

Reliable NS0-005 Exam Registration & Reliable NS0-005 Test Pass4sure

P.S. Free & New NS0-005 dumps are available on Google Drive shared by TestsDumps: https://drive.google.com/open?id=1ke6qKr-A3hbtEj4Ihp16yavn_TVi7hsB

The Network Appliance NS0-005 online practice test engine that comes with the NetApp Technology Solutions Professional Exam (NS0-005) exam questions from TestsDumps assists you in simulating the real NetApp Technology Solutions Professional Exam (NS0-005) exams. This is excellent for familiarizing yourself with the NetApp Technology Solutions Professional Exam and learning what to anticipate on test day. You can also use the Network Appliance Practice Test (Links to an external site.) engine to monitor your progress and review your answers to see where you need to improve for the NetApp Technology Solutions Professional Exam (NS0-005) exam.

We guarantee to you that the refund process is very simple and only if you provide us the screenshot or the scanning copy of your failure marks we will refund you in full immediately. If you have doubts or problems about our NS0-005 exam torrent, please contact our online customer service or contact us by mails and we will reply and solve your problem as quickly as we can. We won't waste your money and your time and if you fail in the exam we will refund you in full immediately at one time. We provide the best NS0-005 Questions torrent to you and don't hope to let you feel disappointed.

2025 Network Appliance Efficient Reliable NS0-005 Exam Registration

Network Appliance NS0-005 practice braindumps will be worthy of purchase, and you will get manifest improvement. So you have a comfortable experience with our NS0-005 study guide this time. By using our NS0-005 Preparation materials, we are sure you will pass your exam smoothly and get your dreamed certification.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28

A customer needs to accelerate data access of a hot volume to multiple remote sites.

Which NetApp ONTAP feature simplifies file distribution, reduces WAN latency, and lowers WAN bandwidth cost?

- A. MetroCluster software
- **B. FlexCache technology**
- C. SnapMirror Business Continuity
- D. FlexClone technology

Answer: B

Explanation:

FlexCache technology is a feature of NetApp ONTAP that enables you to create a cache volume on a remote cluster and populate

it with data from a source volume on a different cluster. The cache volume can serve read requests from local clients, reducing the WAN latency and bandwidth consumption. The cache volume can also be configured to write back to the source volume, ensuring data consistency and availability. FlexCache technology simplifies file distribution by allowing you to create multiple cache volumes across different sites and regions, and manage them from a single interface.

References = FlexCache volumes overview - NetApp, FlexCache volumes: Simplify file distribution and reduce WAN latency - NetApp, FlexCache volumes: Use cases and benefits - NetApp.

NEW QUESTION # 29

A customer wants to move file storage to a public cloud and manage their own storage solution.

Which offering should be recommended to this customer?

- A. NetApp Cloud Volumes Service
- B. NetApp BlueXP edge caching
- C. NetApp Cloud Volumes ONTAP
- D. Amazon FSx for NetApp ONTAP

Answer: C

Explanation:

NetApp Cloud Volumes ONTAP is a cloud-native storage solution that allows customers to deploy and manage NetApp hybrid, multi-cloud storage and data services from on-premises sources and cloud service providers. It provides enterprise-grade data and file services, such as NFS, SMB/CIFS, iSCSI and S3, on AWS, Azure, and Google Cloud. It also offers high availability, data protection, storage efficiency, and cost-performance optimization features. It is suitable for customers who want to have more control and flexibility over their cloud storage solution, while leveraging NetApp's technology and expertise.

References = Cloud Volumes ONTAP: Deploy Storage in the Public Cloud - NetApp, NetApp Customer Experience | NetApp, NetApp storage systems overview.

NEW QUESTION # 30

A company is running both primary and secondary workloads on a NetApp AFF A250 system. The company wants to free space on their on-premises NetApp ONTAP clusters by migrating inactive data to Amazon Simple Storage Service (Amazon S3).

Which NetApp technology could accomplish this task?

- A. BlueXP edge caching
- B. SVM data mobility
- C. FlexCache
- D. BlueXP tiering

Answer: D

Explanation:

BlueXP tiering is a NetApp technology that enables you to free space on your on-premises NetApp ONTAP clusters by migrating inactive data to Amazon S3. BlueXP tiering is a data tiering service that automatically moves cold data from your on-premises ONTAP volumes to low-cost object storage in the cloud. BlueXP tiering uses a Connector, which is a virtual machine that runs in your AWS VPC or on your premises, to create and manage an S3 bucket for tiering. BlueXP tiering also provides data protection, encryption, and compression features to ensure the security and efficiency of your data.

References = Tiering data from on-premises ONTAP clusters to Amazon S3 | NetApp Documentation, BlueXP Tiering | NetApp Cloud Central.

NEW QUESTION # 31

What are two NetApp on-premises data storage systems that can be discovered and managed in NetApp BlueXP? (Choose two.)

- A. E-Series
- B. StorageGRID
- C. Astra Data Store
- D. Element clusters

Answer: A,B

Explanation:

A). E-Series: NetApp E-Series is a line of high-performance storage systems that are known for their reliability and efficiency, especially in data-intensive environments. These systems can be managed and monitored through NetApp BlueXP, allowing for centralized management and visibility.

D). StorageGRID: NetApp StorageGRID is an object storage solution designed for managing large-scale unstructured data. It is suitable for hybrid cloud environments and can be integrated with NetApp BlueXP for management and monitoring, providing a comprehensive view of data across various storage environments.

NEW QUESTION # 32

A customer has data on an on-premises volume that needs to be quickly accessed by their analytics application in the cloud. The connection from the cloud provider to the on-premises system has more latency than the cloud analytics application can handle. The customer cannot completely move the volume to the cloud, due to on-premises access requirements.

Which NetApp ONTAP feature enables the customer to use NetApp Cloud Volumes ONTAP for quick read and write access to this volume from the cloud?

- **A. FlexCache**
- B. SnapVault
- C. SnapMirror
- D. FabricPool

Answer: A

Explanation:

FlexCache is a NetApp ONTAP feature that enables the customer to use NetApp Cloud Volumes ONTAP for quick read and write access to this volume from the cloud. FlexCache allows you to create a cache volume on a Cloud Volumes ONTAP system that is linked to an origin volume on an on-premises system. The cache volume serves the read requests from the cloud analytics application, while the write requests are forwarded to the origin volume. FlexCache reduces the latency and bandwidth consumption of accessing the on-premises data from the cloud, while maintaining data consistency and protection.

References = FlexCache overview, FlexCache documentation, FlexCache: Accelerate access to your data

NEW QUESTION # 33

.....

We all know that the importance of the NetApp Technology Solutions Professional Exam (NS0-005) certification exam has increased. Many people remain unsuccessful in its NS0-005 exam because of using invalid NS0-005 Practice Test material. If you want to avoid failure and loss of money and time, download actual NS0-005 Questions of TestsDumps.
