The web-based practice test is similar to the desktop-based software, with all the same elements of the desktop practice exam. The mock exam can be accessed from any browser and does not require installation. The CSC2 questions in the mock test are the same as those in the real exam. Candidates can take the web-based Canadian Securities Course Exam2 (CSC2) practice test immediately, regardless of the operating system and browser they are using.

CSI CSC2 Exam Syllabus Topics:

Topic	Details
Topic 1	• Analysis of Managed and Structured Products: This section of the exam measures the skills of an Investment Products Specialist and covers mutual funds, exchange-traded funds, alternative investments, structured products, and other managed products including their structures, regulations, features, risks, strategies, performance measurement, and tax implications within the Canadian investment landscape.
Topic 2	• Additional Topics: This section of the exam measures the skills of a Wealth Management Professional and covers Canadian taxation systems, tax-advantaged accounts, fee-based account structures, retail client financial planning and estate planning, institutional client management, and ethical standards for financial advisors serving both individual and institutional clients.

Topic 3	Investment Analysis: This section of the exam measures the skills of a Research Analyst and covers both fundamental and technical analysis methods, including macroeconomic, industry and company analysis techniques, financial statement interpretation, ratio analysis, and security valuation approaches.
Topic 4	Investment Products: This section of the exam measures the skills of an Investment Products Analyst and covers fixed-income securities features, pricing, and trading; equity securities including common and preferred shares; derivatives including options, forwards, futures, rights and warrants; and the characteristics and uses of all these investment instruments in Canadian markets.
Topic 5	The Canadian Investment Marketplace: This section of the exam measures the skills of a Securities Industry Professional and covers the structure and operation of Canada's investment marketplace. It includes the roles of investment dealers and financial intermediaries, capital market functions, financial instruments, and the complete Canadian regulatory environment with its regulatory bodies, principles of regulation, client remediation options, and ethical standards for financial services professionals.
Topic 6	The Corporation: This section of the exam measures the skills of a Corporate Finance Analyst and covers corporate structures, financial statements, disclosure requirements, investor rights, financing methods, capital raising processes, prospectus requirements, securities distribution, and exchange listing procedures for corporations.

New CSC2 Exam Vce, CSC2 Trustworthy Dumps

No doubt the Canadian Securities Course Exam2 (CSC2) certification is one of the most challenging certification exams in the market. This CSC2 certification exam gives always a tough time to Canadian Securities Course Exam2 (CSC2) exam candidates. The VCEEngine understands this hurdle and offers recommended and real CSC2 Exam Practice questions in three different formats. These formats hold high demand in the market and offer a great solution for quick and complete Canadian Securities Course Exam2 (CSC2) exam preparation.

CSI Canadian Securities Course Exam2 Sample Questions (Q166-Q171):

NEW QUESTION # 166

The following financial information is available for fund SKE:

Total liabilities	\$100,000
Units outstanding	1,000,000
Book value of assets	\$10,000,000
Current market value of assets	\$12,000,000

What is SKE fund's net asset value per share?

- A. \$12,00
- B. \$9,90
- C. \$10, 00
- D. **\$11, 90**

Answer: D

Explanation:

A white sheet with black text Description automatically generated

To calculate the **Net Asset Value (NAV) per share** of the SKE Fund, use the following formula:

$$\text{NAV per share} = \frac{\text{Current Market Value of Assets} - \text{Liabilities}}{\text{Units Outstanding}}$$

Step-by-step Calculation:

1. **Current Market Value of Assets:** \$12,000,000
2. **Liabilities:** \$100,000
3. **Net Asset Value (NAV)** = \$12,000,000 - \$100,000 = **\$11,900,000**
4. **Units Outstanding:** 1,000,000

Now calculate NAV per share:

$$\text{NAV per share} = \frac{\text{NAV}}{\text{Units Outstanding}} = \frac{11,900,000}{1,000,000} = 11.90$$

Thus, the **NAV per share** is **\$11.90**.

Explanation of Answer Options:

- * Option A (\$9.90): Incorrect; this value does not reflect the subtraction of liabilities.
- * Option B (\$11.90): Correct; it accounts for the subtraction of liabilities and proper division by outstanding units.
- * Option C (\$12.00): Incorrect; it represents the market value of assets per unit without deducting liabilities.
- * Option D (\$10.00): Incorrect; this value does not align with the given data or calculations.

References to Canadian Securities Course Exam 2 Study Materials:

- * Volume 2, Chapter 17- Mutual Funds: Structure and Regulation, Pricing Mutual Fund Units:
 - * Discusses the formula for calculating NAV per share, including the treatment of liabilities and market value of assets.

 - * Covers the concept of valuation for managed funds and its importance for accurate pricing.
- * Volume 1, Chapter 11- Corporations and Their Financial Statements:
 - * Provides foundational knowledge about book and market values used in calculations.

NEW QUESTION # 167

Which fiscal policy measure was designed to encourage individuals to save?

- A. Dividend tax credit.
- **B. Tax Free Savings Account.**
- C. First Home Savings Account.
- D. Capital gain inclusion rate.

Answer: B

Explanation:

The Tax-Free Savings Account (TFSA) is a fiscal policy measure introduced by the Canadian government to encourage individuals to save. Unlike other savings mechanisms, the TFSA provides a unique tax advantage:

any income earned within the account, whether from interest, dividends, or capital gains, is completely tax- free. This structure incentivizes saving by maximizing the growth potential of the funds invested without the burden of tax erosion.

* Nature of the TFSA

* Introduced in 2009, the TFSA allows Canadians aged 18 or older to contribute a specific annual limit (indexed to inflation) to the account. Contributions are made with after-tax dollars, meaning withdrawals, including investment income, are not taxed.

* Comparison to Other Measures in the Options:

* First Home Savings Account (FHSA): This is a targeted saving vehicle to assist first-time homebuyers and is more restrictive in its purpose.

* Capital Gain Inclusion Rate: Although it reduces taxable income by allowing only a portion of capital gains to be taxed, it doesn't offer the complete tax-exempt growth and withdrawal benefits of a TFSA.

* Dividend Tax Credit: This offsets taxes on eligible dividends but is designed to encourage investment in Canadian corporations

rather than promote individual saving per se.

* Economic Impact By encouraging Canadians to save, the TFSA bolsters household financial security and indirectly supports the broader economy by increasing available investment capital.

References: Volume 2, Chapter 24: Canadian Taxation - Section on Tax-Free Savings Accounts.

Volume 2, Chapter 13: Macroeconomic Analysis - Fiscal Policy Measures.

NEW QUESTION # 168

What is the main benefit of investing in preferred shares?

- A. Higher potential for capital appreciation than common shares.
- B. Priority to claim assets ahead of debt holders.
- C. Priority to receive fixed dividends ahead of common shareholders.
- D. Guaranteed dividend payment.

Answer: C

Explanation:

Preferred shares provide investors with priority to receive fixed dividends ahead of common shareholders.

This fixed income feature makes preferred shares similar to debt instruments but with characteristics of equity. While preferred shareholders have no guaranteed dividend payment (subject to the company's discretion and profitability), they are entitled to receive dividends before any distribution to common shareholders.

Preferred shares do not have a higher potential for capital appreciation compared to common shares, as they are typically designed for income rather than growth. Additionally, preferred shareholders have a lower claim on assets compared to debt holders.

NEW QUESTION # 169

Who manages trades for institutional clients at a dealer firm?

- A. Market maker
- B. Agency trader
- C. Investment banker
- D. Liability trader

Answer: B

NEW QUESTION # 170

What are examples of primary investment objectives?

- A. Tax minimization and safety of principal.
- B. Marketability and tax minimization.
- C. Marketability and growth of capital.
- D. Growth and preservation of capital

Answer: D

Explanation:

Investment objectives are critical components of a financial plan, guiding both the client and the advisor in creating strategies to achieve desired financial outcomes. These objectives generally fall into primary categories that reflect the investor's goals, risk tolerance, and time horizon.

* Growth of Capital: This objective focuses on increasing the principal value of the investment over time.

It is particularly important for investors with long-term goals, such as retirement or funding a child's education. Growth-oriented investments typically include equities, equity mutual funds, and growth-oriented ETFs.

* Preservation of Capital: This objective ensures that the invested principal remains safe from loss, emphasizing lower-risk investments like government bonds, GICs (Guaranteed Investment Certificates), or money market instruments. Investors prioritizing this objective often have a low tolerance for risk and a shorter time horizon.

Growth and Preservation of Capital Relevance to Financial Planning By combining growth with preservation, the portfolio aims to strike a balance between generating returns and maintaining the invested capital. This dual objective is well-suited for individuals in different life stages:

* Young Investors: Tend to emphasize growth more, leveraging their long time horizons.

Why A is Correct Option A explicitly combines both these objectives, aligning with a widely recognized approach to investing that balances risk and reward depending on the investor's profile and needs.

* Volume 1, Section 4: Overview of Economics-Principles of Risk and Return.
