Written by meticulous and professional experts in this area, their quality has reached to the highest level compared with others' similar C-BCBTM-2509 Test Prep and concord with the syllabus of the exam perfectly. Their questions points provide you with simulation environment to practice. In that case, when you sit in the real C-BCBTM-2509 exam room, you can deal with almost every question with ease.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q10-Q15):

NEW QUESTION # 10

What are typical challenges SAP customers face in an ERP transformation?

(Note: There are 3 correct answers to this question.)

- A. Inability to generate financial reports due to a lack of data analytics capabilities
- B. Lack of transparency into processes and system landscapes
- C. Not knowing how and where to start their transformation journey
- D. Alignment between business and IT
- E. Significant reduction in product quality

Answer: B,C,D

Explanation:

According to SAP's Business Transformation Management (BTM²) and SAP Signavio Transformation Framework, the most common ERP transformation challenges are strategic alignment, starting complexity, and lack of visibility across business and IT landscapes.

"Organizations often face difficulties with aligning business and IT, defining where to start transformation efforts, and gaining transparency across processes and systems." Reference:

A - Alignment between Business and IT:

Misalignment leads to inconsistent objectives between operations and technology strategy.

"Achieving alignment between IT capabilities and business goals remains one of the biggest barriers to transformation." B - Not Knowing Where to Start:

Many organizations lack clarity on prioritization and readiness assessment.

"Determining the starting point and sequencing of transformation steps is a recurring challenge in ERP modernization projects." C - Lack of Transparency:

Without visibility into existing processes, companies struggle to identify inefficiencies or dependencies.

"Insufficient transparency across processes and system landscapes hinders effective transformation planning and execution."

Incorrect Options:

D: Financial reporting challenges are typically ERP operational issues, not transformation barriers.

E: Product quality reduction is not a standard ERP transformation issue.

Verified Correct Answers: A, B, and C.

NEW QUESTION # 11

What is the SAP Signavio Process Manager?

- A. A cloud-based tool for designing, modeling, and improving business processes.
- B. A tool for automating financial transactions in ERP systems.
- C. A software for managing customer relationships and sales pipelines.
- D. An analytics solution for process mining and data analysis.

Answer: A

Explanation:

SAP describes SAP Signavio Process Manager as a collaborative, browser-based BPM tool focused on process design and improvement:

"SAP Signavio Process Manager is a cloud-based solution to model, document, and optimize business processes collaboratively using BPMN 2.0." Reference:

Option B confuses it with a different product in the same portfolio. SAP states that process mining sits in SAP Signavio Process Intelligence (not Process Manager):

"SAP Signavio Process Intelligence is the process mining and analytics solution of the SAP Signavio portfolio." Option C refers to ERP transaction automation, which is not the scope of Process Manager. SAP positions Process Manager for process modeling and documentation, not transaction execution/automation:

"Use SAP Signavio Process Manager to design and document processes and drive process improvement; execution of transactions is handled by operational systems (e.g., ERP)." Option D is about CRM. SAP clarifies that CRM and sales pipeline management are covered by customer experience/CRM solutions, not by Process Manager:

"Process Manager provides process modeling and governance, not CRM pipeline management."

NEW QUESTION # 12

How does SAP Signavio Process Manager help with business transformations?

- A. By replacing existing ERP systems with a new workflow engine.
- B. By allowing organizations to model processes.
- C. By generating automated financial reports for management.
- D. By eliminating the need for human oversight in process execution.

Answer: B

Explanation:
SAP Signavio Process Manager is the core process modeling and design component of the SAP Signavio Business Transformation Suite. It allows organizations to visualize, document, and optimize processes as part of transformation initiatives.
"SAP Signavio Process Manager enables organizations to model, analyze, and document business processes in a collaborative environment to support transformation and continuous improvement." Reference:
Through its BPMN 2.0-based process modeling, businesses can capture current (as-is) processes, simulate new (to-be) designs, and align stakeholders for change management.
"Organizations use Process Manager to design and optimize processes before implementation in ERP systems, ensuring standardization and efficiency." Incorrect Options:
A: It does not remove human oversight; it supports collaboration and governance.
C: It does not replace ERP systems but complements them by providing modeling and process documentation.
D: Financial reporting is handled by ERP systems, not Signavio.
Verified Correct answer: B: By allowing organizations to model processes.

NEW QUESTION # 13
What primary issue does WalkMe's solution aim to solve for customers?

- A. Challenges in adopting and effectively using digital tools
- B. Need for upgrading physical infrastructure in organizations
- C. Difficulty in maintaining accurate financial records
- D. High employee turnover rates

Answer: A

Explanation:
The WalkMe Digital Adoption Platform (DAP), which is integrated into SAP's Business Transformation Management (BTM) solutions, primarily addresses the challenge of digital adoption - helping users effectively utilize enterprise software and workflows.
"WalkMe is designed to eliminate user friction with digital systems by providing contextual, in-application guidance and automation that accelerates digital adoption." Reference:
The main problem WalkMe solves is difficulty in adopting and effectively using digital tools, which directly impacts productivity, process efficiency, and transformation success.
"Organizations struggle with the complexity of modern applications; WalkMe's solution enables users to navigate and complete digital processes successfully without training dependency." Options B, C, and D do not represent the platform's focus:
WalkMe is not an HR solution to reduce turnover (B).
It does not manage physical infrastructure (C).
It does not handle financial record accuracy (D).
The central goal, as reinforced in SAP BTM documentation, is to bridge the gap between technology implementation and effective user adoption - making A the correct and verified answer.

NEW QUESTION # 14
Of the following options, which technologies does SAP provide to help organizations transform?

- A. SAP ERP and SAP CRM
- B. SAP Signavio and SAP LeanIX solutions
- C. SAP Sales and SAP HR
- D. SAP Finance and SAP Marketing

Answer: B

Explanation:
SAP enables digital transformation primarily through its Business Transformation Management (BTM) portfolio, led by SAP Signavio and SAP LeanIX. These technologies give organizations the tools to visualize, plan, and manage transformation initiatives

effectively.

"SAP helps organizations accelerate transformation with SAP Signavio for business process transformation and SAP LeanIX for enterprise architecture and technology management." Reference:

SAP Signavio enables business process analysis, mining, and optimization, while SAP LeanIX supports enterprise architecture, application portfolio management, and technology risk compliance - together offering full visibility from business to IT.

"The combination of SAP Signavio and SAP LeanIX forms the backbone of SAP's transformation offerings, aligning business process improvements with IT landscape modernization." Incorrect Options:

A, B, and C refer to standard ERP or LOB modules, not transformation-focused solutions.

Verified Correct answer: D: SAP Signavio and SAP LeanIX solutions.

NEW QUESTION # 15
