

# **Reliable AZ-900 New Guide Files offer you accurate Valid Test Questions | Microsoft Azure Fundamentals**

P.S. Free 2025 Microsoft AZ-900 dumps are available on Google Drive shared by Actual4Labs: <https://drive.google.com/open?id=1fgKoqR0h0nNR46TWv9Pl6Ep7j6BV7d6v>

Actual4Labs is a legal authorized company offering the best Microsoft AZ-900 test preparation materials. So for some candidates who are not confident for real tests or who have no enough time to prepare I advise you that purchasing valid and Latest AZ-900 Test Preparation materials will make you half the efforts double the results. Our products help thousands of people pass exams and can help you half the work with double the results.

The Microsoft AZ-900 exam is intended for professionals from various backgrounds, including IT, sales, purchasing, and finance. It is also suitable for managers and executives who want to have a better understanding of the benefits of cloud computing and how Azure can help their organizations grow. AZ-900 exam is available in multiple languages and can be taken online or at a testing center.

The Microsoft AZ-900 exam covers a range of topics that include cloud concepts, core Azure services, security, privacy, compliance, and pricing and support. The focus is on providing the candidate with a solid understanding of the basic principles and features of Azure, so that they can effectively use and manage the platform. AZ-900 Exam is also designed to help candidates understand how Azure can be used to solve real-world business problems, making it an essential certification for anyone looking to work in the cloud computing industry.

## **Newest AZ-900 Learning Materials: Microsoft Azure Fundamentals Deliver Splendid Exam Braindumps**

A free demo of AZ-900 practice test questions and up to 1 year of free updates are also available at Actual4Labs. So, this is the time to download valid Microsoft AZ-900 exam questions and start studying. There is no room for delays in Microsoft Azure Fundamentals (AZ-900) preparation exams or second thoughts when you know that you have to survive the competition and safeguard your job.

## Microsoft Azure Fundamentals Sample Questions (Q81-Q86):

### NEW QUESTION # 81

This question requires that you evaluate the underlined text to determine if it is correct.

You have an Azure virtual network named VNET1 in a resource group named RG1.

You assign an Azure policy specifying that virtual networks are not an allowed resource type in RG1. VNET1 is deleted automatically.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. is now a read-only object
- B. No change is needed.
- C. continues to function normally
- D. is moved automatically to another resource group

**Answer: C**

Explanation:

Explanation

The VNet will be marked as 'Non-compliant' when the policy is assigned. However, it will not be deleted and will continue to function normally.

Azure Policy is a service in Azure that you use to create, assign, and manage policies. These policies enforce different rules and effects over your resources, so those resources stay compliant with your corporate standards and service level agreements.

If there are any existing resources that aren't compliant with a new policy assignment, they appear under Non-compliant resources.

<https://docs.microsoft.com/en-us/azure/governance/policy/assign-policy-portal>

### NEW QUESTION # 82

You plan to implement several security services for an Azure environment. You need to identify which Azure services must be used to meet the following security requirements:

- \* Monitor threats by using sensors
- \* Enforce Azure Multi-Factor Authentication (MFA) based on a condition

Which Azure service should you identify for each requirement? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Monitor threats by using sensors:

Azure Monitor
Azure Security Center
Azure Active Directory (Azure AD) Identity Protection
Azure Advanced Threat Protection (ATP)

Enforce Azure MFA based on a condition:

Azure Monitor
Azure Security Center
Azure Active Directory (Azure AD) Identity Protection
Azure Advanced Threat Protection (ATP)

**Answer:**

Explanation:

Monitor threats by using sensors:

Azure Monitor  
Azure Security Center  
Azure Active Directory (Azure AD) Identity Protection  
Azure Advanced Threat Protection (ATP)

Enforce Azure MFA based on a condition:

Azure Monitor  
Azure Security Center  
Azure Active Directory (Azure AD) Identity Protection  
Azure Advanced Threat Protection (ATP)

Explanation

Monitor threats by using sensors:

Azure Monitor  
Azure Security Center  
Azure Active Directory (Azure AD) Identity Protection  
Azure Advanced Threat Protection (ATP)

Enforce Azure MFA based on a condition:

Azure Monitor  
Azure Security Center  
Azure Active Directory (Azure AD) Identity Protection  
Azure Advanced Threat Protection (ATP)

Box 1:

To monitor threats by using sensors, you would use Azure Advanced Threat Protection (ATP).

Azure Advanced Threat Protection (ATP) is a cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.

Sensors are software packages you install on your servers to upload information to Azure ATP.

Box 2:

To enforce MFA based on a condition, you would use Azure Active Directory Identity Protection.

Azure AD Identity Protection helps you manage the roll-out of Azure Multi-Factor Authentication (MFA) registration by configuring a Conditional Access policy to require MFA registration no matter what modern authentication app you are signing in to.

**NEW QUESTION # 83**

Select the answer that correctly completes the sentence.

Answer Area

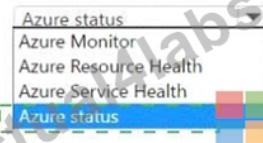

Azure status provides a health overview of Azure services and regions.

Azure Monitor  
Azure Resource Health  
Azure Service Health  
Azure status

**Answer:**

Explanation:

**Answer Area**

provides a health overview of Azure services and regions.

Microsoft

Explanation:

**Answer Area**

provides a health overview of Azure services and regions.

Microsoft

**NEW QUESTION # 84**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area****Statements**

Yes

No

Azure Advisor provides recommendations on how to improve the security of an Azure Active Directory (Azure AD) environment

Azure Advisor provides recommendations on how to reduce the cost of running Azure virtual machines.

Azure Advisor provides recommendations on how to configure the network settings on Azure virtual machines.

**Answer:**

Explanation:

## Answer Area

### Statements

Yes

No

Azure Advisor provides recommendations on how to improve the security of an Azure Active Directory (Azure AD) environment.

Azure Advisor provides recommendations on how to reduce the cost of running Azure virtual machines.

Azure Advisor provides recommendations on how to configure the network **settings** on Azure virtual machines.

### NEW QUESTION # 85

Match the term to the appropriate description.

To answer, drag the appropriate term from the column on the left to its description on the right. Each term may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

.....

Terms
authorization
multi-factor authentication (MFA)
single sign-on (SSO)

Answer Area

Term

The ability to use the same credentials to access multiple resources and applications from different

Term

The process of identifying the access level of a user or service.

Term

Requires several elements to identify a user or a service.

.....

### Answer:

Explanation:

Terms
authorization
multi-factor authentication (MFA)
single sign-on (SSO)

Answer Area

Term

The ability to use the same credentials to access multiple resources and applications from different

Term

The process of identifying the access level of a user or service.

Term

Requires several elements to identify a user or a service.

.....

Explanation

Answer Area
single sign-on (SSO)
authorization
multi-factor authentication (MFA)

Microsoft

single sign-on (SSO)

The ability to use the same credentials to access multiple resources and applications from different

authorization

The process of identifying the access level of a user or service.

multi-factor authentication (MFA)

Requires several elements to identify a user or a service.

### NEW QUESTION # 86

.....

As candidates who will attend the exam, some may be anxious about the coming exam, maybe both in the AZ-900 practice material and the mental state. We will provide you the AZ-900 practice material with high quality as well as the comfort in your mental. The AZ-900 Exam Dumps have the knowledge for the exam, and the stimulated AZ-900 soft test engine will be of great benefit to you through making you know the exam procedures.
