Private Edition - Transportation Management (C-S4TM-2023) exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the SAP C-S4TM-2023 Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of SAP certified professional community.

SAP C-S4TM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Charge Calculation & Freight Settlement: Setup, integration, and cost distribution are the key sub-topics here. This topic also covers freight contracts and strategic procurement and selling.
Topic 2	• Managing Clean Core: This topic discusses the evaluation and application of clean core principles to maximize agility, reduce effort, and accelerate innovation in ERP systems.
Topic 3	• SAP Transportation Management Overview and Fundamentals: This topic covers the general processes and functional areas of SAP Transportation Management, including external and embedded systems. It also discusses transportation tasks and their management.
Topic 4	• Master Data: Master data definition, including logistical and financial data, is essential for effective transportation management and is covered here.
Topic 5	• Transportation Management for Logistics Service Provider (LSP): This topic focuses on order management and transportation processes specific to LSPs, including forwarding orders.
Topic 6	• Freight Order Management: Carrier selection, tendering, freight documents, and integrations are covered here. This topic also includes communication with external and internal parties, a key aspect of freight order management.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q62-Q67):

NEW QUESTION # 62

On which of the following documents can you calculate profitability?

- A. Forwarding order
- B. Freight unit
- C. Forwarding quotation
- D. Freight order

Answer: A

NEW QUESTION # 63

You want to configure a scenario in which a single trailer will be hauled by more than one truck. Which of the following must you customize? Note: There are 2 correct answers to this question.

- A. Transportation unit type
- B. Freight booking type
- C. Forwarding order type
- D. Freight order type

Answer: A,D

Explanation:

To configure a scenario in SAP S/4HANA Transportation Management where a single trailer is hauled by multiple trucks (e.g., in a multi-leg transport), specific customizations are required:

* Transportation unit type (A): According to the SAP documentation, the transportation unit type must be configured to allow a trailer to be defined as a separate entity that can be attached to different trucks during various stages of transport. This ensures the

trailer is treated as a distinct resource.

* Freight order type (D): The freight order type must be customized to support multi-leg scenarios, including settings for stage-specific assignments of trucks to the same trailer, enabling the system to manage the trailer across multiple freight orders.

The other options are incorrect:

* Forwarding order type (B) is used for logistics service provider scenarios and does not directly manage trailer-truck assignments.

* Freight booking type (C) is relevant for ocean or air transport, not for road-based multi-truck scenarios.

SAP S/4HANA Cloud Private Edition, Transportation Management Study Guide: Unit 3 - Transportation Planning, Section on Multi-Leg Transport Configuration.

SAP Help Portal: Transportation Management - Transportation Unit and Freight Order Types ().

NEW QUESTION # 64

Which of the following resources can be used to represent a capacity? Note: There are 2 correct answers to this question.

- A. Transportation unit resource
- B. Calendar resource
- C. Equipment types
- D. Handling resource

Answer: A,D

Explanation:

In SAP S/4HANA Transportation Management, resources represent assets used in transportation, and some can define capacity for planning purposes. According to the SAP documentation:

* Transportation unit resource (A): Represents vehicles or trailers and includes capacity attributes (e.g., weight, volume) used in planning to ensure goods fit within the resource's limits.

* Handling resource (D): Represents equipment like forklifts or cranes, which can have capacity definitions (e.g., handling capacity) for warehouse or loading activities.

The other options are incorrect:

* Calendar resource (B) defines availability schedules but does not represent physical capacity.

* Equipment types (C) categorize equipment but do not directly define capacity, which is set in specific resources.

NEW QUESTION # 65

You add an assessorial charge to a freight order after the freight settlement document (FSD) has been posted and accruals have been booked in materials management. The background report to create FSDs determines change strategy "Reverse and Repost with new FSD" for this freight order. What will you see in transportation management and materials management? Note: There are 2 correct answers to this question.

- A. 1 purchase order in materials management
- B. 3 service entry sheets in materials management
- C. 2 FSDs and 1 credit memo in transportation management
- D. 3 FSDs in transportation management

Answer: C,D

Explanation:

When an assessorial charge is added to a freight order after the initial freight settlement document (FSD) is posted, and the change strategy is set to "Reverse and Repost with new FSD," the system handles the update as follows, according to SAP documentation:

* 2 FSDs and 1 credit memo in transportation management (B): The original FSD is reversed with a credit memo, and a new FSD is created to include the assessorial charge, resulting in two FSDs (the original and the new) and one credit memo.

* 3 FSDs in transportation management (C): This includes the original FSD, the credit memo (counted as a separate document in some configurations), and the new FSD with the updated charges.

The other options are incorrect:

* 1 purchase order in materials management (A) is not guaranteed, as the number of purchase orders depends on the original setup and may not change with the FSD update.

* 3 service entry sheets in materials management (D) is unlikely, as typically one service entry sheet is updated or replaced, not multiplied, during the reversal and reposting process.

NEW QUESTION # 66

You are a consultant on an SAP S/4HANA Cloud Greenfield project.

Which of the following aspects should you focus on to achieve and maintain clean core data quality?

Note: There are 2 correct answers to this question.

- A. Timeliness
- B. Stability
- C. Efficiency
- D. Accuracy

Answer: B,C

Explanation:

Managing Clean Core
