

Reliable Professional-Cloud-Architect Exam Papers, Test Professional-Cloud-Architect Dates

DOWNLOAD the newest ExamcollectionPass Professional-Cloud-Architect PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=1aDXWhSGWOQ4opEXhOeE0hqXLsG0BUJ>

Of course, when you are seeking for exam materials, it is certain that you will find many different materials. However, through investigation or personal experience, you will find ExamcollectionPass questions and answers are the best ones for your need. The candidates have not enough time to prepare the exam, while ExamcollectionPass certification training materials are to develop to solve the problem. So, it can save much time for us. What's more important, 100% guarantee to pass Google Professional-Cloud-Architect Exam at the first attempt. In addition, ExamcollectionPass exam dumps will be updated at any time. If exam outline and the content change, ExamcollectionPass can provide you with the latest information.

Our PDF version, online test engine and windows software of the Google Certified Professional - Cloud Architect (GCP) study materials have no restrictions to your usage. You can freely download our PDF version and print it on papers. Also, you can share our Professional-Cloud-Architect study materials with other classmates. The online test engine of the study materials can run on all windows system, which means you can begin your practice without downloading the Professional-Cloud-Architect Study Materials as long as there have a computer. Also, our windows software support downloading for many times. What is more, you can install our Professional-Cloud-Architect study materials on many computers. All of them can be operated normally. The three versions of Professional-Cloud-Architect study materials are excellent. Just choose them as your good learning helpers.

Test Google Professional-Cloud-Architect Dates & Professional-Cloud-Architect Reliable Exam Tips

ExamcollectionPass beckons exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our Professional-Cloud-Architect simulating exam is the best. Our effort in building the content of our Professional-Cloud-Architect study materials lead to the development of learning guide and strengthen their perfection. To add up your interests and simplify some difficult points, our experts try their best to design our Professional-Cloud-Architect Study Material and help you understand the Professional-Cloud-Architect learning guide better.

Google Certified Professional - Cloud Architect (GCP) Sample Questions (Q107-Q112):

NEW QUESTION # 107

Your application needs to process credit card transactions. You want the smallest scope of Payment Card Industry (PCI) compliance without compromising the ability to analyze transactional data and trends relating to which payment methods are used. How should you design your architecture?

- A. Create separate projects that only process credit card data.
- B. Streamline the audit discovery phase by labeling all of the virtual machines (VMs) that process PCI data.
- C. Create separate subnetworks and isolate the components that process credit card data.
- **D. Create a tokenizer service and store only tokenized data.**
- E. Enable Logging export to Google BigQuery and use ACLs and views to scope the data shared with the auditor.

Answer: D

Explanation:

<https://www.sans.org/reading-room/whitepapers/compliance/ways-reduce-pci-dss-audit-scope-tokenizing-cardholder-data-33194>

NEW QUESTION # 108

You need to set up Microsoft SQL Server on GCP. Management requires that there's no downtime in case of a data center outage in any of the zones within a GCP region. What should you do?

- A. Configure a Cloud SQL instance with high availability enabled.
- **B. Set up SQL Server Always On Availability Groups using Windows Failover Clustering. Place nodes in different zones.**
- C. Configure a Cloud Spanner instance with a regional instance configuration.
- D. Set up SQL Server on Compute Engine, using Always On Availability Groups using Windows Failover Clustering. Place nodes in different subnets.

Answer: B

Explanation:

Reference:

<https://cloud.google.com/sql/docs/sqlserver/configure-ha>

NEW QUESTION # 109

You want to enable your running Google Container Engine cluster to scale as demand for your application changes. What should you do?

- A. Option B
- **B. Option C**
- C. Option D
- D. Option A

Answer: B

NEW QUESTION # 110

For this question refer to the TerramEarth case study.

Which of TerramEarth's legacy enterprise processes will experience significant change as a result of increased Google Cloud Platform adoption.

- **A. Capacity planning, TCO calculations, opex/capex allocation**
- B. Opex/capex allocation, LAN changes, capacity planning
- C. Data Center expansion, TCO calculations, utilization measurement
- D. Capacity planning, utilization measurement, data center expansion

Answer: A

Explanation:

Reference:

Capacity planning, TCO calculations, opex/capex allocation From the case study, it can conclude that Management (CXO) all concern rapid provision of resources (infrastructure) for growing as well as cost management, such as Cost optimization in Infrastructure, trade up front capital expenditures (Capex) for ongoing operating expenditures (Opex), and Total cost of ownership (TCO)

Topic 1, JencoMart Case Study

Company Overview

JencoMart is a global retailer with over 10,000 stores in 16 countries. The stores carry a range of goods, such as groceries, tires, and jewelry. One of the company's core values is excellent customer service. In addition, they recently introduced an environmental policy to reduce their carbon output by 50% over the next 5 years.

Company Background

JencoMart started as a general store in 1931, and has grown into one of the world's leading brands known for great value and customer service. Over time, the company transitioned from only physical stores to a stores and online hybrid model, with 25% of sales online. Currently, JencoMart has little presence in Asia, but considers that market key for future growth.

Solution Concept

JencoMart wants to migrate several critical applications to the cloud but has not completed a technical review to determine their suitability for the cloud and the engineering required for migration. They currently host all of these applications on infrastructure that is at its end of life and is no longer supported.

Existing Technical Environment

JencoMart hosts all of its applications in 4 data centers: 3 in North American and 1 in Europe, most applications are dual-homed.

JencoMart understands the dependencies and resource usage metrics of their on-premises architecture.

Application Customer loyalty portal

LAMP (Linux, Apache, MySQL and PHP) application served from the two JencoMart-owned U.S. data centers.

Database

* Oracle Database stores user profiles

20 TB

Complex table structure

Well maintained, clean data

Strong backup strategy

* PostgreSQL database stores user credentials

Single-homed in US West

o No redundancy

o Backed up every 12 hours

100% uptime service level agreement (SLA)

Authenticates all users

Compute

* 30 machines in US West Coast, each machine has:

o Twin, dual core CPUs

o 32GB of RAM

Twin 250 GB HDD (RAID 1)

* 20 machines in US East Coast, each machine has:

o Single dual-core CPU

o 24 GB of RAM

Twin 250 GB HDD (RAID 1)

Storage

* Access to shared 100 TB SAN in each location

* Tape backup every week

Business Requirements

* Optimize for capacity during peak periods and value during off-peak periods

* Guarantee service availability and support

* Reduce on-premises footprint and associated financial and environmental impact.

* Move to outsourcing model to avoid large upfront costs associated with infrastructure purchase

* Expand services into Asia.

Technical Requirements

* Assess key application for cloud suitability.

* Modify application for the cloud.

* Move applications to a new infrastructure.

* Leverage managed services wherever feasible

* Sunset 20% of capacity in existing data centers

* Decrease latency in Asia

CEO Statement

JencoMart will continue to develop personal relationships with our customers as more people access the web. The future of our retail business is in the global market and the connection between online and in-store experiences. As a large global company, we also have a responsibility to the environment through 'green' initiatives and policies.

CTO Statement

The challenges of operating data centers prevents focus on key technologies critical to our long-term success. Migrating our data services to a public cloud infrastructure will allow us to focus on big data and machine learning to improve our service customers.

CFO Statement

Since its founding JencoMart has invested heavily in our data services infrastructure. However, because of changing market trends, we need to outsource our infrastructure to ensure our long-term success. This model will allow us to respond to increasing customer demand during peak and reduce costs.

NEW QUESTION # 111

Your company is designing its data lake on Google Cloud and wants to develop different ingestion pipelines to collect unstructured data from different sources. After the data is stored in Google Cloud, it will be processed in several data pipelines to build a recommendation engine for end users on the website. The structure of the data retrieved from the source systems can change at any time. The data must be stored exactly as it was retrieved for reprocessing purposes in case the data structure is incompatible with the current processing pipelines. You need to design an architecture to support the use case after you retrieve the data. What should you do?

- A. Store the data in a BigQuery table. Design the processing pipelines to retrieve the data from the table.
- B. Send the data through the processing pipeline, and then store the processed data in a Cloud Storage bucket for reprocessing.
- C. Store the data in a Cloud Storage bucket. Design the processing pipelines to retrieve the data from the bucket

- D. Send the data through the processing pipeline, and then store the processed data in a BigQuery table for reprocessing.

Answer: C

NEW QUESTION # 112

.....

You can also accelerate your career with the Google Professional-Cloud-Architect certification if you study with our Professional-Cloud-Architect actual exam questions. We are certain that with these Google Professional-Cloud-Architect real exam questions you will easily prepare and clear the Google Professional-Cloud-Architect test in a short time. The only goal of ExamcollectionPass is to help you boost the Google Professional-Cloud-Architect test preparation in a short time. To meet this objective, we offer updated and actual Google Certified Professional - Cloud Architect (GCP) Expert Professional-Cloud-Architect Exam Questions in three easy-to-use formats. These formats are Google PDF Questions file, desktop Google Professional-Cloud-Architect practice test software, and Google Professional-Cloud-Architect web-based practice exam. All these three formats of our updated Google Professional-Cloud-Architect exam product have valid, actual, updated, and error-free Professional-Cloud-Architect test questions. You can quickly get fully prepared for the test in a short time by using our Professional-Cloud-Architect pdf questions.
