Dumpcollection has built customizable SAP C-S4CPR-2502 practice exams (desktop software & web-based) for our customers. Users can customize the time and C-S4CPR-2502 questions of SAP C-S4CPR-2502 Practice Tests according to their needs. You can give more than one test and track the progress of your previous attempts to improve your marks on the next try.

SAP C-S4CPR-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S • 4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.

Topic 2	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.
Topic 3	• Data Migration and Business Process Testing: This section of the exam measures skills of a SAP Data Migration Analyst and covers the tools and processes used to migrate legacy data into SAP S • 4HANA Cloud. It includes preparation, validation, execution of data loads, and conducting business process testing to ensure data accuracy and system readiness.
Topic 4	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.

There are more opportunities for possessing with a certification, and our C-S4CPR-2502 study tool is the greatest resource to get a leg up on your competition, and stage yourself for promotion. When it comes to our time-tested C-S4CPR-2502 latest practice dumps, for one thing, we have a professional team contains a lot of experts who have devoted themselves to the research and development of our C-S4CPR-2502 Exam Guide, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our C-S4CPR-2502 study tool has the ability to catch the core knowledge. So our customers can pass the exam with ease.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q68-Q73):

NEW QUESTION # 68

You want to inform purchasers automatically when an RFQ is close to the quotation deadline but only a low number of supplier quotations have been received. How can you notify purchasers easily in SAP S/4HANA Cloud Public Edition?

- A. By using the situation template in situation handling standard framework
- B. By developing an application using APIs to send notifications
- C. By creating new RFQs and sending with email
- D. By defining a workflow using flexible workflows

Answer: A

Explanation:

To notify purchasers automatically when an RFQ is close to the quotation deadline but only a few quotations have been received, the Situation Handling Framework in SAP S/4HANA Cloud Public Edition is the most efficient solution. Below is an explanation of the correct answer:

* By using the situation template in situation handling standard framework (A): The Situation Handling Framework allows you to configure predefined templates to monitor specific conditions, such as low response rates to RFQs. When the condition is met, the system automatically notifies relevant users.

* By defining a workflow using flexible workflows (B): While flexible workflows can be configured for notifications, they require more setup and are less suited for real-time monitoring compared to the Situation Handling Framework.

* By developing an application using APIs to send notifications (C): Developing a custom application is time-consuming and unnecessary when standard tools like the Situation Handling Framework are available.

* By creating new RFQs and sending with email (D): Manually creating new RFQs and sending emails is inefficient and does not address the need for automated notifications.

SAP Best Practices Explorer: RFQ Monitoring

NEW QUESTION # 69

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Guidance and simulation of the migration process
- B. Mapping source values to SAP S/4HANA target values
- C. Combining the local and remote schema approaches into one migration project
- D. Extensibility using the Legacy System Migration Workbench

Answer: A,B

NEW QUESTION # 70

What can you monitor from the Procurement Overview Page? Note: There are 3 correct answers to this question.

- A. Purchase order items
- B. Supplier confirmations
- C. Request for quotation items
- D. Supplier EDI messages
- E. Supplier down payments

Answer: A,B,C

Explanation:

The Procurement Overview Page in SAP S/4HANA Cloud Public Edition provides a centralized dashboard to monitor key procurement activities. Below is an explanation of the correct answers:

* Request for quotation items (A): The overview page allows users to track request for quotation (RFQ) items, ensuring timely responses from suppliers and efficient sourcing processes.

* Supplier confirmations (B): Supplier confirmations, such as order acknowledgments or shipping notifications, can be monitored to ensure alignment between purchase orders and supplier actions.

* Purchase order items (D): Purchase order items are displayed on the overview page to track their status, including delivery schedules, confirmations, and invoices.

* Supplier EDI messages (E): While EDI messages are part of procurement integration, they are not directly monitored on the Procurement Overview Page.

* Supplier down payments (E): Down payments are managed in financial processes and are not typically monitored on the Procurement Overview Page.

NEW QUESTION # 71

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user. How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the business catalogues assigned to the role.
- B. Check the business role template.
- C. Check the Role Maintenance app.
- D. Check the restrictions for the role.
- E. Check the space and page(s) assigned to the role.

Answer: A,D,E

Explanation:

If an SAP Fiori app is not displaying on the SAP Fiori Launchpad despite the user having the correct business role, the issue could stem from several configuration areas. Here's how to troubleshoot:

* Check the business catalogues assigned to the role (A): Business catalogues group apps into logical sets. Ensure that the business role assigned to the user includes the catalogue containing the missing app.

* Check the restrictions for the role (B): Restrictions such as organizational assignments or field-level constraints might prevent the app from being visible. Verify that no such restrictions are applied to the role.

* Check the space and page(s) assigned to the role (C): Spaces and pages define the layout of the SAP Fiori Launchpad. Ensure

that the app is assigned to the correct space and page within the role configuration.

* Check the Role Maintenance app (D): While the Role Maintenance app is useful for managing roles, it does not directly address visibility issues related to spaces, pages, or catalogues.

* Check the business role template (E): Business role templates serve as a starting point for creating roles but do not directly impact app visibility once the role is assigned.
