EC-COUNCIL EC-Council Disaster Recovery Professional (EDRP) Sample Questions (Q258-Q263):

NEW QUESTION # 258

Zane is a server administrator. While doing the regular maintenance of the servers, she finds out that the Active Directory of one of the servers present in the domain is missing. Which restoration process would help Zane in this scenario given that all the other servers in the domain have their Active Directory intact?

- A. Server Migration
- B. Authoritative Active Directory Restoration
- **C. Non-Authoritative Active Directory Restoration**
- D. Data Replication

Answer: C

Explanation:

Non-Authoritative Active Directory Restoration is used to restore a domain controller's Active Directory database from a backup when other domain controllers in the domain are still operational. It allows the restored server to synchronize with the intact servers, updating its directory to the current state. Since Zane's other servers have intact Active Directories, this method ensures consistency without overwriting domain- wide data.

* Option A (Server Migration):Involves moving services to a new server, not restoring AD.

* Option B (Data Replication):A general process, not specific to AD restoration.

- * Option C (Authoritative Restoration):Used when the restored AD data must override others, not applicable here.
- * "Non-Authoritative Active Directory Restoration recovers a domain controller by leveraging replication from other intact controllers, ensuring domain consistency without forcing changes" (Module: System Recovery, Section: Active Directory Recovery).

NEW QUESTION # 259

Which of the following processes is involved in identifying, measuring, and controlling events?

- A. Disaster Recovery
- **B. Risk Management**
- C. Response Management
- D. Incident Management

Answer: B

NEW QUESTION # 260

Which of the following documents provides a high-level view of the entire organization's disaster recovery efforts?

- **A. Executive summary**
- B. Department-specific plans
- C. Technical guides
- D. Checklists

Answer: A

NEW QUESTION # 261

Jake was preparing a particular plan for his organization in which all personnel accountable for research, development, and implementation of the disaster recovery plan were being identified. Which plan was Jake preparing for his organization?

- **A. Disaster Management Plan**
- B. Disaster Recovery Plan
- C. IT Recovery Plan
- D. Business Continuity Plan

Answer: A

Explanation:

A Disaster Management Plan identifies personnel for research, development, and implementation of disaster- related strategies, broader than just DR, as Jake did.

* Option A (BCP):Focuses on continuity, not personnel identification alone.

* Option C (IT Recovery):IT-specific, narrower scope.

* Option D (DRP):Recovery-focused, not as broad as management.

* "The Disaster Management Plan assigns personnel for research, development, and implementation, encompassing all disaster response aspects" (Module: Disaster Recovery Planning, Section: Management Plans).

NEW QUESTION # 262

Which of the following terms refers to the ease with which technicians can resolve or replace failing components or systems?

- **A. Reparability**
- B. Recoverability
- C. Robustness
- D. Redundancy

Answer: A

Explanation:

* "Reparability measures the ease of resolving or replacing failed components, critical for rapid system restoration" (Module: System Resilience, Section: Maintenance Concepts).
