Passing the test SAFe-Practitioner certification can help you realize your goal and if you buy our SAFe-Practitioner latest torrent you will pass the exam successfully. Our product boosts many merits and high passing rate. Our products have 3 versions and we provide free update of the SAFe-Practitioner Exam Torrent to you. If you are the old client you can enjoy the discounts.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q68-Q73):

NEW QUESTION # 68

The Team and Technical Agility competency describe the critical skills and _____ principles and practices that high-performing Agile teams and Teams of Agile teams use to create high-quality solutions for their customers

- A. DevOps
- B. Extreme Programming
- **C. Lean-Agile**
- D. SMART

Answer: C

NEW QUESTION # 69

What is a minimum viable product? (MVP)

- A. A Feature that can be delivered in an Iteration
- B. A minimal product that can be built to achieve market dominance
- **C. A minimal version of a new product used to test a hypothesis**
- D. A prototype that can be used to explore user needs

Answer: C

Explanation:

According to the SAFe-for-Teams-SAFE-Practitioner-6-0 documents, a minimum viable product (MVP) is an early and minimal version of a new solution sufficient to prove or disprove an epic hypothesis¹. An MVP is not a prototype, a feature, or a product. It is a learning tool that helps validate assumptions, reduce uncertainty, and increase the likelihood of building the right thing².

Therefore, the correct answer is A. A minimal version of a new product used to test a hypothesis. References: Epic - Scaled Agile Framework, What is a Minimum Viable Product (MVP)? | Agile Alliance

NEW QUESTION # 70

The analyzing step of the Portfolio Kanban system has a new Epic with a completed Lean business case.

What best describes the next step for the Epic?

- A. It will remain in the analyzing step until one or more Agile Release Trains have the capacity to implement it.
- **B. It will be moved to the ready state in the Portfolio Kanban if it receives a 'go' decision from Lean Portfolio Management.**
- C. It will be implemented once the Epic Owner approves the Lean business case.
- D. It will be implemented if it has the highest weighted shortest job first (WSJF) ranking

Answer: B

Explanation:

The Portfolio Kanban system is a method to visualize and manage the flow of portfolio Epics, from ideation through analysis, implementation, and completion¹. The analyzing step of the Portfolio Kanban system involves developing a Lean business case for the Epic and presenting it to Lean Portfolio Management (LPM) for approval¹. If the Epic receives a 'go' decision from LPM, it will be moved to the ready state in the Portfolio Kanban, where it will wait until one or more Agile Release Trains (ARTs) have the capacity to implement it¹. The other options are incorrect because:

* A. The Epic Owner does not have the authority to approve the Lean business case. Only LPM can make the final decision on whether to proceed with the Epic or not¹.

* C. The Epic will not remain in the analyzing step after receiving a 'go' decision from LPM. It will be moved to the ready state, where it will be prioritized using weighted shortest job first (WSJF) and other factors¹.

* D. The Epic will not be implemented based on its WSJF ranking alone. It will also depend on the availability and alignment of the ARTs that can deliver the Epic¹. References: 1: Portfolio Kanban - Scaled Agile Framework

NEW QUESTION # 71

The Lean Thinking principle, "make value flow without interruptions" means identifying what?

- **A. Delays**
- B. Key performance indicators
- C. Activities that lack innovation
- D. Predictability issues of the train

Answer: A

Explanation:

The Lean Thinking principle, "make value flow without interruptions" means identifying and eliminating any delays that prevent the smooth and fast movement of work product from step to step in a value stream. Delays are a form of waste that reduce the efficiency and effectiveness of the system, increase the lead time and cost, and lower the customer satisfaction. Delays can be caused by various factors, such as handoffs, queues, bottlenecks, rework, defects, approvals, dependencies, and variability. To make value flow without interruptions, SAE applies the following eight flow accelerators: Visualize and limit WIP, reduce batch sizes, and manage queue lengths Implement full test automation and continuous integration Take an economic view Apply product development flow principles Understand and exploit variability Implement fast feedback and integrated learning Build quality in Base milestones on objective evaluation of working systems References: Principle #6 - Make Value Flow Without Interruptions - Scaled Agile Framework, Accelerating Flow with SAE - Scaled Agile Framework

NEW QUESTION # 72

Which of the following areas is the main concern of the System Architect/Engineer?

- A. Content Management
- **B. Technology**
- C. Program Execution
- D. Human Resource

Answer: B

NEW QUESTION # 73

.....

Everyone has their own characteristics when they start to study our SAE-Practitioner exam questions.
