The GAQM CASPO-001 exam questions simulate the actual exam pattern, allowing you to pass the Certified Agile Scrum Product Owner (CASPO) certification exam the first time.

# GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q36-Q41):

# **NEW QUESTION #36**

True or False: Management does not have a role within Scrum.

• B. True

#### Answer: A

#### Explanation:

Management has a role in supporting Scrum, though not within the Scrum Team. The Scrum Guidenotes:

"Scrum Teams are cross-functional, meaning the members have all the skills necessary to create value each Sprint. They are also self-managing... Various practices exist to forecast progress, like burn-downs, burn-ups, or cumulative flows." Management provides resources, removes impediments, and sets organizational context, but doesn't manage the team directly.

\* A:False-management supports externally.

#### **NEW QUESTION #37**

True or False: Scrum is a methodology that tells in detail how to build software incrementally.

- A False
- B. True

#### Answer: A

#### Explanation:

The Scrum Guidedefines Scrum as "a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems." It provides roles, events, and artifacts but intentionally avoids prescribing detailed "how-to" processes for building software (e.g., coding practices, tools). This distinguishes it from a methodology, which offers specific steps. Scrum focuses on "what" (e.g., deliver an Increment) and leaves "how" to the team's discretion, making the statement false. Thus, B is correct.

#### **NEW QUESTION #38**

What is the Product Owner accountable for in Scrum? (Choose the best answer)

- A. Writing the User Stories so they are understandable to stakeholders
- B. Refining the top-level Product Backlog items until they are ready to be handed over to the Developers
- C. Describing an Increment at the Sprint Planning and making sure that the Developers deliver it by the end of the Sprint
- D. Creating and sustaining a Product Backlog that maximizes value and represents the needs of the stakeholders

#### Answer: D

#### Explanation:

The Product Owner's core accountability is maximizing value through the Product Backlog. The Scrum Guide states: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team." Option B encapsulates this fully.

- \* A:The Developers deliver the Increment; the Product Owner doesn't ensure it.
- \* C:Refinement is part of management, but not the sole accountability.

## **NEW QUESTION #39**

How can a Product Owner use time-boxed Sprints to obtain feedback from users and the market? (Choose the best answer)

- A. At the end of each Sprint, a detailed report with all test cases and test results is available.
- B. By making sure a Sprint does not stop until all testing is done, and the work is verified by the Product Owner.
- C. A business analyst represents the Product Owner to make decisions on his behalf during the Sprint. This way the Product Owner can accept the work at the Sprint Review without further involvement.
- D. Through the assurance that a Developers finishes all work on the Sprint Backlog.
- E. Through frequent delivery of Increments of the product into the market.

### Answer: E

#### Explanation:

Time-boxed Sprints in Scrum enable rapid feedback loops by delivering usable Incrementsregularly. The Scrum Guideemphasizes: "Sprints are the heartbeat of Scrum, where ideas are turned into value." Option B aligns with this-frequent releases to the market

allow the Product Owner to gather real user and market feedback, validating assumptions and adjusting the Product Backlog.

- \* A:Finishing Sprint Backlog work is internal; it doesn't guarantee market feedback.
- \* C:Delaying Sprint end for testing contradicts the fixed time-box and "Done" requirement within the Sprint.
- \* D:Reports are informational, not direct market feedback.

#### **NEW QUESTION #40**

Who updates work remaining during the Sprint? (Choose the best answer)

- A. Developers
- B. Senior Executives
- C. Product Owner
- D. Scrum Master

#### Answer: A

#### Explanation:

The Developers own the Sprint Backlog and update it as work progresses. The Scrum Guidestates: "The Sprint Backlog is a plan by and for the Developers... As new work is required, the Developers add it to the Sprint Backlog. As work is performed or completed, the estimated remaining work is updated."

- \* A:The Scrum Master facilitates, not updates.
- \* B:Correct-the Developers manage it.

### **NEW QUESTION #41**

....

The web-based CASPO-001 practice test frees you from the need for software installation. It is compatible with all operating systems.
