

Reliable Cisco 300-730 Test Online, 300-730 Test Prep

P.S. Free & New 300-730 dumps are available on Google Drive shared by TestsDumps: https://drive.google.com/open?id=17ZwIntGx7LPPs5okbk9NttWHnrL_X4A2

Our company TestsDumps is glad to provide customers with authoritative study platform. Our 300-730 quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question on our 300-730 exam questions, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our 300-730 Quiz torrent, you will have the chance to enjoy the authoritative study platform provided by our company.

Cisco 300-730 (Implementing Secure Solutions with Virtual Private Networks) exam is a certification exam designed for IT professionals who wish to demonstrate their knowledge and skills in implementing secure solutions using virtual private networks (VPNs). 300-730 exam is part of the Cisco Certified Network Professional (CCNP) Security certification program, which validates the expertise of IT professionals in securing networks, devices, and applications.

Cisco 300-730 certification exam covers a wide range of topics, including VPN technologies, Cisco Secure VPN solutions, remote access VPN, site-to-site VPN, clientless SSL VPN, AnyConnect SSL VPN, and FlexVPN. Candidates are expected to have a deep understanding of these topics and possess the skills required to implement these solutions in real-world scenarios. Implementing Secure Solutions with Virtual Private Networks certification exam is ideal for individuals who want to demonstrate their expertise in VPN technologies and Cisco VPN solutions and advance their careers as network security professionals.

Cisco 300-730 Test Prep - Valid Study 300-730 Questions

To address the problems of Implementing Secure Solutions with Virtual Private Networks (300-730) exam candidates who are busy, TestsDumps has made the Implementing Secure Solutions with Virtual Private Networks (300-730) dumps PDF format of real Implementing Secure Solutions with Virtual Private Networks (300-730) exam questions. This format's feature to run on all smart devices saves your time. Because of this, the portability of Implementing Secure Solutions with Virtual Private Networks (300-730) dumps PDF aids in your preparation regardless of place and time restrictions.

Cisco Implementing Secure Solutions with Virtual Private Networks Sample Questions (Q218-Q223):

NEW QUESTION # 218

The corporate network security policy requires that all internet and network traffic must be tunneled to the corporate office. Remote workers have been provided with printers to use locally at home while they are remotely connected to the corporate network. Which two steps must be executed to allow printing to the local printers? (Choose two.)

- A. Add a persistent static route in the client OS for the local LAN network.
- **B. Configure the split-tunnel-policy on the Cisco ASA to excludespecified.**
- C. Configure the split-tunnel-policy on the Cisco ASA to tunnelall.
- D. Configure the split-tunnel-policy on the Cisco ASA to tunnelspecified.

- E. Check the Allow Local LAN access checkbox in the Cisco AnyConnect client.

Answer: B,E

NEW QUESTION # 219

Refer to the exhibit. Which type of VPN implementation is displayed?

```
hostname RouterA
interface GigabitEthernet 0/0/0
ip address 10.0.0.1 255.255.255.0
standby 1 priority 110
standby ikev1-cluster
end

crypto ikev2 cluster
standby-group ikev1-cluster
slave max-session 500
port 2000
no shutdown

crypto ikev2 redirect gateway init
```

- A. IKEv2 reconnect
- B. IKEv2 backup gateway
- C. IKEv2 load balancer
- D. IKEv1 cluster

Answer: C

Explanation:

https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_conn_ike2vpn/configuration/xr-16-10/sec-flex-vpn-xr-16-10-book/sec-cfg-clb-supp.html

NEW QUESTION # 220

Refer to the exhibit. A company has been using SAML to authenticate their clientless SSLVPN users. After about a year of uptime in production, users begin to experience issues authenticating. Based on the collected debugs, which action resolves the issue?

```
Sep 05 23:59:00 [SAML] NotBefore:2020-09-05T23:59:01.896Z NotOnOrAfter:2020-09-06T00:59:01.896Z timeout: 0
Sep 05 23:59:00 [SAML] consume assertion: assertion is expired or not valid
```

- A. Replace the expired IdP signing certificate with a valid one.
- B. Verify that the IdP is using the SAML-attribute NameID.
- C. Ensure that the ASA and IdP are synchronized to a NTP server.
- D. Increase the SAML Request Timeout value on the ASA.

Answer: C

NEW QUESTION # 221

Which configuration construct must be used in a FlexVPN tunnel?

- A. IKEv2 profile
- B. IKEv1 policy
- C. EAP configuration
- D. multipoint GRE tunnel interface

Answer: A

Explanation:

The correct answer is D.

IKEv2 profile. A FlexVPN tunnel requires an IKEv2 profile to define the parameters for the IKEv2 negotiation and the IPsec security association. The IKEv2 profile references the IKEv2 keyring, the authentication method, the identity of the peers, and other options. The IKEv2 profile is then applied to a virtual tunnel interface (VTI) or a dynamic virtual tunnel interface (DVTI) to protect the tunnel with IPsec12. An EAP configuration is used for authentication with Extensible Authentication Protocol (EAP), which is optional for FlexVPN3. A multipoint GRE tunnel interface is used for DMVPN, not FlexVPN. An IKEv1 policy is used for IKEv1, not IKEv2, which is the protocol for FlexVPN.

NEW QUESTION # 222

Refer to the exhibit.

```
tunnel-group IKEV2 type remote-access
tunnel-group IKEV2 general-attributes
  address-pool split
  default-group-policy GroupPolicy1
tunnel-group IKEV2 webvpn-attributes
  group-alias ikev2 enable
```

```
-<HostEntry>
<HostName>ikev2</HostName>
<HostAddress>10.106.45.221</HostAddress>
<UserGroup>ikev2</UserGroup>
<PrimaryProtocol>IPsec</PrimaryProtocol>
</HostEntry>
```

The customer can establish a Cisco AnyConnect connection without using an XML profile. When the host "ikev2" is selected in the AnyConnect drop down, the connection fails. What is the cause of this issue?

- A. The IP address is incorrect.
- B. The HostName is incorrect.
- C. Primary protocol should be SSL.
- D. UserGroup must match connection profile.

Answer: D
