

Reliable SolarWinds SCP-NPM Test Bootcamp | Free SCP-NPM Vce Dumps

Why Choose DumpsGroup?

Choosing DumpsGroup for your SCP-NPM exam preparation offers numerous benefits. Their materials are up-to-date, reflecting the latest exam content. The SCP-NPM Dumps from DumpsGroup are meticulously prepared by experts, ensuring accuracy and relevance. By practicing with their SCP-NPM Practice Test, you can identify your strengths and areas for improvement, increasing your confidence for the exam day.

Conclusion

In conclusion, preparing for the **SolarWinds** Network Performance Monitor (NPM) Exam is a significant step towards earning your SolarWinds Certified Professional certification. Utilize resources like SCP-NPM Dumps PDF and practice tests from DumpsGroup to ensure your success. Don't forget to use the coupon code "**SAVE20**" to get a **20% discount**. Achieving this certification not only validates your skills but also enhances your career opportunities in the IT and networking fields. Start your preparation today and unlock new career heights with the SCP-NPM certification.

SCP-NPM pdf dumps carry real SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) exam questions which are printable. It means candidates can take printed actual questions to any place. Furthermore, the SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) PDF dumps format is also portable. Therefore, you can access this valid SolarWinds SCP-NPM questions PDF document on tablets, smartphones, and laptops.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Exam is a certification exam designed to test the knowledge and skills of network professionals in using SolarWinds Network Performance Monitor (NPM). SolarWinds NPM is a comprehensive network monitoring and management tool that helps network administrators monitor network performance, troubleshoot issues, and optimize network operations. The SCP-NPM Exam is intended to validate the proficiency of network professionals in using the SolarWinds NPM software.

Free SCP-NPM Vce Dumps & Latest SCP-NPM Test Labs

If you are lack of skills in the preparation of getting the certification, our SCP-NPM study materials are the best choice for you.

Many people have successfully realized economic freedom after getting the SCP-NPM certificate and changing a high salary job. So you need to act from now, come to join us and struggle together. Our SCP-NPM Study Materials will help you change into social elite and you will never feel disappointed.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q76-Q81):

NEW QUESTION # 76

You added a device for NPM to monitor. You can see CPU and memory statistics, but want to see a statistic that NPM does not support out of the box. Which features can you use to collect the statistics you want from the device? (Choose all that apply.)

- A. Universal Device Pollers (UnDP)
- B. Application monitor templates
- C. Device templates
- D. Manage Pollers in Device Studio

Answer: A,D

Explanation:

If you want to see a statistic that NPM does not support out of the box, you can use the Manage Pollers feature in Device Studio or the Universal Device Pollers (UnDP) feature to collect the statistics you want from the device. Both features allow you to create custom monitors for almost any statistic provided by SNMP based on its Management Information Base (MIB) and object identifier (OID). You can also assign the custom pollers to specific devices, view the polled data in the Orion Web Console, and use the data in alerts and reports. The difference between the two features is that Manage Pollers is a web-based interface that simplifies the creation and management of custom pollers, while UnDP is a standalone application that offers more advanced options and flexibility. Device templates and application monitor templates are not features that can be used to collect custom statistics from devices, as they are predefined sets of monitors for specific device types or applications that NPM supports out of the box.

Reference:

Define a custom statistic to monitor in the NPM

Manage pollers using Device Studio

[Monitor custom statistics based on OIDs with Universal Device Pollers]

NEW QUESTION # 77

You can apply Universal Device Pollers to which object types? (Choose all that apply.)

- A. Applications
- B. Interfaces
- C. Volumes
- D. Nodes

Answer: B,C,D

Explanation:

Universal Device Pollers (UnDPs) are custom pollers that allow you to monitor specific aspects of your network devices using SNMP. You can apply UnDPs to any object type that supports SNMP polling, such as interfaces, nodes, and volumes. You cannot apply UnDPs to applications, because they are not SNMP-based objects. Applications are monitored using Application Performance Monitor (APM), which uses different methods, such as WMI, scripts, or agents, to collect data. Reference: Monitor custom statistics based on OIDs with Universal Device Pollers in NPM, Assign Universal Device Pollers to devices monitored in NPM, Add and assign Universal Device Pollers

NEW QUESTION # 78

You can apply Universal Device Pollers to which object types? (Choose all that apply.)

- A. Applications
- B. Interfaces
- C. Volumes
- D. Nodes

Answer: B,C,D

Explanation:

Universal Device Pollers (UnDPs) are custom pollers that allow you to monitor specific aspects of your network devices using SNMP. You can apply UnDPs to any object type that supports SNMP polling, such as interfaces, nodes, and volumes. You cannot apply UnDPs to applications, because they are not SNMP-based objects. Applications are monitored using Application Performance Monitor (APM), which uses different methods, such as WMI, scripts, or agents, to collect data. References: Monitor custom statistics based on OIDs with Universal Device Pollers in NPM, Assign Universal Device Pollers to devices monitored in NPM, Add and assign Universal Device Pollers

NEW QUESTION # 79

You want to create an alert that notifies you when packet loss meets or exceeds 50%, but only for a select set of nodes in your network. How do you accomplish this?

- A. Set the alert trigger evaluation to evaluate nodes to be included in the alert
- B. Set the scope of the alert to only apply to nodes to be included in the alert
- C. Create separate SWQL trigger condition for each node to be included in the alert
- D. Set an alert limitation for the nodes to be included in the alert

Answer: D

NEW QUESTION # 80

What is required of your nodes to detect duplex mismatches? (Choose all that apply.)

- A. Unify the duplex mode configuration on neighboring interfaces
- B. Ensure corresponding values for each interface are different
- C. The nodes must support topology and be interconnected
- D. Duplex of both devices must be identified as full or half

Answer: B,D

NEW QUESTION # 81

.....

Compared with those practice materials which are to no avail and full of hot air, our SCP-NPM guide tests outshine them in every aspect. If you make your decision of them, you are ready to be thrilled with the desirable results from now on. All exam candidates are awfully sure of our SCP-NPM practice materials and when they meet other needs of the exam, they would rather be our regular buyers. We are sure of anyone who wants to pass the exam as well as our SCP-NPM question materials. We will continue making our sublime materials more useful by keeping adding useful knowledge of this exam into them.
