Professional Reliable Plat-Admn-301 Test Objectives Supply you Practical Download Demo for Plat-Admn-301: Salesforce Certified Platform Administrator II to Study casually

When you choose to attempt the mock exam on the Salesforce Plat-Admn-301 practice software by TestBraindump, you have the leverage to custom the questions and attempt it at any time. Keeping a check on your Salesforce Certified Platform Administrator II exam preparation will make you aware of your strong and weak points. You can also identify your speed on the practice software by TestBraindump and thus manage time more efficiently in the actual Salesforce exam.

Salesforce Certified Platform Administrator II Sample Questions (Q135-Q140):

NEW QUESTION # 135

The Service team at Cloud Kicks needs a way to show the current status from the Account on the Case. This value should be on the page and is used in validation rules.

What should the administrator recommend to solve this?

- A. Create a cross-object formula.
- B. Make a Rollup Summary.
- C. Use a picklist field.
- D. Add a lookup field to Account.

Answer: A

Explanation:

A cross-object formula is a formula that references fields from related objects. The administrator can create a cross-object formula field on the Case object that displays the current status from the Account. This field can be used in validation rules and other processes. References: https://help.salesforce.com/s/articleView?id=sf.tips_on_building_formulas_cross_object_formulas.htm&type=5

NEW QUESTION # 136

Cloud Kicks (CK) completed a project in a sandbox environment and wants to migrate the changes to production. CK split the deployment into two distinct change sets. Change set 1 has new custom objects and fields. Change set 2 has updated profiles and automation.

What should the administrator consider before deploying the change sets?

- A. Automations need to be deployed in the same change set in order to be activated.
- B. Change set 2 needs to be deployed first.
- C. The Field-Level Security will not be deployed with the profiles in change set 2.
- D. Both change sets must be deployed simultaneously.

Answer: C

Explanation:

When deploying profiles using change sets, the field-level security settings are not included unless the fields themselves are also part of the change set. Therefore, the administrator should consider adding the new custom fields to change set 2 along with the profiles, or manually adjust the field-level security after deployment. htm&type=5

NEW QUESTION # 137

An administrator needs to Import a large amount of historical data (more than 100,000 records) from another system. how should the administrator import the data?

- A. Import Wizard with Add Only
- B. SOAP based API with Developer console
- C. An AppExchange package
- D. Data Loader with Bulk API Enabled

Answer: D

Explanation:

Data Loader is a tool that allows administrators to import or export large amounts of data (more than 50,000 records) from or to Salesforce using CSV files. Data Loader can be used for inserting, updating, deleting, upserting, exporting, or extracting data. Bulk API is an API that allows administrators to process large batches of records asynchronously in the background. Bulk API can handle millions of records with high performance and minimal system resources. By using Data Loader with Bulk API enabled, an administrator can import a large amount of historical data (more than 100,000 records) from another system efficiently and securely. References: https://help.salesforce.com/s/articleView?id=sf.data_loader.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.loader_api.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.bulk_api_intro.htm&type=5

NEW QUESTION # 138

The administrator at Cloud Kicks built a flow in a sandbox. After testing and validating the flow, the administrator plans to promote the flow to the production environment with a change set.

Which three considerations should the administrator be aware of when moving flows with a change set?

Choose 3 answers

- A. Flows are automatically activated upon deployment.
- B. Flows deployed are inactive and need to be manually activated.
- C. Flow allows only one version of the flow when deployed with a change set.
- D. All flow dependencies are automatically added to the change set.
- E. Deploying or redeploying a flow with change sets creates a version of the flow in the destination org.

Answer: B,D,E

Explanation:

Flows deployed with change sets are inactive by default and need to be manually activated in the destination org before they can run. Deploying or redeploying a flow with change sets creates a new version of the flow in the destination org, which preserves the previous versions and allows for rollback if needed. All flow dependencies, such as custom fields, objects, or variables, are automatically added to the change set when a flow is added

NEW QUESTION # 139

Cloud Kicks has a very large knowledge base in Salesforce. Service reps are having a hard time finding the most relevant articles because there are too many search results.

What should the administrator do to help service reps quickly narrow down the number of articles?

- A. Implement and configure Data Categories.
- B. Activate and configure Einstein Search.
- C. Delete and remove old Knowledge articles.
- D. Update Knowledge to auto-search the case's subject.

Answer: A

Explanation:

Data Categories are a way to organize and classify knowledge articles into a hierarchical structure based on topics or criteria. Data Categories can help service reps quickly narrow down the number of articles by filtering or browsing by category. Data Categories can also be used to control the visibility and access of articles for different users or roles.

NEW QUESTION # 140

.....

Having a good command of professional knowledge for customers related to this Plat-Admn-301 exam is of superior condition. However, that is not certain and sure enough to successfully pass this exam. You need efficiency and exam skills as well. Actually, a great majority of exam candidates feel abstracted at this point, wondering which one is the perfect practice material they are looking for.
