300-740 Reliable Test Online - Valid Test 300-740 Tips

Our 300-740 preparation materials are willing to give you some help if you want to be better in your daily job and get a promotion on matter on the salary or on the position. Those who have used 300-740 training engine have already obtained an international certificate and have performed even more prominently in their daily work. As it should be, they won the competition. So as they wrote to us that our 300-740 Exam Questions had changed their life.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q106-Q111):

NEW QUESTION # 106

Configuring SAML/SSO is beneficial because:

- A. It increases the number of passwords a user must remember
- B. It allows users to use the same password across all systems, reducing security
- C. It disables the need for encryption
- **D. It simplifies user experience by allowing a single set of credentials for multiple services**

Answer: D

NEW QUESTION # 107

Refer to the exhibit. A security engineer deployed Cisco Secure XDR, and during testing, the log entry shows a security incident. Which action must the engineer take first?

- A. Uninstall the malware.
- B. Rebuild the endpoint.
- C. Block IP address 10.77.17.45.
- **D. Isolate the endpoint.**

Answer: D

Explanation:

The SCAZT documentation emphasizes that when Cisco Secure XDR identifies a high-risk threat (e.g., risk score 8 out of 10 for malware distribution, as shown in the exhibit), the first priority is to prevent lateral movement and data exfiltration. The recommended first response action is to isolate the affected endpoint from the network.

Cisco Secure Endpoint and XDR allow you to trigger an "isolate" response directly from the dashboard, cutting off all non-management communication from the compromised device. This preserves the environment and enables forensic analysis before removing malware or taking destructive actions like rebuilding the system.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 6: Threat Response, Pages 113-118

NEW QUESTION # 108

Secure Domains in the SAFE framework are used to:

- A. Specify security policies for cloud providers
- **B. Segregate network areas based on security requirements**
- C. Define different administrative roles
- D. Categorize types of security threats

Answer: B

NEW QUESTION # 109

For a web application, configuring SAML authentication means:

- A. Users can sign in once to access multiple applications without re-authenticating
- B. The application can only be accessed through a specific device
- C. Users need a different password for each service
- D. The application will not support multifactor authentication

Answer: A

NEW QUESTION # 110

Microsegmentation as a security policy is effective for:

- A. Isolating workloads from each other to reduce the attack surface
- B. Centralizing all workloads
- C. Simplifying access controls
- D. Decreasing the overall security posture

Answer: A

NEW QUESTION # 111
