While ESG-Investing practice quiz give you a 99% pass rate, you really only need to spend very little time.

CFA Institute Certificate in ESG Investing Sample Questions (Q596-Q601):

NEW QUESTION # 596

Investment in fossil fuels is permitted under:

- A. The EU Climate Transition Benchmarks only
- **B. Both the EU Paris-Aligned Benchmarks and the EU Climate Transition Benchmarks**
- C. The EU Paris-Aligned Benchmarks only

Answer: B

Explanation:

Both the EU Paris-Aligned Benchmarks and the EU Climate Transition Benchmarks allow for limited investment in fossil fuels. However, these benchmarks include strict criteria to ensure that such investments contribute to the transition to a low-carbon economy and are aligned with long-term decarbonization goals.

ESG Reference: Chapter 8, Page 406 - ESG Integrated Portfolio Construction & Management in the ESG textbook.

Scope 3 carbon emissions, which include indirect emissions throughout the value chain (e.g., suppliers and consumers), are accounted for under both the UK Task Force on Climate-related Financial Disclosures (TCFD) and the European Union's Sustainable Finance Disclosure Regulation (SFDR). These frameworks encourage comprehensive reporting of all emissions sources. ESG Reference: Chapter 3, Page 133 - Environmental Factors in the ESG textbook.

Reporting in the ESG textbook.

NEW QUESTION # 597

Scorecards for ESG analysis are most likely:

- A. inappropriate for country-level assessments of sovereign bonds.
- B. applicable to public companies but not private companies.
- C. used when third-party research or scores are not available.

Answer: C

Explanation:

ESG Analysis Scorecards:

Scorecards for ESG analysis are tools used by investors to evaluate and compare the ESG performance of companies, particularly when third-party research or scores are not available.

1. Applicability: Scorecards can be used for both public and private companies. They provide a structured framework for assessing ESG factors and can be tailored to the specific context and data availability of the companies being evaluated. Thus, they are not limited to public companies alone.

2. Purpose and Use: Scorecards are particularly useful when third-party ESG research or scores are unavailable. They enable investors to conduct their own ESG assessments based on the criteria and metrics they deem important. This is often the case for smaller companies, private companies, or in markets where ESG data coverage is limited.

3. Country-Level Assessments: Scorecards can also be adapted for country-level assessments of sovereign bonds, although this is less common. They can include criteria relevant to the ESG performance of countries, such as governance quality, environmental policies, and social indicators.

References from CFA ESG Investing:

* ESG Scorecards: The CFA Institute highlights the use of ESG scorecards as a practical tool for investors to conduct their own assessments when external ESG ratings or research are not available.

This enables a more tailored and flexible approach to ESG integration.

* Applicability and Flexibility: The CFA curriculum discusses the versatility of scorecards in evaluating both corporate and sovereign issuers, underscoring their utility in various contexts.

In conclusion, scorecards for ESG analysis are most likely used when third-party research or scores are not available, making option B the verified answer.

NEW QUESTION # 598

Which of the following would most likely see its estimate of intrinsic value increased by analysts?

- A. A company having launched a service that reduces customers' electricity usage
- B. A company with high climate-related risk
- C. A company facing significant environmental regulations

Answer: A

Explanation:

A company that has launched a service to reduce customers' electricity usage is likely to see its intrinsic value increased by analysts. This is because such a service directly addresses the growing demand for energy efficiency and sustainability. The MSCI ESG Ratings Methodology highlights that companies which can capitalize on opportunities related to environmental efficiency and innovation are likely to benefit from a better risk and return profile. This aligns with the broader trend towards sustainability and the reduction of energy consumption, making the company more attractive to investors focused on long-term value creation.

NEW QUESTION # 599

The consulting firm McKinsey & Company includes transparency as part of which of the following dimensions of an asset manager's investment approach?

- A. Public reporting
- **B. Tools and processes**
- C. Resources and organization

Answer: B

Explanation:

McKinsey & Company emphasizes transparency as part of an asset manager's tools and processes. Effective tools and processes help ensure that ESG data is accurately collected, analyzed, and reported, making the decision-making process clear and accountable. NEW QUESTION # 600

With regards to environmental analysis in fixed income investing, a country-level analysis is relevant to:

- **A. Both corporate bonds and government bonds**
- B. Government bonds only
- C. Corporate bonds only

Answer: A

Explanation:

In fixed income investing, both corporate and government bonds can be impacted by environmental factors at a country level. For corporate bonds, companies operating within a country are affected by its environmental regulations, policies, and natural resource management. Government bonds, directly tied to a country's economic and environmental conditions, are also influenced by such factors.
