## Latest Microsoft MB-500 Exam Book | MB-500 Valid Test Test

Sometime, most candidates have to attend an exam, they may feel nervous and don't know what to do. If you happen to be one of them, our MB-500 learning materials will greatly reduce your burden and improve your possibility of passing the exam. Our advantages of time-saving and efficient can make you no longer be afraid of the MB-500 Exam, and you will find more about the benefits of our MB-500 exam questions later on.

The MB-500 exam covers several topics, including creating and managing data entities, customizing user interfaces, implementing security, and developing and testing code. Candidates must demonstrate their ability to develop solutions that meet specific business requirements and troubleshoot issues that may arise during the development phase. MB-500 Exam also gauges candidates' knowledge of the development lifecycle, including best practices for code management and deployment.

## Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q143-Q148):

### NEW QUESTION # 143

You are configuring your developer environment by using Team Explorer.

There are several developers working on a customization.

You need to ensure that all code is checked in and then merged to the appropriate branches.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

#### Actions

Map the Microsoft Azure DevOps project to your local developer machine.

Create a test branch.

Create a dev branch.

Connect to the Microsoft Azure DevOps project.

Create a main branch.

#### Answer Area

#### Answer:

Explanation:

#### Answer Area

#### Actions

Map the Microsoft Azure DevOps project to your local developer machine.

Create a test branch.

Create a dev branch.

Connect to the Microsoft Azure DevOps project.

Create a main branch.

Connect to the Microsoft Azure DevOps project.

Create a main branch.

Create a dev branch.

Map the Microsoft Azure DevOps project to your local developer machine.

Create a test branch.

#### NEW QUESTION # 144

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You must create a new attribute class in which to mark other classes in the ISV solution and their respective methods with the error levels Warning and Error. You have the following class: the numbers are included for reference only.)

```

01
02 public class Vehicle
03 {
04
05     public int bike()
06     {
07     }
08     public int automobile()
09     {
10     }
11     public int bicycle()
12     {
13     }

```

You need to ensure that the compiler will report an error if code calls the bike method.

Solution:

Create the following attribute class:

```

public class ISVObsoleteAttribute extends System.Attribute
{
    ErrorWarning errorWarningEnum;
    string explanation;
    public void new(ErrorWarning _errorWarningEnum, string _explanation)
    {
        super();
        errorWarningEnum = _errorWarningEnum;
        explanation = _explanation;
    }
}

```

Insert the following code at line 04:

```
[SysObsoleteAttribute("Deprecated. Please use the Bicycle class instead.", false)]
```

Does The solution meet the goal?

- A. Yes
- B. No

Answer: B

#### NEW QUESTION # 145

You need to integrate Dynamics 365 Finance with the following applications.

Application	Scenario	Real-time data required
Dynamics 365 Customer Service app	Sales representatives must be able to change the credit limit for customers by using the app.	Yes
e-commerce website	Customers use the website to request information about product availability.	Yes
on-premises mainframe system	The system generates sales orders. The sales orders must be imported daily into Dynamics 365 Finance.	No

Which integration patterns should you use? To answer, drag the appropriate patterns to the correct applications. Each pattern may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Patterns	Answer Area								
<div>dual-write</div> <div>custom service</div> <div>batch data integration</div>	<table border="1"> <thead> <tr> <th>Application</th> <th>Pattern</th> </tr> </thead> <tbody> <tr> <td>Dynamics 365 Customer Service app</td> <td></td> </tr> <tr> <td>e-commerce website</td> <td></td> </tr> <tr> <td>on-premises mainframe system</td> <td></td> </tr> </tbody> </table>	Application	Pattern	Dynamics 365 Customer Service app		e-commerce website		on-premises mainframe system	
Application	Pattern								
Dynamics 365 Customer Service app									
e-commerce website									
on-premises mainframe system									

Answer:

Explanation:

**Patterns**

dual-write	custom service
batch data integration	

**Answer Area**

**Application**

- Dynamics 365 Customer Service app
- e-commerce website
- on-premises mainframe system

**Pattern**

dual-write
custom service
batch data integration

**Explanation:**

**Patterns**

dual-write	custom service
batch data integration	

**Answer Area**

**Application**

- Dynamics 365 Customer Service app
- e-commerce website
- on-premises mainframe system

**Pattern**

dual-write
custom service
batch data integration

### NEW QUESTION # 146

You need to map the target data fields in the Data management workspace for the custom data entity.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Refresh the entity list from the Data management workspace.
- Validate data management from the Data management workspace.
- Publish the entity.
- Generate the correct target field mapping.
- In the Data entities list, select Modify target mapping for the custom data entity.
- In the Data entities list, select Target fields for the custom data entity.

**Answer area**

**Microsoft**

**Answer:**

**Explanation:**

**Actions**

- Refresh the entity list from the Data management workspace.
- Validate data management from the Data management workspace.
- Publish the entity.
- Generate the correct target field mapping.
- In the Data entities list, select Modify target mapping for the custom data entity.
- In the Data entities list, select Target fields for the custom data entity.

**Answer area**

- In the Data entities list, select Target fields for the custom data entity.
- Publish the entity.
- Generate the correct target field mapping.

**Microsoft**

**Explanation**

**Answer area**

- In the Data entities list, select Target fields for the custom data entity.
- Publish the entity.
- Generate the correct target field mapping.

**Microsoft**

### NEW QUESTION # 147
