby HA pair), or two or more standalone devices in a scale-out pool.

Name	VM Name	vCenter Name	Interfaces
test-device-VM1	Raccoon_City Vrd=1 EPG=1	mspl-vcenter	one-armed-IF

Cluster Interfaces:

Name	Concrete Interfaces	Enhanced Lag Policy
one-armed-IF	test-device-VM1/one-armed-IF	

- A. Change context awareness to Multiple.
- B. Add an outside interface to the cluster interfaces.
- C. Change Function Type to GoTo.
- D. Enable Promiscuous Mode.

Answer: C

NEW QUESTION # 271

An engineer must implement management policy and data plane separation in the Cisco ACI fabric. Which ACI object must be created in Cisco APIC to accomplish this goal?

- A. Tenant
- B. Application profile
- C. Contract
- D. Bridge domain

Answer: A

NEW QUESTION # 272

Refer to the exhibit.

A Cisco ACI fabric is newly deployed, and the security team requires more visibility of all inter-EPG traffic flows. All traffic in a VRF must be forwarded to an existing firewall pair. During failover, the standby firewall must continue to use the same IP and MAC as the primary firewall. Drag and drop the steps from the left into the Implementation order on the right to configure the service graph that meets the requirements. (Not all steps are used.)

Apply a service graph template and select vzAny EPG as the consumer and provider.	Step 1
Select a redirect policy with the Layer 3 destination.	Step 2
Create a Layer 4 to Layer 7 service graph template.	Step 3
Select a redirect policy with enabled anycast and the Layer 3 destination.	Step 4
Select the same cluster interface under Consumer Connector and Provider Connector.	Step 5
Create a service bridge domain and a Layer 4 to Layer 7 device with one cluster interface.	Step 6
Select the existing contract with custom IP EtherType filter.	

Answer:

Explanation:

Explanation

https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/L4-L7_Services_Deployment/guide/b

* Create a service bridge domain and a layer 4 to layer 7 device within one cluster interface.

NEW QUESTION # 273

.....

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the 300-620 practice exam. Our 300-620 exam dumps are indispensable tool to pass it with high quality and low price. By focusing on how to help you effectively, we encourage exam candidates to buy our 300-620 practice test with high passing rate up to 98 to 100 percent all these years. Our Cisco exam dumps almost cover everything you need to know about the exam. As long as you practice our 300-620 Test Question, you can pass exam quickly and successfully. By using them, you can not only save your time and money, but also pass 300-620 practice exam without any stress.
