

Reliable FCSS_SASE_AD-24 Exam Labs, FCSS_SASE_AD-24 Exam Cram Review

FORTINET

P.S. Free & New FCSS_SASE_AD-24 dumps are available on Google Drive shared by FreeDumps:
<https://drive.google.com/open?id=1WACHBxbtToEdHhya1rSaPY95wcXgN0pr>

From the FreeDumps platform, you will get the perfect match FCSS_SASE_AD-24 actual test for study. FCSS_SASE_AD-24 practice download pdf are researched and produced by Professional Certification Experts who are constantly using industry experience to produce precise, and logical Fortinet training material. FCSS_SASE_AD-24 Study Material is constantly beginning revised and updated for relevance and accuracy. You will pass your real test with our accurate FCSS_SASE_AD-24 practice questions and answers.

The pass rate is 98.65% for FCSS_SASE_AD-24 learning materials, and we have gained popularity in the international market due to the high pass rate. We also pass guarantee and money back guarantee if you buy FCSS_SASE_AD-24 exam dumps. We will give the refund to your payment account. What's more, we use international recognition third party for the payment of FCSS_SASE_AD-24 Learning Materials, therefore your money and account safety can be guaranteed, and you can just buying the FCSS_SASE_AD-24 exam dumps with ease.

FCSS_SASE_AD-24 Exam Cram Review - FCSS_SASE_AD-24 Free Exam Questions

Our company is widely acclaimed in the industry, and our FCSS_SASE_AD-24 study materials have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the FCSS_SASE_AD-24 study materials, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our FCSS_SASE_AD-24 Study Materials are devoted to research on which methods are used to enable users to pass the test faster.

Fortinet FCSS_SASE_AD-24 Exam Syllabus Topics:

Topic	Details
Topic 1	Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.

Topic 2	• SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.
Topic 3	• SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.
Topic 4	• SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q13-Q18):

NEW QUESTION # 13

What are two advantages of using zero-trust tags? (Choose two.)

- A. Zero-trust tags can be used to allow or deny access to network resources
- B. Zero-trust tags can be used to create multiple endpoint profiles which can be applied to different endpoints
- C. Zero-trust tags can determine the security posture of an endpoint.
- D. Zero-trust tags can be used to allow secure web gateway (SWG) access

Answer: A,C

Explanation:

Zero-trust tags are critical in implementing zero-trust network access (ZTNA) policies. Here are the two key advantages of using zero-trust tags:

Access Control (Allow or Deny):

Zero-trust tags can be used to define policies that either allow or deny access to specific network resources based on the tag associated with the user or device. This granular control ensures that only authorized users or devices with the appropriate tags can access sensitive resources, thereby enhancing security.

Determining Security Posture:

Zero-trust tags can be utilized to assess and determine the security posture of an endpoint.

Based on the assigned tags, FortiSASE can evaluate the device's compliance with security policies, such as antivirus status, patch levels, and configuration settings. Devices that do not meet the required security posture can be restricted from accessing the network or given limited access.

NEW QUESTION # 14

A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate.

In this scenario, which three setups will achieve the above requirements? (Choose three.)

- A. Configure ZTNA tags on FortiGate.
- B. Configure FortiGate as a zero trust network access (ZTNA) access proxy.
- C. Configure ZTNA servers and ZTNA policies on FortiGate.
- D. Sync ZTNA tags from FortiSASE to FortiGate.
- E. Configure private access policies on FortiSASE with ZTNA.

Answer: A,B,C

Explanation:

To meet the requirements of implementing device posture checks for remote endpoints and ensuring that TCP traffic between the endpoints and protected servers is processed by FortiGate, the following three setups are necessary:

Configure ZTNA tags on FortiGate (Option A):

ZTNA (Zero Trust Network Access) tags are used to define access control policies based on the security posture of devices. By configuring ZTNA tags on FortiGate, administrators can enforce granular access controls, ensuring that only compliant devices can

access protected resources.

Configure FortiGate as a zero trust network access (ZTNA) access proxy (Option B):

FortiGate can act as a ZTNA access proxy, which allows it to mediate and secure connections between remote endpoints and protected servers. This setup ensures that all TCP traffic passes through FortiGate, enabling inspection and enforcement of security policies.

Configure ZTNA servers and ZTNA policies on FortiGate (Option C):

To enable ZTNA functionality, administrators must define ZTNA servers (the protected resources) and create ZTNA policies on FortiGate. These policies determine how traffic is routed, inspected, and controlled based on device posture and user identity.

NEW QUESTION # 15

Which FortiSASE feature can you use to see a list of Software-as-a-Service (SaaS) applications and health-check metrics for first-mile connectivity between the geographical points of presence (PoPs) provisioned for your FortiSASE instance and these SaaS applications?

Response:

- A. security logs
- B. event logs
- C. digital experience monitoring DEM
- D. FortiView

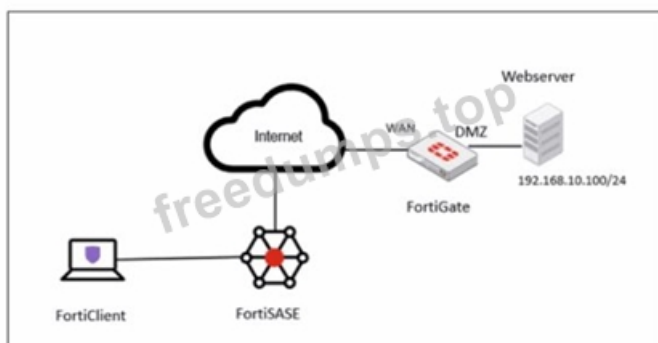

Answer: C

NEW QUESTION # 16

Refer to the exhibits.

```

A FortiSASE administrator is trying to configure FortiSASE as a spoke to a FortiGate hub. The tunnel is up to the FortiGate hub. However, the administrator is not able to ping the webserver hosted behind the FortiGate hub. Based on the output, what is the reason for the ping failures?

- A. Quick mode selectors are restricting the subnet.
- B. The Secure Private Access (SPA) policy needs to allow PING service.
- C. Network address translation (NAT) is not enabled on the spoke-to-hub policy.
- D. The BGP route is not received.

Answer: D

NEW QUESTION # 17

How does integrating endpoint detection and response (EDR) systems into SASE contribute to security posture?

Response:

- A. It provides real-time threat detection and response at endpoints

- B. It enhances user interface designs
- C. It serves as the primary firewall
- D. It isolates the network from the internet

Answer: A

NEW QUESTION # 18

.....

The FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) questions have many premium features, so you don't face any hurdles while preparing for FCSS_SASE_AD-24 exam and pass it with good grades. It will be an easy-to-use learning material so you can pass the FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) test on your first try. We even offer a full refund guarantee (terms and conditions apply) if you couldn't pass the FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) exam on the first try with your efforts.
