Cloud-Deployment-and-Operations Learning Materials | Test Cloud-Deployment-and-Operations Dumps

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is like picking up apples, employers can decide whether candidates are qualified by the Cloud-Deployment-and-Operations appearances, or in other words, candidates' educational background and relating Cloud-Deployment-and-Operations professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged Cloud-Deployment-and-Operations Certification, can they

become popular employees. So for you, the Cloud-Deployment-and-Operations latest braindumps compiled by our company can offer you the best help.

WGU Cloud Deployment and Operations Sample Questions (Q15-Q20):

NEW QUESTION # 15

(Which type of support plan provides a technical account manager and full use of Trusted Advisor?)

- A. Business
- **B. Enterprise**
- C. Developer
- D. Standard

Answer: B

Explanation:

The Enterprise support plan provides a technical account manager (TAM) and full use of Trusted Advisor, offering proactive guidance and comprehensive access to all checks. This plan is designed for large-scale, mission-critical workloads. The WGU Cloud Deployment and Operations Study Guide (Section 6.4, AWS Support Plans) states, "The Enterprise support plan includes a dedicated Technical Account Manager and full Trusted Advisor access, providing 24/7 support and proactive optimization recommendations." Developer, Standard, and Business plans offer limited or no TAM support and partial Trusted Advisor access.

NEW QUESTION # 16

(A company manages a containerized application by manually deploying AWS compute instances. Which solution should be used to optimize the cost of the application?)

- A. RDS
- B. Aurora
- C. EFS
- **D. Fargate**

Answer: D

Explanation:

AWS Fargate should be used to optimize the cost of a containerized application by eliminating the need for manual instance management, as it provides serverless container orchestration that automatically scales and charges only for resource usage. The WGU Cloud Deployment and Operations Study Guide (Section 7.5, Fargate) states, "Fargate optimizes costs for containerized applications by removing the overhead of managing EC2 instances, scaling automatically, and billing based on vCPU and memory usage, reducing manual deployment expenses." Aurora, RDS, and EFS are database or storage solutions not designed for container cost optimization.

NEW QUESTION # 17

(Which action must be used to create a metric filter in the Amazon CloudWatch console?)

- A. Specify a stream
- B. Define a trace
- C. Enable an alarm
- **D. Select a log group**

Answer: D

Explanation:

To create a metric filter in the Amazon CloudWatch console, the first step is to select a log group from which the log data will be analyzed. A log group contains log streams, and metric filters are applied to the log data within these groups to extract metrics based on patterns. The WGU Cloud Deployment and Operations Study Guide (Section 4.2, CloudWatch Logs) specifies that the process begins by navigating to the CloudWatch console, selecting a log group, and then defining the filter pattern. Actions like enabling an alarm, defining a trace, or specifying a stream are subsequent or unrelated steps.

NEW QUESTION # 18

(Which solution is used to protect a server from Layer 7 attacks?)

- A. KMS key rotation
- B. CloudWatch
- **C. WAF**
- D. Shield

Answer: C

Explanation:

AWS WAF (Web Application Firewall) is used to protect a server from Layer 7 (application layer) attacks, such as SQL injection or cross-site scripting, by filtering HTTP/HTTPS traffic based on defined rules. The WGU Cloud Deployment and Operations Study Guide (Section 6.2, AWS WAF) states, "WAF protects web applications at Layer 7 by inspecting and blocking malicious requests, such as those involving SQL injection or XSS, when integrated with ALB or CloudFront." Shield protects against DDoS (Layer 3/4), CloudWatch monitors metrics, and KMS key rotation manages encryption, none of which address Layer 7 attacks.

NEW QUESTION # 19

(An administrator is unable to make an AMI public. What is the cause?)

- A. Bookmark is absent
- B. Paravirtual virtualization is used
- C. Legacy BIOS boot mode is used
- **D. Boot volume is encrypted**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The inability to make an AMI public is caused by an encrypted boot volume. AWS does not allow AMIs with encrypted EBS snapshots to be shared publicly due to security constraints; sharing is limited to specific AWS accounts. The WGU Cloud Deployment and Operations Study Guide (Section 6.3, AMI Management) states, "An AMI cannot be made public if its boot volume is encrypted; encryption restricts sharing to authorized accounts only, requiring decryption keys to be managed separately." Legacy BIOS, paravirtual virtualization, and the absence of a bookmark do not impact AMI sharing.

NEW QUESTION # 20

.....

Our excellent Cloud-Deployment-and-Operations practice materials beckon exam candidates around the world with their attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our Cloud-Deployment-and-Operations actual exam is the best. Our effort in building the content of our Cloud-Deployment-and-Operations study dumps lead to the development of Cloud-Deployment-and-Operations learning guide and strengthen their perfection. And the price of our exam prep is quite favourable!

Cloud-Deployment-and-Operations Learning Materials: <https://www.validvce.com/Cloud-Deployment-and-Operations-exam-collection.html>

WGU Cloud-Deployment-and-Operations Learning Materials is one of the most powerful and rapidly growing fields nowadays, If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our Cloud-Deployment-and-Operations study materials as your study tool, our product will lend you a good helping hand, With experienced experts to edit and verify, Cloud-Deployment-and-Operations exam dumps are high quality and accuracy.

Their object was to make a little money on each trade, not Test Cloud-Deployment-and-Operations Dumps swing for the fence, If the current tool size is big enough, click the center of the eye to use the current size.
