

Reliable CMMC-CCP Exam Experience & Perfect Cyber AB Certification Training - The Best Cyber AB Certified CMMC Professional (CCP) Exam

P.S. Free & New CMMC-CCP dumps are available on Google Drive shared by PrepAwayPDF: https://drive.google.com/open?id=1LKaxJ_V7PKPAfkC2woF_Ezylffycp_ew

It is known to us that more and more companies start to pay high attention to the CMMC-CCP certification of the candidates. Because these leaders of company have difficulty in having a deep understanding of these candidates, may it is the best and fast way for all leaders to choose the excellent workers for their company by the CMMC-CCP certification that the candidates have gained. There is no doubt that the certification has become more and more important for a lot of people, especial these people who are looking for a good job, and it has been a general trend. More and more workers have to spend a lot of time on meeting the challenge of gaining the CMMC-CCP Certification by sitting for an exam.

Cyber AB CMMC-CCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• CMMC Governance and Source Documents: This section of the exam measures the capabilities of legal or compliance advisors, covering key regulatory frameworks that govern cybersecurity compliance. Topics include Federal Contract Information, Controlled Unclassified Information, the role of NIST SP 800-171, DFARS, FAR, and the structure and requirements of CMMC v2.0, including self-assessments and certification levels.
Topic 2	<ul style="list-style-type: none">• CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.
Topic 3	<ul style="list-style-type: none">• CMMC Assessment Process (CAP): This section of the exam measures the planning and execution skills of audit and assessment professionals, covering the end-to-end CMMC Assessment Process. This includes planning, executing, documenting, reporting assessments, and managing Plans of Action and Milestones (POA&M) in alignment with DoD and CMMC-AB methodology.
Topic 4	<ul style="list-style-type: none">• CMMC-AB Code of Professional Conduct (Ethics): This section of the exam measures the integrity of cybersecurity professionals by evaluating their understanding of the CMMC-AB Code of Professional Conduct. It emphasizes ethical responsibilities, including confidentiality, objectivity, professionalism, conflict-of-interest avoidance, and respect for intellectual property, ensuring candidates can uphold ethical standards throughout their CMMC-related duties.

Test CMMC-CCP Preparation | Latest CMMC-CCP Exam Camp

The Certified CMMC Professional (CCP) Exam (CMMC-CCP) exam dumps are real and updated CMMC-CCP exam questions that are verified by subject matter experts. They work closely and check all Certified CMMC Professional (CCP) Exam (CMMC-CCP) exam dumps one by one. They maintain and ensure the top standard of Certified CMMC Professional (CCP) Exam (CMMC-CCP) exam questions all the time.

Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q27-Q32):

NEW QUESTION # 27

A CCP is working as an Assessment Team Member on a CMMC Level 2 Assessment. The Lead Assessor has assigned the CCP to assess the OSC's Configuration Management (CM) domain. The CCP's first interview is with a subject-matter expert for user-installed software. With respect to user-installed software, what facet should the CCP's interview focus on?

- **A. Controlled and monitored**
- B. Limited to mission-essential use only
- C. Removed from the system
- D. Scanned for malicious code

Answer: A

Explanation:

Understanding Configuration Management (CM) in CMMC Level 2
In CMMC Level 2, the Configuration Management (CM) domain is critical for ensuring that systems are securely configured, maintained, and monitored to prevent unauthorized changes. One key aspect of CM is managing user-installed software, which can introduce security risks if not properly controlled.

The correct approach to managing user-installed software aligns with CM.3.068 from NIST SP 800-171, which requires organizations to:

Establish and enforce configuration settings to ensure security.

Monitor and control user-installed software to prevent unauthorized or insecure applications from running on organizational systems.

Why "Controlled and Monitored" is Correct?
The CCP (Certified CMMC Professional) conducting the interview should focus on whether the user-installed software is controlled and monitored to align with CMMC Level 2 requirements. This means verifying:

Approval processes for user-installed software.

Monitoring mechanisms (e.g., system logs, audits) to track software changes.

Policies that restrict unauthorized installation to prevent security risks.

Breakdown of Answer Choices

Option Description

Correct?

A). Controlled and monitored

Ensures compliance with CM.3.068, verifying that user-installed software is managed securely.

Correct

B). Removed from the system

Software is not always removed—only unauthorized or risky software should be.

Incorrect

C). Scanned for malicious code

While scanning is important (covered in SI.3.218), it is not the primary focus of Configuration Management.

Incorrect

D). Limited to mission-essential use only

While limiting software is useful, monitoring and controlling is the key security measure.

Incorrect

NIST SP 800-171, CM.3.068- "Control and monitor user-installed software." CMMC 2.0 Level 2 Requirements- Directly aligned with NIST SP 800-171 security controls.

Official Reference from CMMC 2.0 Documentation
Final Verification and Conclusion
The correct answer is A.

Controlled and monitored, as per CM.3.068 in NIST SP 800-171 and CMMC 2.0 documentation.

NEW QUESTION # 28

What is the BEST description of the purpose of FAR clause 52.204-21?

- A. It directs all covered contractors to install the cyber security systems listed in that clause.
- **B. It describes the minimum standard of care that contractors must take to secure covered contractor IS.**
- C. It describes all of the safeguards that contractors must take to secure covered contractor IS.
- D. It directs covered contractors to obtain CMMC Certification at the level equal to the lowest requirement of their contracts.

Answer: B

NEW QUESTION # 29

Which example represents a Specialized Asset?

- **A. All property owned or leased by the government**
- B. SOC's
- C. Hosted VPN services
- D. Consultants who provide cybersecurity services

Answer: A

Explanation:

Understanding Specialized Assets in CMMC: Specialized Assets are defined as a system, device, or infrastructure component that is not a traditional IT system but still plays a role in cybersecurity or business operations.

Types of Specialized Assets (as per CMMC guidance):
#Operational Technology (OT)- Industrial control systems, SCADA systems.

#Security Operations Centers (SOCs)- Dedicated cybersecurity monitoring and response centers.

#IoT Devices- Smart sensors, embedded systems.

#Restricted IT Systems- Systems with highly controlled access.

A). SOC's # Correct

Security Operations Centers (SOCs) are specialized cybersecurity environments used for threat monitoring, detection, and response. They often operate outside standard IT infrastructure and are classified as specialized assets under CMMC.

B). Hosted VPN services # Incorrect

VPN services are standard IT infrastructure and do not qualify as specialized assets.

C). Consultants who provide cybersecurity services # Incorrect

Consultants are personnel, not specialized assets. Specialized assets refer to systems, devices, or infrastructure.

D). All property owned or leased by the government # Incorrect

Government property is not automatically considered a specialized asset under CMMC. Specialized assets refer to specific IT or cybersecurity-related infrastructure.

Why is the Correct Answer "SOC's" (A)?

CMMC 2.0 Assessment Process (CAP) Document

Defines Specialized Assets and includes SOC's in its examples.

CMMC-AB Guidelines

Lists security infrastructure like SOC's as Specialized Assets due to their unique cybersecurity function.

NIST SP 800-171 & CMMC 2.0 Security Domains

Recognizes dedicated security monitoring environments as part of an organization's cybersecurity posture.

CMMC 2.0 References Supporting This Answer

Final Answer #A. SOC's (Security Operations Centers)

NEW QUESTION # 30

An assessment is being conducted at a remote client site. For the duration of the assessment, the client has provided a designated hoteling space in their secure facility which consists of a desk with access to a shared printer. After noticing that the desk does not lock, a locked cabinet is requested but the client does not have one available. At the end of the day, the client provides a printout copy of an important network diagram. The diagram is clearly marked and contains CUI. What should be done NEXT to protect the document?

- A. Take it with them to review in the evening.
- **B. Take a picture with the personal phone before securely shredding it.**
- C. Put it in the unlocked desk drawer for review the following morning.
- D. Leave it on the desk for review the following day.

Answer: B

Explanation:

Understanding CUI Handling and Storage Requirements Controlled Unclassified Information (CUI) must be protected from unauthorized access and properly stored per CMMC 2.0 Level 2 requirements and NIST SP 800-171 controls. Key requirements include:

NIST SP 800-171 (Requirement 3.8.3)- CUI must be physically protected when not in use.

NIST SP 800-171 (Requirement 3.1.3)- CUI access should be restricted to authorized personnel only.

DoD CUI Program Guidance- If proper storage (e.g., locked cabinets or controlled access areas) is unavailable, CUI should be returned to an authorized individual or secure facility.

A). Take it with them to review in the evening # Incorrect

CUI should never be removed from a secure facility unless explicitly authorized and handled in accordance with security policies (e.g., encrypted electronic transport, secure physical storage).

B). Leave it on the desk for review the following day # Incorrect

Leaving CUI unattended on an open desk violates CUI physical protection requirements.

C). Put it in the unlocked desk drawer for review the following morning # Incorrect An unlocked drawer does not meet CUI physical security storage requirements.

D). Take a picture with the personal phone before securely shredding it # Incorrect Storing CUI on an unauthorized personal device is a serious security violation and unauthorized reproduction of CUI is prohibited.

Why None of the Provided Answers Are Fully Correct

What Should Be Done Instead? # Return the document to the client for secure storage.

Since no secure storage option is available, the document must be returned to the client, who should store it in an approved secure location (e.g., a locked cabinet or classified storage area).

The assessment team should not retain CUI unless they have an approved method of safeguarding it.

NIST SP 800-171 (Requirement 3.8.3 - Media Protection)

Requires CUI to be physically secured when not in use.

DFARS 252.204-7012 (Safeguarding Covered Defense Information and Cyber Incident Reporting) Establishes CUI storage and handling protections.

CMMC 2.0 Level 2 (Advanced) Requirements

Requires organizations to implement physical security controls to protect CUI.

DoD CUI Program Guidelines

Clearly state that CUI must be stored in locked cabinets or controlled-access areas when not actively in use.

CMMC 2.0 References Supporting This Answer

Final Answer # None of the provided answers fully comply with CUI protection requirements. The best course of action is to return the document to the client for secure storage.

NEW QUESTION # 31

A company is about to conduct a press release. According to AC.L1-3.1.22: Control information posted or processed on publicly accessible systems, what is the MOST important factor to consider when addressing CMMC requirements?

- A. That the information is correct
- **B. That the company has to safeguard the release of FCI**
- C. That the CEO approved the message
- D. That so long as the information is only FCI, it can be released

Answer: B

Explanation:

AC.L1-3.1.22 states: "Control information posted or processed on publicly accessible systems." This control requires organizations to ensure that FCI (Federal Contract Information) is not publicly posted or made accessible in an uncontrolled manner.

FCI must be protected from unauthorized disclosure, even if it is not classified or CUI.

Reference:

NIST SP 800-171, Requirement 3.1.22

CMMC Level 1 Practice AC.L1-3.1.22

Step 2: Why Safeguarding FCI is Critical in a Press Release If the company releases a press statement that includes FCI, it must ensure that the information is not inadvertently exposing sensitive contract-related data.

FCI includes information provided by or generated for the DoD under a contract that is not intended for public release.

Organizations must implement controls to prevent unintentional exposure.

Step 3: Why Other Answer Choices Are Incorrect A. That the information is correct (Incorrect):

While accuracy is important, CMMC requirements focus on protecting sensitive information, not just ensuring correctness.

B). That the CEO approved the message (Incorrect):

CEO approval does not satisfy CMMC compliance, as it does not address safeguarding FCI.

D). That so long as the information is only FCI, it can be released (Incorrect):

FCI must be protected and cannot be publicly disclosed unless specifically authorized by the DoD.

Final Confirmation of Correct Answer The company must safeguard FCI and ensure that no unauthorized disclosures occur in a public press release.

Thus, the correct answer is: C. That the company has to safeguard the release of FCI

NEW QUESTION # 32
