

# Reliable Free 1Z0-1109-25 Exam offer you accurate Practice Exam Fee | Oracle Cloud Infrastructure 2025 DevOps Professional

What's more, part of that DumpExam 1Z0-1109-25 dumps now are free: [https://drive.google.com/open?id=1WkhNK\\_0E4QH4c82PiEp1OQa64OegFmlQ](https://drive.google.com/open?id=1WkhNK_0E4QH4c82PiEp1OQa64OegFmlQ)

Nowadays, the development of technology is quickly. Also, our 1Z0-1109-25 exam guide will keep advancing. A lot of reforms have applied to the content and formats of our 1Z0-1109-25 learning guide according to our professional experts constantly efforts. We just hope that you will have a better experience when you study on our 1Z0-1109-25 Actual Exam. Act from now if you are still hesitating, our 1Z0-1109-25 study materials will enable you embrace a bright future.

## Oracle 1Z0-1109-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Using Code and Templates for Provisioning and Configuring Infrastructure: This domain evaluates the expertise of DevOps Engineers and Infrastructure Architects in deploying infrastructure using Infrastructure as Code (IaC) tools like Terraform. It focuses on automating resource provisioning with OCI Resource Manager to ensure consistent and efficient infrastructure setups.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Enabling DevSecOps: This domain measures the skills of Security Engineers and DevSecOps Practitioners in integrating security into DevOps workflows. It includes managing encryption keys with OCI Vault, securing CI</li><li>CD pipelines, and ensuring container image security to align with DevSecOps best practices.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Configuring and Managing Continuous Integration and Continuous Delivery (CI</li><li>CD): This section tests the knowledge of CI</li><li>CD Engineers and Automation Specialists in automating the software lifecycle using OCI DevOps Service. It includes managing source code repositories, configuring build</li><li>deployment pipelines, and creating artifacts for automated deployments across environments.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Managing Containers Using Container Orchestration Engine: This part assesses the abilities of Kubernetes Administrators and Containerization Specialists in managing Oracle Container Engine for Kubernetes (OKE). It covers cluster creation, scaling, upgrades, networking, storage, and security configurations to optimize containerized applications in OCI environments.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Implementing Monitoring and Observability (O&amp;M): This section evaluates the expertise of Site Reliability Engineers (SREs) and Monitoring Specialists in tracking system performance using OCI Monitoring, Logging, and Events services. It analyzes metrics, logs, and events to maintain system reliability and troubleshoot operational issues effectively.</li></ul>

## 100% Pass Quiz 1Z0-1109-25 - Oracle Cloud Infrastructure 2025 DevOps Professional Fantastic Free Exam

The software version of our 1Z0-1109-25 study engine is designed to simulate a real exam situation. You can install it to as many computers as you need as long as the computer is in Windows system. With our software of 1Z0-1109-25 guide exam, you can practice and test yourself just like you are in a real exam. The results of your test will be analyzed and a statistics will be presented to you. So you can see how you have done and know which kinds of questions of the 1Z0-1109-25 Exam are to be learned more.

### Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q36-Q41):

#### NEW QUESTION # 36

As a DevOps engineer at XYZ Corp, you have been assigned the task of setting up a new OKE (Oracle Kubernetes Engine) cluster to manage the organization's Kubernetes applications hosted on Oracle Cloud Infrastructure (OCI). Your goal is to ensure a smooth and efficient process while preparing for the cluster creation.

Which of the following statements is false regarding the preparation process for setting up a new OKE cluster?

- A. Container Engine for Kubernetes automatically creates and configures new network resources for the new cluster.
- B. Container Engine for Kubernetes cannot utilize existing network resources for the creation of the new cluster.
- C. Access to an Oracle Cloud Infrastructure tenancy is required to set up the new OKE cluster.
- D. It is necessary to ensure sufficient quota on different resource types in your OCI tenancy for the cluster setup.

**Answer: B**

Explanation:

This statement is false because Container Engine for Kubernetes (OKE) can utilize existing network resources such as Virtual Cloud Networks (VCNs), subnets, security lists, and route tables for the creation of a new cluster. You can either use pre-existing network resources or let OKE create new network resources automatically.

#### NEW QUESTION # 37

As a DevOps Engineer, you are tasked with securely storing and versioning your application's source code and automatically build, test, and deploy your application to Oracle Cloud Infrastructure (OCI) platform.

You are told to automate manual tasks and help software teams in managing complex environments at scale.

Which three OCI services can you choose to accomplish these tasks? (Choose three.)

- A. Oracle Cloud Infrastructure Registry
- B. Container Engine for Kubernetes
- C. Oracle APEX Application Development
- D. Oracle Cloud Logging Analytics
- E. DevOps project

**Answer: A,B,E**

Explanation:

Oracle Cloud Infrastructure Registry: This service allows you to securely store container images. It is essential for managing the container images used for deployment, making it an important part of the DevOps workflow.

DevOps project: OCI DevOps project is specifically designed to manage the CI/CD pipeline. It helps in automating tasks like building, testing, and deploying applications, which are key activities for managing complex environments and promoting agility in software development.

Container Engine for Kubernetes: Oracle Container Engine for Kubernetes (OKE) is used to deploy applications in a containerized environment. It provides a robust platform for deploying, managing, and scaling containerized applications, which is essential for handling complex environments at scale.

#### NEW QUESTION # 38

A small company is moving to a DevOps framework to better accommodate their intermittent workloads, which are dynamic and irregular. They want to adopt a consumption-based pricing model.

Which Oracle Cloud Infrastructure service can be used as a target deployment environment?

- A. Functions
- B. Virtual machine compute instance
- C. Oracle Kubernetes (OKE)
- D. Bare metal compute instance

**Answer: A**

Explanation:

Oracle Cloud Infrastructure Functions is a serverless compute service that supports a consumption-based pricing model. This means that you are only charged for the compute resources when your function is invoked. This is ideal for intermittent, dynamic, and irregular workloads since the company does not need to provision infrastructure in advance, and costs are directly tied to usage.

#### NEW QUESTION # 39

You are a developer and have been asked to develop an e-commerce website for your organization. It must support a variety of clients including desktop browsers, mobile browsers and native mobile applications.

Which two approaches can you use to build the application to achieve deployment independence, easier technology upgrades, and resiliency to architecture changes? (Choose two.)

- A. Implement each module as an independent service/process which can be replaced, updated, or deleted without disrupting the rest of the application.
- B. Use monolithic approach, as it allows you to easily redeploy your applications to perform frequent updates.
- C. Use microservices architecture as it eliminates any long-term commitment to a technology stack.
- D. Choose monolithic approach over microservices as it has better fault isolation capability.
- E. Use monolithic approach to as it makes it easier to incrementally adapt to newer technology.

**Answer: A,C**

Explanation:

By implementing each module as an independent service/process (which is a core feature of microservices architecture), you can replace, update, or delete services without affecting the rest of the application. This ensures deployment independence and makes it easier to adapt to architecture changes or technology upgrades without major disruptions.

Microservices architecture allows each service to be built with the best-suited technology stack for its specific function. This flexibility ensures that you are not tied to a single technology for the entire application, making future technology upgrades easier and eliminating long-term technology commitments.

#### NEW QUESTION # 40

A fully qualified path to a particular image in an OCIR repository is given as iad.ocir.io/ansh81vrulzp/project01/acme-web-app:version2.0.test.

Identify the two options with correct terms and their associated values. (Choose two.)

- A. iad.ocir.io/ansh81vrulzp represents <region-key>
- B. ansh81vrulzp represents <tenancy-namespace>
- C. ansh81vrulzp/project01/acme-web-app:version2.0.test represents <repo-name>
- D. iad represents <region-key>
- E. version2.0.test represents <tenancy-namespace>

**Answer: B,D**

Explanation:

ansh81vrulzp is the <tenancy-namespace>. In Oracle Cloud Infrastructure Registry (OCIR), the tenancy namespace uniquely identifies the tenancy and is used as part of the image path.

iad is the <region-key>. The region key is the shorthand identifier for the OCI region (iad represents Ashburn region), and it is used in the fully qualified path for images stored in the Oracle Cloud Infrastructure Registry (OCIR).

#### NEW QUESTION # 41

.....

The Oracle 1Z0-1109-25 pdf questions learning material provided to the customers from DumpExam is in three different formats.

The first format is PDF format which is printable and portable. It means it can be accessed from tablets, laptops, and smartphones to prepare for the Oracle Cloud Infrastructure 2025 DevOps Professional (1Z0-1109-25) exam. The Oracle 1Z0-1109-25 PDF format can be used offline, and candidates can even prepare for it in the classroom or library by printing questions or on their smart devices.
