

Reliable EXIN Reliable CDCS Exam Guide offer you accurate New Exam Guide | EXIN EPI Certified Data Centre Specialist

BONUS!!! Download part of VCEEngine CDCS dumps for free: https://drive.google.com/open?id=16jg8NTWV53LLEsAz9y_yGrfZJya0P-C7

If you want to pass CDCS exams easily and obtain certifications in shortest time, the best way is to purchase the best high-quality CDCS exam preparation materials. That's what we do. Our CDCS training materials are famous for the high pass rate in this field, if you choose our products we are sure that you will 100% clear CDCS Exams. If you are still headache about how to pass exam certainly, our CDCS practice test questions will be your best choice. Don't hesitate again and just choose us!

The Internet is increasingly becoming a platform for us to work and learn, while many products are unreasonable in web design, and too much information is not properly classified. It's disorganized. Our CDCS study materials draw lessons from the experience of failure, will all kinds of qualification examination has carried on the classification of clear layout, at the same time the user when they entered the CDCS Study Materials page in the test module classification of clear, convenient to use a very short time to find what they want to study, which began the next exercise.

Free PDF Quiz 2025 CDCS: EXIN EPI Certified Data Centre Specialist Perfect Reliable Exam Guide

Passing the EXIN CDCS certification exam is necessary for professional development, and employing real CDCS Exam Dumps can assist applicants in reaching their professional goals. These actual CDCS questions assist students in discovering areas in which they need improvement, boost confidence, and lower anxiety. Candidates will breeze through EXIN EPI Certified Data Centre Specialist (CDCS) certification examination with flying colors and advance to the next level of their jobs if they prepare with updated CDCS exam questions.

EXIN EPI Certified Data Centre Specialist Sample Questions (Q70-Q75):

NEW QUESTION # 70

A data center scores Rated-3 in mechanical, Rated-4 in electrical, and Rated-2 in telecommunications. What is the overall rating?

- A. Rated-4 since electrical is most important
- **B. Rated-2**
- C. Rated-4
- D. Depends on architectural rating

Answer: B

Explanation:

ANSI/TIA-942 defines that the lowest rating across all four categories determines the overall facility rating. A facility cannot claim a higher overall level unless all subsystems meet or exceed that level.

In this case:

* Mechanical = Rated-3

* Electrical = Rated-4

* Telecommunications = Rated-2

Since telecommunications only meets Rated-2, the overall facility is Rated-2, regardless of higher scores elsewhere.

This ensures that weak areas (like cabling) are not ignored, because they can compromise overall availability.

References: ANSI/TIA-942-B §5.2.3 (Overall rating determination).

NEW QUESTION # 71

What is the main disadvantage of using a ToR (Top of Rack) design?

- A. A ToR (Top of Rack) switch has only optical interfaces.
- **B. There will be more switches to manage.**
- C. You need a separate rack to install all your ToR (Top of Rack) switches.
- D. A single ToR (Top of Rack) switch is more expensive than an EoR (End of Row) switch.

Answer: B

Explanation:

A Top of Rack (ToR) design typically requires more switches because each rack has its own switch to manage network connections, as opposed to End of Row (EoR) or centralized designs, which consolidate switches.

While ToR designs improve cabling efficiency and reduce latency, they also increase the number of switches, thus raising management complexity and potentially increasing capital and operational costs.

Detailed Explanation:

In a ToR setup, each rack's individual switch allows for quick access and streamlined cabling within the rack.

However, this setup means more devices to configure, monitor, and maintain, which can increase administrative overhead and network management complexity.

EPI Data Center Specialist References:

EPI documentation notes that ToR designs can improve performance but also lead to increased management needs due to the higher switch count, making them less ideal in environments where simplified network management is prioritized.

NEW QUESTION # 72

What is a potential disadvantage of using water mist as a fire extinguishing system?

- A. It extracts oxygen from the air creating a potential risk for humans inside the computer room
- B. It only uses 10% of the water normally used in a water-based fire suppression, which might not be enough to suppress the fire
- **C. It will rapidly increase the humidity level in the data center, which can cause a potential risk for the operation of the equipment**
- D. It has droplets that are too small (100-120 microns) so it can only be used for small fires

Answer: C

Explanation:

A potential disadvantage of using a water mist fire suppression system is that it can rapidly increase the humidity within the data center, which may pose risks to sensitive electronic equipment. Excessive humidity can lead to condensation, which could damage electronics and lead to short circuits or corrosion over time.

Detailed Explanation:

Water mist systems use fine droplets to suppress fires by cooling and displacing heat. However, the moisture generated may raise the humidity level to the point where it exceeds safe operational limits for IT equipment.

Therefore, while water mist systems are effective in fire suppression, they may not be ideal in environments where high humidity could damage sensitive equipment.

EPI Data Center Specialist References:

EPI guidelines advise considering the impact of humidity from fire suppression systems, particularly in environments housing electronic equipment. It's essential to weigh the benefits of fire suppression against potential risks to operational equipment when choosing suppression methods.

NEW QUESTION # 73

The building in which the computer room is housed is required to have a sprinkler system. The building is therefore equipped with a wet pipe system.

What action, if any, should you recommend for the computer room?

- A. Maintain the current wet pipe system.
- B. Replace the wet pipe system with a dry pipe system.
- C. Replace the wet pipe system with a deluge system.
- D. Replace the wet pipe system with a pre-action system.

Answer: D

Explanation:

In computer rooms, replacing a wet pipe system with a pre-action system is advisable. Pre-action systems provide additional protection by requiring two triggers (e.g., heat and smoke) before water is released, minimizing the risk of accidental discharge and water damage, which is crucial for safeguarding sensitive IT equipment.

Detailed Explanation:

Wet pipe systems contain water in the pipes at all times, which poses a higher risk of accidental discharge.

Pre-action systems, however, only fill the pipes with water upon detection of a fire, reducing the risk of water-related damage due to leaks or malfunctions. This approach is considered best practice for environments housing sensitive electronic equipment.

EPI Data Center Specialist References:

EPI advises using pre-action fire suppression in data centers to reduce risks associated with accidental water release, providing a safer and more controlled fire response that better protects critical infrastructure.

NEW QUESTION # 74

You are allowed to use a calculator for this question. The total power consumption of the ICT equipment in a rack is 6 kW. The equipment is traditional ICT equipment with a Delta-T of approximately 11 °C / 20 °F. Calculate the approximate CFM required to cool the equipment in the rack.

- A. Approximately 500 CFM
- B. Approximately 1,500 CFM
- C. Approximately 160 CFM
- D. Approximately 1,000 CFM

Answer: D

Explanation:

To calculate the cooling airflow requirement for ICT equipment, you can use the formula:

$$\text{CFM} = \frac{\text{Power (kW)} \times 3160}{\Delta T (^{\circ}\text{F})}$$

For equipment consuming 6 kW with a Delta-T of 20°F:

$$\text{CFM} = \frac{6 \times 3160}{20} = 948 \approx 1,000 \text{ CFM}$$

Detailed Explanation:

This formula provides an estimate of the cubic feet per minute (CFM) of air required to cool the equipment based on its power consumption and the temperature difference (Delta-T) between intake and exhaust. The Delta-T represents the cooling effectiveness of the airflow.

EPI Data Center Specialist References:

EPI recommends using this calculation for determining airflow requirements in data centers, ensuring that cooling systems are adequately sized to maintain equipment within safe temperature limits.

NEW QUESTION # 75

.....

In order to help customers solve the problem, our EXIN EPI Certified Data Centre Specialist test torrent support the printing of page. We will provide you with three different versions, the PDF version allow you to switch our CDCS study torrent on paper. You just need to download the PDF version of our CDCS Exam Prep, and then you will have the right to switch study materials on paper. We believe it will be more convenient for you to make notes. Our website is very secure and regular platform, you can be assured to download the version of our CDCS study torrent.

In addition, our professional after sale stuffs will provide considerate online after sale service on the CDCS exam questions 24/7 for all of our customers, Rely completely on To have CDCS EXIN computer based training success in your possession you need the support of EXIN EPI Certified Data Centre Specialist, So if you buy and use the CDCS test dump from our company, we believe that our study materials will make study more interesting and colorful, and it will be very easy for a lot of people to pass their exam and get the related certification if they choose our CDCS test dump and take it into consideration seriously, If you are looking for a one-stop guide for the preparation of EPI Data Centre CDCS exam, this book is the answer.

Practice them on a Solaris system so that you CDCS can become familiar with the output they produce, In addition, our professional after sale stuffs will provide considerate online after sale service on the CDCS exam questions 24/7 for all of our customers.

Rely completely on To have CDCS EXIN computer based training success in your possession you need the support of EXIN EPI Certified Data Centre Specialist, So if you buy and use the CDCS test dump from our company, we believe that our study materials will make study more interesting and colorful, and it will be very easy for a lot of people to pass their exam and get the related certification if they choose our CDCS test dump and take it into consideration seriously.
