Before clients purchase our Network-and-Security-Foundation test torrent they can download and try out our product freely to see if it is worthy to buy our product. You can visit the pages of our product on the website which provides the demo of our Network-and-Security-Foundation study torrent and you can see parts of the titles and the form of our software. On the pages of our Network-and-Security-Foundation study tool, you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of our product, the discounts to the client, the details and the guarantee of our Network-and-Security-Foundation study torrent, the methods to contact us, the evaluations of the client on our

product, the related exams and other information about our Network-and-Security-Foundation test torrent. Thus you could decide whether it is worthy to buy our product or not after you understand the features of details of our product carefully on the pages of our Network-and-Security-Foundation study tool on the website.

Do you want to find a good job which brings you high income? Do you want to be an excellent talent? The Network-and-Security-Foundation certification can help you realize your dream which you long for because the Network-and-Security-Foundation test prep can prove that you own obvious advantages when you seek jobs and you can handle the job very well. So our Network-and-Security-Foundation Exam Preparation can be conducive to helping you pass the Network-and-Security-Foundation exam and find a good job. What are you waiting for? Just come and buy our Network-and-Security-Foundation exam questions!

2025 Excellent Reliable Network-and-Security-Foundation Braindumps Ppt | 100% Free Reliable Network-and-Security-Foundation Dumps Pdf

It is acknowledged that there are numerous Network-and-Security-Foundation learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for Network-and-Security-Foundation practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. With our Network-and-Security-Foundation Exam Questions, you will pass your exam just in one go for we are the most professional team in this career for over ten years.

WGU Network-and-Security-Foundation Sample Questions (Q61-Q66):

NEW QUESTION # 61

A person is troubleshooting a network issue and needs to see a list of all active network connections. Which Linux command should be used?

- **A. netstat**
- B. ifconfig
- C. dig
- D. nslookup

Answer: A

Explanation:

The netstat command in Linux displays active network connections, listening ports, and network statistics. It is useful for diagnosing network issues and identifying open connections.

* nslookup is for DNS queries.

* dig provides DNS information, not network connection status.

* ifconfig shows network interface details but does not list active connections.

NEW QUESTION # 62

Which layer of the OSI model includes the ICMP?

- A. Transport
- B. Application
- C. Session
- **D. Network**

Answer: D

Explanation:

The Network layer (Layer 3 of the OSI model) includes the Internet Control Message Protocol (ICMP), which is used for network diagnostics (e.g., ping command). ICMP helps in error reporting and network troubleshooting.

* Transport layer handles reliable data delivery (e.g., TCP, UDP).

* Session layer manages communication sessions.

* Application layer provides end-user services.

NEW QUESTION # 63

Users of a network have been experiencing issues. In the course of troubleshooting, an administrator wants to test DNS resolution against a host.

Which command in Linux should be used for this purpose?

- A. netstat
- B. ifconfig
- C. traceroute
- **D. dig**

Answer: D

Explanation:

The `dig` command in Linux is used for DNS troubleshooting. It queries DNS records and provides detailed information about domain name resolutions.

* `traceroute` tracks the path packets take to a destination but does not diagnose DNS.

* `netstat` lists active connections, not DNS records.

* `ifconfig` is used for managing network interfaces.

NEW QUESTION # 64

A start-up company wants to build its computer network by starting with the base-level resources offered by a cloud service. In this way, the company won't have to buy physical hardware but can still have complete control over operating systems and other software.

Which cloud service model should be used?

- A. Function as a Service (FaaS)
- B. Platform as a Service (PaaS)
- **C. Infrastructure as a Service (IaaS)**
- D. Software as a Service (SaaS)

Answer: C

Explanation:

Infrastructure as a Service (IaaS) provides virtualized computing resources, including virtual machines, storage, and networking, while allowing users full control over operating systems and applications. Examples include AWS EC2 and Google Compute Engine.

* SaaS provides ready-to-use applications (e.g., Google Docs).

* FaaS runs code in response to events (e.g., AWS Lambda).

* PaaS provides development environments but not full infrastructure control.

NEW QUESTION # 65

An individual has been tasked with setting up an office network. During the process, there is a need for a device that extends the range of a network.

Which device should be used?

- **A. Access point**
- B. Switch
- C. Server
- D. Router

Answer: A

Explanation:

An access point (AP) is a network device that extends the coverage of a wireless network by acting as a bridge between wired and wireless devices. It allows users to connect to a network without needing a direct wired connection. APs are particularly useful in large office spaces where Wi-Fi signals may not reach all areas.

* Routers primarily manage network traffic but do not directly extend network range unless they include built-in AP functionality.

* Servers are used for hosting applications and storing data but do not extend network connectivity.

* Switches connect wired devices within a local network but do not extend wireless network range.

NEW QUESTION # 66

.....

With Network-and-Security-Foundation test training materials of Exam4Tests, you can put away with disorder emotion and clean up them. Network-and-Security-Foundation test training materials of Exam4Tests are the most accurate training materials in the current market. Using it, the passing rate of Network-and-Security-Foundation Exam is 100%. Choose Exam4Tests is equal to choose success.
