Though there is not much demand for these certificates, it is still important for individuals to take this exam. The importance of taking this exam will help individuals get a new job as an IT professional. Searching for free VPN service will be the best way for an individual to find free VPN providers. If an individual wants to get a new job, they must take the Microsoft AZ-700 exam before applying for the job. Ports are used to connect devices to a network. Ports are used to send and receive data using the Internet. The use of ports is critical for secure communications. Listeners are used to give information about the network that is being listened on. **Microsoft AZ-700 Dumps** are the best way to help an individual prepare for the exam. The use of listeners makes it easier for users to know what is happening on the network. Vmss is a virtual machine storage service. A virtual machine is created by using the Hyper-V software. Virtual machines are easily created for any use. Reach for an individual who is trying to find low-cost storage. The use of virtual machines makes it really easy to create an unlimited amount of servers for any purpose.

Fastpath can be used to install windows should the need for a windows' installation arise. Attempt in the installation of windows can be difficult without the necessary skills. Assure that the computer that is being used can be used to install windows. With that being said, there are a lot of reasons a person might want to install windows in a computer. For one, there might be a need for an individual to do something in the future. To fix global warming, an individual might need to do something in the future. To find ways to help an individual fix this issue, they must look for windows installation services. Assists in the installation of windows should the need for a window installation arise. An individual can get more from their computer by installing windows.

## AZ-700 Real Exams & Authentic AZ-700 Exam Questions

AZ-700 certifications are thought to be the best way to get good jobs in the high-demanding market. There is a large range of AZ-700 certifications that can help you improve your professional worth and make your dreams come true. Our AZ-700 Certification Practice materials provide you with a wonderful opportunity to get your dream certification with confidence and ensure your success by your first attempt.

Microsoft AZ-700 Certification Exam is intended for Azure networking professionals who have a good understanding of Azure networking concepts and services and have experience in designing and implementing Azure networking solutions. Candidates for AZ-700 exam should have a minimum of two years of experience in designing and implementing Azure networking solutions and should have a good understanding of network security, routing, and load balancing. Successful candidates will be able to design and implement Azure networking solutions that meet the requirements of their organization and ensure the security, scalability, and availability of their Azure resources. The Microsoft AZ-700 Certification Exam is a great way for Azure networking professionals to validate their skills and knowledge and advance their career in the Azure ecosystem.

## Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q245-Q250):

### NEW QUESTION # 245

You have an Azure subscription that contains the virtual networks shown in the following table.

| Name  | Subnet             | Peered with |
|-------|--------------------|-------------|
| VNet1 | Subnet11, Subnet12 | VNet2       |
| VNet2 | Subnet21           | VNet1       |

The subscription contains the virtual machines shown in the following table.

| Name | Connected to | Availability set |
|------|--------------|------------------|
| VM1  | Subnet11     | AS1              |
| VM2  | Subnet11     | AS1              |
| VM3  | Subnet12     | None             |
| VM4  | Subnet21     | None             |

You create a load balancer named LB1 that has the following configurations:

- \* SKU: Basic
- \* Type: Internal
- \* Subnet: Subnet12
- \* Virtual network VNet1

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements                                    | Yes                   | No                    |
|-----------------------------------------------|-----------------------|-----------------------|
| LB1 can balance requests between VM1 and VM2. | <input type="radio"/> | <input type="radio"/> |
| LB1 can balance requests between VM2 and VM3. | <input type="radio"/> | <input type="radio"/> |
| LB1 can balance requests between VM3 and VM4. | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation:

| Statements                                    | Yes                              | No                               |
|-----------------------------------------------|----------------------------------|----------------------------------|
| LB1 can balance requests between VM1 and VM2. | <input checked="" type="radio"/> | <input type="radio"/>            |
| LB1 can balance requests between VM2 and VM3. | <input type="radio"/>            | <input checked="" type="radio"/> |
| LB1 can balance requests between VM3 and VM4. | <input type="radio"/>            | <input checked="" type="radio"/> |

Explanation

| Statements                                    | Yes                              | No                               |
|-----------------------------------------------|----------------------------------|----------------------------------|
| LB1 can balance requests between VM1 and VM2. | <input checked="" type="radio"/> | <input type="radio"/>            |
| LB1 can balance requests between VM2 and VM3. | <input type="radio"/>            | <input checked="" type="radio"/> |
| LB1 can balance requests between VM3 and VM4. | <input type="radio"/>            | <input checked="" type="radio"/> |

#### NEW QUESTION # 246

Your company has offices in New York and Amsterdam. The company has an Azure subscription. Both offices connect to Azure by using a Site-to-Site VPN connection.

The office in Amsterdam uses resources in the North Europe Azure region. The office in New York uses resources in the East US Azure region.

You need to implement ExpressRoute circuits to connect each office to the nearest Azure region. Once the ExpressRoute circuits are connected, the on-premises computers in the Amsterdam office must be able to connect to the on-premises servers in the New York office by using the ExpressRoute circuits.

Which ExpressRoute option should you use?

- A. ExpressRoute FastPath
- **B. ExpressRoute Local**
- C. ExpressRoute Direct
- D. ExpressRoute Global Reach

**Answer: B**

#### NEW QUESTION # 247

You plan to configure BGP for a Site-to-Site VPN connection between a datacenter and Azure.

Which two Azure resources should you configure? Each correct answer presents a part of the solution. (Choose two.) NOTE: Each correct selection is worth one point.

- A. Azure Front Door
- **B. a virtual network gateway**
- C. Azure Application Gateway
- D. Azure Firewall
- **E. a local network gateway**

**Answer: B,E**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/vpn-gateway/bgp-howto>

#### NEW QUESTION # 248

You have an Azure subscription. The subscription contains a locally-redundant storage (LRS) account named storage1 that is deployed to the US East Azure region and has a Microsoft.Storage service endpoint.

You set Redundancy for storage1 to Read-access geo-redundant storage (RA-GRS).

You need to ensure that the contents of storage1 will be accessible by using a service endpoint in a paired region. The solution must minimize administrative effort.

What should you do first?

- A. Create an object replication rule for storage.
- B. Delete the existing service endpoint.
- C. From storage1, select Secure transfer required.
- **D. Create a service endpoint policy.**

**Answer: D**

Explanation:

When Service Endpoint policies are applied on a subnet, the Azure Storage Service Endpoint scope gets upgraded from regional to global. This process means that all the traffic to Azure Storage is secured over service endpoint thereafter. The Service endpoint policies are also applicable globally. Any storage accounts that aren't explicitly allowed are denied access.  
<https://learn.microsoft.com/en-us/azure/virtual-network/virtual-network-service-endpoint-policies-overview>

#### NEW QUESTION # 249

You have an Azure subscription.

You have the on-premises sites shown the following table.

| Name  | Number of users | Connection type to Azure |
|-------|-----------------|--------------------------|
| Site1 | 500             | ExpressRoute             |
| Site2 | 100             | Site-to-Site VPN         |
| Site3 | 1               | Point-to-Site (P2S) VPN  |

You plan to deploy Azure Virtual WAN.

You are evaluating Virtual WAN Basic and Virtual WAN Standard.

Which type of Virtual WAN can you use for each site? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Virtual WAN Basic:

- Site2 only
- Site3 only
- Site2 and Site3 only
- Site1, Site2, and Site3

Virtual WAN Standard:

- Site1 only
- Site1 and Site3 only
- Site2 and Site3 only
- Site1, Site2, and Site3

Answer:

Explanation:

Answer Area

Virtual WAN Basic:

- Site2 only
- Site3 only
- Site2 and Site3 only
- Site1, Site2, and Site3

Virtual WAN Standard:

- Site1 only
- Site1 and Site3 only
- Site2 and Site3 only
- Site1, Site2, and Site3
