# Reliable 300-715 Exam Torrent: Implementing and Configuring Cisco Identity Services Engine - 300-715 Test Braindumps - Pass4training
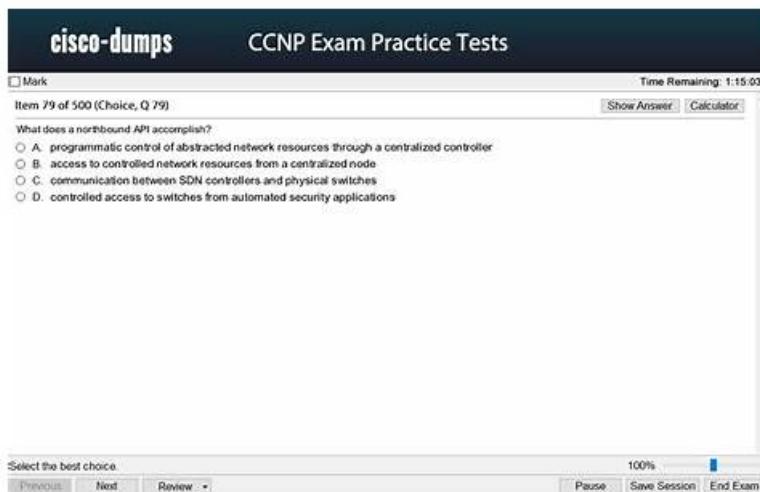

P.S. Free & New 300-715 dumps are available on Google Drive shared by Pass4training: https://drive.google.com/open?id=1i1R4ALIhB0pydAklrx3TJuGD_olLntc0

If you are wandering for 300-715 study material and the reliable platform that will lead you to success in exam, then stop considering this issue. Pass4training is the solution to your problem. They offer you reliable and updated 300-715 exam questions. The exam questions are duly designed by the team of subject matter experts; they are highly experienced and trained in developing exam material. Pass4training offers a 100% money back guarantee, in case you fail in your 300-715. You claim revert, by showing your transcript and undergoing through the clearance process. Also, we provide 24/7 customer service to all our valued customers. Our dedicated team will answer all your all queries related to 300-715.

To be eligible for the Cisco 300-715 certification exam, candidates must have a solid understanding of Cisco networking technologies and protocols, as well as experience in deploying and managing enterprise-level network security solutions. They should also have a thorough knowledge of identity and access management principles and be familiar with industry-standard security frameworks.

Exam Details

Cisco doesn't reveal the detailed information about its exams, so it is impossible to know the exact number of questions as well as their formats before sitting for the test. The students will have 90 minutes of allocated time to complete all the questions. This certification exam is proctored through the Pearson VUE platform and delivered in two languages: English and Japanese. To make an appointment, the applicants are required to pay the registration fee of $300.

The individuals planning to take the Cisco 300-715 test are recommended to complete the official training course, Implementing and Configuring Cisco Identity Services Engine (SISE) v3.0, available on the vendor's website. This is a 5-day course that helps the candidates build a proper knowledge base to tackle the exam questions.

In order to meet the different demands of the different customers, these experts from our company have designed three different versions of the 300-715 reference guide. All customers have the right to choose the most suitable version according to their need after buying our study materials. The PDF version of the 300-715 exam prep has many special functions, including download the demo for free, support the printable format and so on. We can make sure that the PDF version of the 300-715 Test Questions will be very convenient for all people. Of course, if you choose our study materials, you will have the chance to experience our PDF version.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q247-Q252):

NEW QUESTION # 247
Wireless network users authenticate to Cisco ISE using 802.1X through a Cisco Catalyst switch. An engineer must create an updated configuration to assign a security group tag to the user's traffic using inline tagging to prevent unauthenticated users from accessing a restricted server. The configurations were performed:
* configured Cisco ISE as a Cisco TrustSec AAA server
* configured the switch as a RADIUS device in Cisco ISE
* configured the wireless LAN controller as a TrustSec device in Cisco ISE
* created a security group tog for the wireless users
* created a certificate authentication profile
* created an identity source sequence
* assigned an appropriate security group tag to the wireless users
* defined security group access control lists to specify an egress policy
* enforced the access control lists on the TrustSec policy matrix in Cisco ISE
* configured TrustSec on the switch
* configured TrustSec on the wireless LAN controller
Which two actions must be taken to complete the configuration? (Choose two.)

- A. Create static IP-to-SGT mapping for the restricted web server.
- B. Configure inline tag propagation on the switch and wireless LAN controller.
- C. Configure Security Group Tag Exchange Protocol on the wireless LAN controller.
- D. Configure Security Group Tag Exchange Protocol on the switch.
- E. Configure Security Group Tag Exchange Protocol to distribute IP to security group tags on Cisco ISE.

Answer: B,D

NEW QUESTION # 248
Which use case validates a change of authorization?

- A. An authenticated, wired EAP-capable endpoint is discovered
- B. Endpoints are created through device registration for the guests
- C. An endpoint profiling policy is changed for authorization policy.
- D. An endpoint that is disconnected from the network is discovered

Answer: C

Explanation:

NEW QUESTION # 249
A network engineer is configuring guest access and notices that when a guest user registers a second device for access, the first device loses access What must be done to ensure that both devices for a particular user are able to access the guest network simultaneously?

- A. Use a custom portal to increase the number of logins
- B. Create an Adaptive Network Control policy to increase the number of devices
- C. Configure the sponsor group to increase the number of logins.
- D. Modify the guest type to increase the number of maximum devices

Answer: D

Explanation:

NEW QUESTION # 250

A Cisco ISE administrator needs to ensure that guest endpoint registrations are only valid for one day. When testing the guest policy flow, the administrator sees that the Cisco ISE does not delete the endpoint in the Guest Endpoints identity store after one day and allows access to the guest network after that period. Which configuration is causing this problem?

- A. The RADIUS policy set for guest access is set to allow repeated authentication of the same device
- B. The Guest Account Purge Policy is set to 15 days
- C. The Endpoint Purge Policy is set to 30 days for guest devices
- D. The length of access is set to 7 days in the Guest Portal Settings

Answer: C

NEW QUESTION # 251

An organization wants to implement 802.1X and is debating whether to use PEAP-MSCHAPv2 or PEAP-EAP-TLS for authentication. Drag the characteristics on the left to the corresponding protocol on the right.
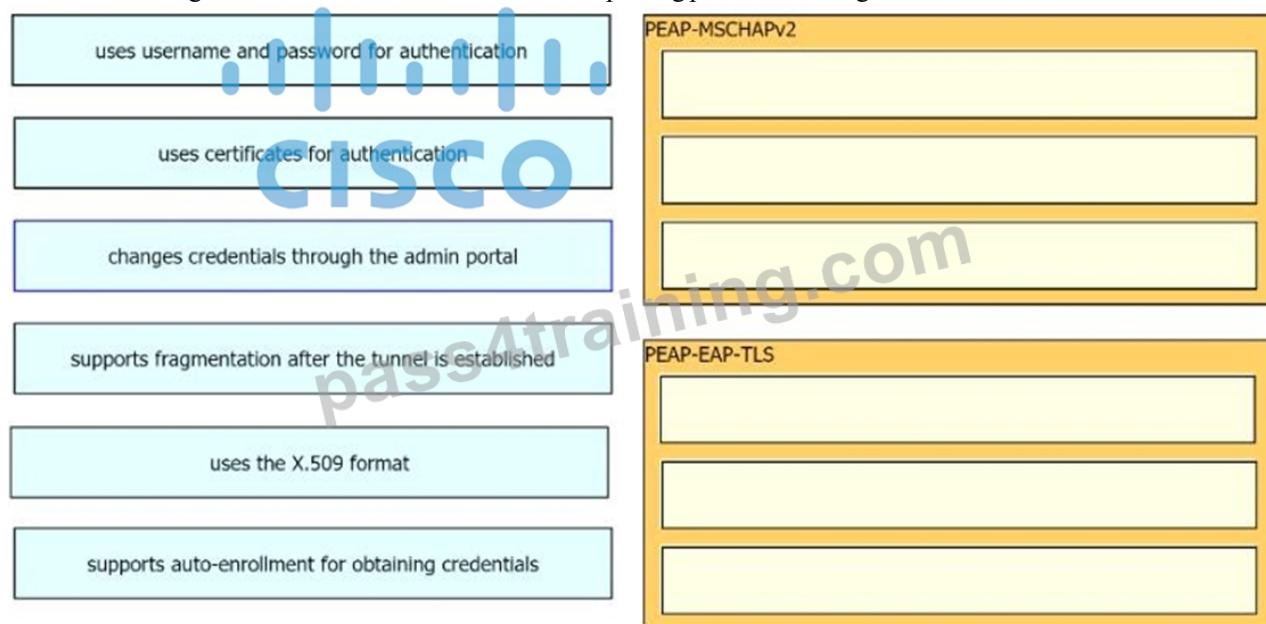

Answer:

Explanation:
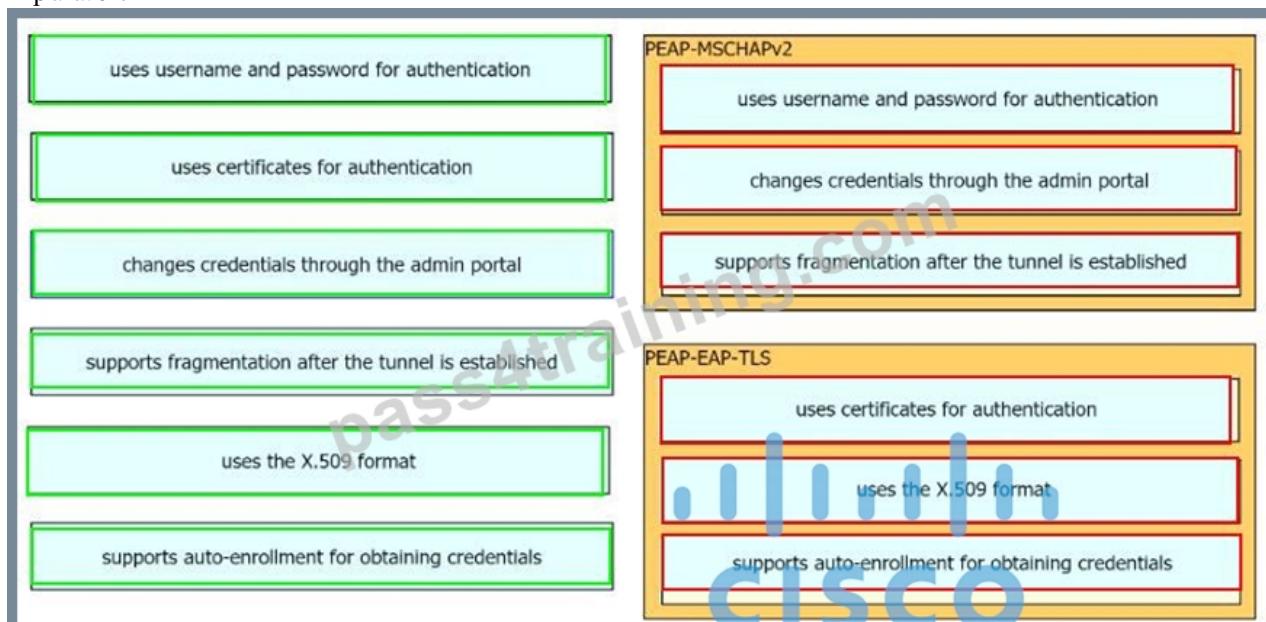

NEW QUESTION # 252
