There is an irreplaceable trend that an increasingly amount of clients are picking up C_S4TM_2023 study materials from tremendous practice materials in the market. There are unconquerable obstacles ahead of us if you get help from our C_S4TM_2023 Exam Questions. So many exam candidates feel privileged to have our C_S4TM_2023 practice braindumps. And our website is truly very famous for the hot hit in the market and easy to be found on the internet.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q54-Q59):

NEW QUESTION # 54

What is created manually in SAP TM and assigned to the shipping point location? Please choose the correct answer.

- A. Data receivers are networked without integration gaps.
- **B. The business partner for the shipping point**
- C. Connecting existing manufacturing control systems

Answer: B

NEW QUESTION # 55

You have implemented a side-by-side scenario of SAP Transportation Management and SAP S/4HANA. Which of the following statements apply to the organizational units in SAP Transportation Management?

Note: There are 2 correct answers to this question.

- A. Organizational units are not mandatory
- **B. Organizational units can be maintained independently of organizational units in SAP S/4HANA**
- C. The hierarchical relationship of organizational units is not fixed
- **D. Organizational units can be determined automatically based on conditions**

Answer: B,D

NEW QUESTION # 56

You are using direct shipment options. How can you determine the freight order type when you are converting a freight unit to a freight order? Note: There are 2 correct answers to this question.

- **A. Based on the freight order type defined in the freight unit type**
- B. Based on the freight order type in the freight unit building rule
- **C. Based on the default freight order type**
- D. Based on the freight order type maintained in a condition in the planning profile

Answer: A,C

Explanation:

In SAP S/4HANA Transportation Management, when using direct shipment options to convert a freight unit to a freight order, the freight order type is determined as follows:

* Based on the default freight order type (B): According to the SAP documentation, a default freight order type can be defined in the system configuration (e.g., in Customizing for the transportation planning profile or freight order type settings). This default type is used when no specific rule or condition overrides it during the conversion process.

* Based on the freight order type defined in the freight unit type (C): The freight unit type, configured in Customizing, can specify a default freight order type to be used when the freight unit is converted to a freight order, ensuring consistency with the transportation

requirements of the freight unit.

The other options are incorrect:

* Based on the freight order type in the freight unit building rule (A): Freight unit building rules determine how freight units are created (e.g., consolidation logic) but do not directly specify the freight order type for conversion.

* Based on the freight order type maintained in a condition in the planning profile (D): While conditions in the planning profile can influence planning decisions, they are not typically used to determine the freight order type during direct shipment conversion.

NEW QUESTION # 57

What is a logical or physical place in which resources are managed on a quantity basis? Please choose the correct answer.

- A. SAP ERP integration
- **B. A location**
- C. Leverage seamless
- D. Ultimate goal

Answer: B

NEW QUESTION # 58

In the logistics integration profile, the Incoterm location stage building is set to "Source location to Incoterm location- type 1". You create a sales order in which you have specified an Incoterm and Incoterm location. What will be the result of these settings?

- A. One stage created: An active stage from the Incoterm location to the destination location
- B. One stage created: An active stage from the source location to the Incoterm location is created
- **C. Two stages created: An active stage from the source location to the Incoterm location, and an additional non-planning-relevant stage from the Incoterm location to the destination location is created**
- D. Two stages created: An active stage from the Incoterm location to the destination location, and an additional non-planning-relevant stage from the source location to the Incoterm location

Answer: C

NEW QUESTION # 59
