Microsoft Power Platform Fundamentals Sample Questions (Q22-Q27):

NEW QUESTION # 22

A company is building a model-driven app for employees to record customer orders.

The company requires that an alphanumeric customer identification number be manually recorded with each new customer record in Dataverse. The customer table is already configured.

You need to configure the customer identification number on the customer table in Dataverse.

What should you use?

- A. table
- B. relationship
- C. dataflow
- **D. column**

Answer: D

NEW QUESTION # 23

You build a flow using a template. You want to add support for additional business scenarios.

You need to ensure that the new workflow does not break existing functionality.

Which flow editing utilities should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Test	Check the new flow for any errors or warnings.	Tool
Flow Checker	Run the flow using previously processed data.	Tool
	Monitor the flow as it is running.	Tool

Answer:

Explanation:

Tools	Requirement	Tool
Test	Check the new flow for any errors or warnings.	Flow Checker
Flow Checker	Run the flow using previously processed data.	Test
	Monitor the flow as it is running.	Test

Explanation:

Box 1: Flow Checker

The Flow checker feature will promote higher quality flows by ensuring you follow best practices. By running the checker, you will be able to get answers to questions like: which areas of my flow implementation pose a performance or reliability risk?

For each issue identified, the Flow checker points to specific occurrences within the flow where improvements may be required.

And more importantly, you learn how to implement these improvements by following detailed guidance.

Box 2: Test

Box 3: Test

NEW QUESTION # 24

You plan to use Power Automate to monitor what people are saying about your company's products. You store the feedback for research and development purposes.

You need to recommend Power Automate components to use for the solution.

To answer drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Requirement	Component
action	Retrieve the top five posts from your company's Facebook page. Enter the resulting posts into the product database. Combine author and link fields into a single field. Run a flow every hour.	Component
expression		Component
service		Component
trigger		Component

Answer:

Explanation:

Components	Requirement	Component
action	Retrieve the top five posts from your company's Facebook page. Enter the resulting posts into the product database. Combine author and link fields into a single field. Run a flow every hour.	action
