Up to now, more than 98 percent of buyers of our C_S4CPR_2502 latest dumps have passed it successfully. Up to now they can be classified into three versions: the PDF, the software and the app version. So we give emphasis on your goals, and higher quality of our C_S4CPR_2502 test guide.

SAP C_S4CPR_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Migration and Business Process Testing: This section of the exam measures skills of a SAP Data Migration Analyst and covers the tools and processes used to migrate legacy data into SAP S • 4HANA Cloud. It includes preparation, validation, execution of data loads, and conducting business process testing to ensure data accuracy and system readiness.

Topic 2	• Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of a Cloud ERP Consultant and covers foundational knowledge of cloud computing and SAP S • 4HANA Cloud deployment options. It provides insights into multi-tenant vs single-tenant models and helps determine the best fit for customer requirements.
Topic 3	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.
Topic 4	• Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of a SAP Project Manager and covers the methodology for successful cloud implementation projects. It includes adopting a cloud mindset, assembling the right project team, and conducting fit-to-standard workshops to ensure efficient and value-driven implementations.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q23-Q28):

NEW QUESTION # 23

Where do you find industry cloud solutions to address a customer's unique requirement?

- A. SAP Business Technology Platform
- B. SAP Discovery Center
- C. SAP Store
- D. SAP Signavio Process Navigator

Answer: B

NEW QUESTION # 24

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Assign a different business role that provides access.
- B. Create a page and assign it to the launchpad space.
- C. Assign a launchpad space to the business role.
- D. Use the search function to find the app.

Answer: D

Explanation:

If an end user has been granted access to only one specific application but the app does not appear on their launchpad, they can use the search function in the SAP Fiori launchpad to locate the app. This is a common troubleshooting step when apps are not visible due to configuration issues or missing assignments.

* Use the search function to find the app (Option C): The SAP Fiori launchpad includes a search bar that allows users to search for

apps by name or description. Even if an app is not pinned to the launchpad or assigned to a page, it can still be accessed through the search function if the user has the necessary permissions. The SAP Fiori Launchpad User Guide confirms this functionality.

* A. Assign a launchpad space to the business role: Assigning a launchpad space is an administrative task and cannot be performed by the end user. Only administrators with the appropriate permissions can make this change.

* B. Create a page and assign it to the launchpad space: Creating a page and assigning it to a launchpad space is also an administrative task and cannot be done by the end user.

* D. Assign a different business role that provides access: Assigning business roles is an administrative task and cannot be performed by the end user.

* SAP Fiori Launchpad User Guide: Explains how to use the search function to locate apps in the SAP Fiori launchpad. <https://help.sap.com>

* SAP Role-Based Access Control Guide: Provides details on how business roles and launchpad spaces are configured.

Why Option C is Correct: Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 25

You want to inform purchasers automatically when an RFQ is close to the quotation deadline but only a low number of supplier quotations have been received. How can you notify purchasers easily in SAP S/4HANA Cloud Public Edition?

- A. By using the situation template in situation handling standard framework
- B. By defining a workflow using flexible workflows
- C. By creating new RFQs and sending with email
- D. By developing an application using APIs to send notifications

Answer: A

NEW QUESTION # 26

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user. How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the Role Maintenance app.
- B. Check the space and page(s) assigned to the role.
- C. Check the business catalogues assigned to the role.
- D. Check the business role template.
- E. Check the restrictions for the role.

Answer: A,C,E

NEW QUESTION # 27

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer?

Note: There are 3 correct answers to this question.

- A. Test system
- B. Trial system
- C. Development system
- D. Sandbox system
- E. Starter system

Answer: A,C,E

Explanation:

In the implementation of SAP S/4HANA Cloud Public Edition, specific systems are utilized to ensure a structured and successful deployment process. These systems are part of the SAP lifecycle management approach and serve distinct purposes during the implementation. Below is an explanation of the correct answers:

* Test System (A): The test system is used for quality assurance and user acceptance testing (UAT). It allows customers to validate configurations, customizations, and integrations in an environment that mirrors the production system. Testing ensures that all business processes function as expected before going live.

* **Development System (C): The development system is where configuration, customization, and extension activities are performed. This system is used by developers and key users to build and adapt the solution to meet the customer's specific business

requirements. It serves as the foundation for implementing new functionalities and integrating with other systems.

* Starter System (D): The starter system is a preconfigured system provided by SAP during the initial phases of implementation. It contains standard business processes and best practices tailored to the customer's industry. The starter system helps accelerate the implementation process by providing a baseline configuration that can be further customized.

* Trial System (B): A trial system is typically used for demonstration or evaluation purposes, allowing potential customers to explore the capabilities of SAP S/4HANA Cloud Public Edition. However, it is not part of the formal implementation process for a customer.

* Sandbox System (E): A sandbox system is an optional environment provided for experimentation and learning purposes. It allows users to explore the system without impacting the actual implementation.

While useful for training and testing ideas, it is not a mandatory system in the implementation lifecycle.
