Reliable C_AIG_2412 Test Cram, C_AIG_2412 Online Exam

Our C_AIG_2412 learning guide boosts many advantages and it is your best choice to prepare for the test. Firstly, our C_AIG_2412 training prep is compiled by our first-rate expert team and linked closely with the real exam. So that if you practice with our C_AIG_2412 Exam Questions, then you will pass for sure. Secondly, our C_AIG_2412 study materials provide 3 versions and multiple functions to make the learners have no learning obstacles. They are the PDF, Software and APP online.

SAP C_AIG_2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 2	• Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.
Topic 3	• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.
Topic 4	• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.

C_AIG_2412 Online Exam, Latest Test C_AIG_2412 Simulations

Three formats of SAP C_AIG_2412 practice material are always getting updated according to the content of real SAP C_AIG_2412 examination. The 24/7 customer service system is always available for our customers which can solve their queries and help them if they face any issues while using the C_AIG_2412 Exam product. Besides regular updates, ActualTestsQuiz also offer up to 1 year of free real SAP Certified Associate - SAP Generative AI Developer (C_AIG_2412) exam questions updates.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q51-Q56):

NEW QUESTION # 51
What are some features of Joule?
Note: There are 3 correct answers to this question.

- A. Streamlining tasks with an Al assistant that knows your unique role.
- B. Maintaining data privacy while offering generative Al capabilities.
- C. Generating standalone applications.
- D. Downloading and processing data.
- E. Providing coding assistance and content generation.

Answer: A,B,E

NEW QUESTION # 52
What capabilities does the Exploration and Development feature of the generative Al hub provide?
Note: There are 2 correct answers to this question.

- A. Automatic model selection
- B. Al playground and chat
- C. Prompt editor and management
- D. Develop and debug ABAP code

Answer: B,C

NEW QUESTION # 53
Which of the following are grounding principles included in SAP's AI Ethics framework? Note: There are 3 correct answers to this question.

- A. Avoid bias and discrimination
- B. Maximize business profits
- C. Transparency and explainability
- D. Store all user data for legal proceedings
- E. Human agency and oversight

Answer: A,C,E

NEW QUESTION # 54
What is the primary function of the embedding model in a RAG system?

- A. To encode queries and documents into vector representations for comparison
- B. To generate responses based on retrieved documents and user queries
- C. To evaluate the faithfulness and relevance of generated answers
- D. To store vector representations of documents and search for relevant passages

Answer: A

NEW QUESTION # 55

You want to use the orchestration service through SAP's generative-Al-hub-sdk. What does the following code do?
from gen_ai_hub.orchestration.models.11m import LLM 11m =
LLM(name="gpt-40", version="latest", parameters={"max_tokens": 256, "temperature": 0.2})

- **A. Define the LLM**
- B. Define the Template and Default Input Values
- C. Run the Orchestration Request
- D. Create the Orchestration Configuration

Answer: A

Explanation:
The provided code snippet defines a Large Language Model (LLM) within the SAP Generative AI Hub SDK's orchestration service:
from gen_ai_hub.orchestration.models.llm import LLM
llm = LLM(name="gpt-40", version="latest", parameters={"max_tokens": 256, "temperature": 0.2})
1. Importing the LLM Class:
* Code:from gen_ai_hub.orchestration.models.llm import LLM
* Purpose:Imports the LLM class from the SDK, enabling the creation of an LLM instance.
2. Defining the LLM Instance:
* Code:llm = LLM(name="gpt-40", version="latest", parameters={"max_tokens": 256, "temperature":
0.2})
* Parameters:
* name:Specifies the model's name, in this case, "gpt-40".
* version:Indicates the model version, set to "latest" to use the most recent version.
* parameters:A dictionary defining model-specific parameters:
* max_tokens:Sets the maximum number of tokens (words or word pieces) the model can generate, here limited to 256 tokens.
* temperature:Controls the randomness of the output; a lower value like 0.2 results in more deterministic responses.
3. Role in Orchestration Pipeline:
* Function:This definition is a crucial step in the orchestration pipeline, specifying which LLM to use and configuring its behavior for subsequent tasks.
Conclusion:
The code snippet defines an LLM named "gpt-40" with specific parameters, preparing it for integration into an AI-driven workflow within SAP's Generative AI Hub.

NEW QUESTION # 56

......

Convenience of the online version of our C_AIG_2412 study materials is mainly reflected in the following aspects: on the one hand, the online version is not limited to any equipment. You are going to find the online version of our C_AIG_2412 exam prep applies to all electronic equipment, including telephone, computer and so on. On the other hand, if you decide to use the online version of our C_AIG_2412 Study Materials, you don't need to worry about no network.
