NEW QUESTION # 30

Which entities share data with Business Partners in the S/4HANA Business User Concept? Note: There are 2 correct answers to

this question.

- A. Administrator
- B. Employee
- C. User
- D. Employer

Answer: B,C

Explanation:

In the SAP S/4HANA Business User Concept, the entities that share data with Business Partners are User and Employee. The User entity represents the technical user account in the system, defined in user master records, and is linked to Business Partners to associate system access with business roles and authorizations. The Employee entity represents the human resource data of an individual, such as their organizational assignment or job role, and is synchronized with Business Partners to ensure that user access aligns with their employment details. This integration ensures that Business Partners, which serve as a central entity for managing business relationships, have consistent data for access control and business processes. The Employer entity is not directly linked to Business Partners, as it represents the organization, not an individual.

Similarly, Administrator is a role or user type, not an entity sharing data with Business Partners. This data-sharing mechanism supports seamless identity and access management, enhancing security and operational alignment in SAP S/4HANA systems.

NEW QUESTION # 31

Where can you find information on the SAP-delivered default authorization object and value assignments?

Note: There are 2 correct answers to this question.

- A. SU24
- B. USOBT
- C. SU22

Answer: B,C

NEW QUESTION # 32

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2 correct answers to this question.

- A. Change logs
- B. Usage logs
- C. Troubleshooting logs
- D. Performance logs

Answer: A,B

NEW QUESTION # 33

Which user type in SAP S/4HANA Cloud Public Edition is used for API access, system integration, and scenarios where automated data exchange is required?

- A. SAP Technical User
- B. SAP Communication User
- C. SAP Administrative User
- D. SAP Support User

Answer: B

Explanation:

In SAP S/4HANA Cloud Public Edition, the SAP Communication User is specifically designed for API access, system integration, and scenarios requiring automated data exchange. This user type is utilized for machine-to-machine communication, such as integrating SAP systems with external applications or services via APIs, ensuring seamless and secure data flows without human intervention. Unlike SAP Administrative Users, who focus on system management tasks, or SAP Support Users, who are used for

troubleshooting and support activities, the Communication User is optimized for programmatic access. The SAP Technical User, while sometimes used in on-premise systems, is not the standard term in SAP S/4HANA Cloud Public Edition for this purpose. The Communication User's role ensures that automated processes, such as data synchronization or third-party integrations, are executed efficiently while maintaining strict security controls and auditability.
