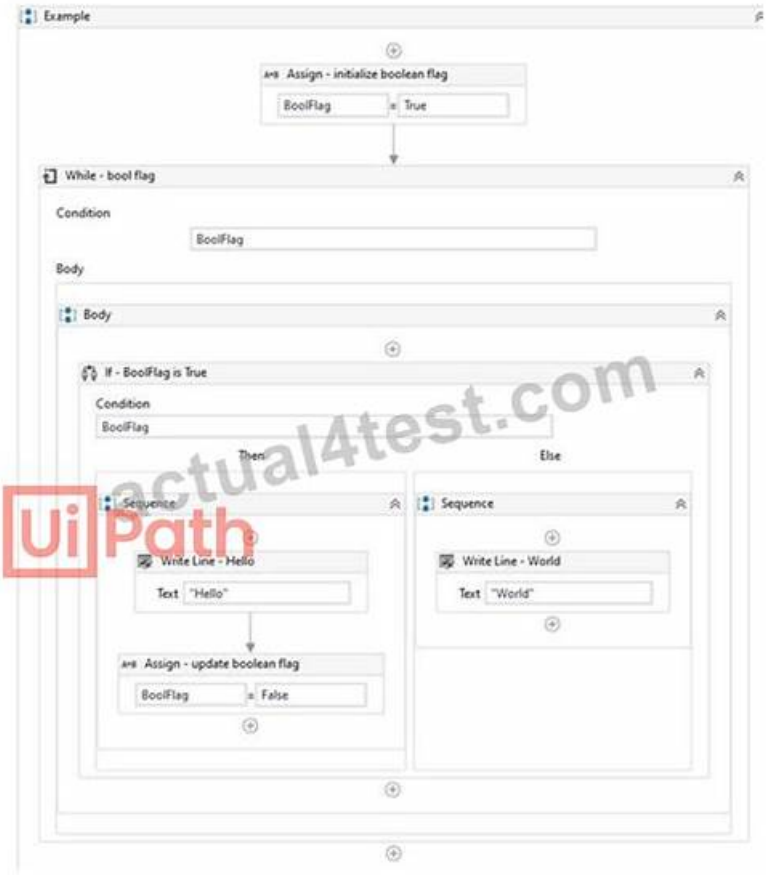
# Reliable UiPath UiPath-ADAv1 Real Test | UiPath-ADAv1 Test Dumps Demo



BTW, DOWNLOAD part of PrepAwayETE UiPath-ADAv1 dumps from Cloud Storage: https://drive.google.com/open?id=1z2NcAb9TCbzBa2Xo1yds6AQCCYSPHMl0

We will offer the preparation for the UiPath-ADAv1 training materials, we will also provide you the guide in the process of using. The materials of the exam dumps offer you enough practice for the UiPath-ADAv1 as well as the knowledge points of the UiPath-ADAv1 exam, the exam will bacome easier. If you are interested in the UiPath-ADAv1 training materials, free demo is offered, you can have a try. And the downloding link will send to you within ten minutes, so you can start your preparation as quickly as possible. In fact, the outcome of the UiPath-ADAv1 Exam most depends on the preparation for the UiPath-ADAv1 training materials. With the training materials, you can make it.

## UiPath UiPath-ADAv1 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Platform Knowledge: The section provides an overview of UiPath's product suite, including Studio and Robot variants, Orchestrator, and Integration Service, showcasing their unique contributions. It also emphasizes the benefits of Academy, Forum, and Marketplace in the UiPath ecosystem. |
| Topic 2 | • Integration Service: The section introduces Integration Service, explaining its purpose and demonstrating the use of connectors and triggers in automation projects to interact with external systems. |
| Topic 3 | • Workflow Analyzer: Here, the topic introduces the Workflow Analyzer tool, explaining its use for project analysis and validation, and providing guidance on configuring its settings. |
| Topic 4 | • Excel Automation: The section delves into Excel Automation, showcasing the use of modern Excel activities and workbook-level operations. |

| | |
|---|---|
| Topic 5 | • Libraries and Templates: This topic covers the creation, publication, and consumption of process libraries, along with the sharing and access of templates, promoting efficient project development and standardization. |
| Topic 6 | • Variables and Arguments: This topic introduces data types and delves into creating, managing, and utilizing variables, arguments, and global constants<br>• variables. It also clarifies the distinctions between these concepts, ensuring a comprehensive understanding of data handling in automation projects. |
| Topic 7 | • Working with Files and Folders: Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation. |
| Topic 8 | • Exception Handling: This topic focuses on error management, showcasing the use of Try Catch, Throw, and Rethrow activities, along with the Retry Scope feature, to handle exceptions gracefully. |
| Topic 9 | • Object Repository: This topic covers the creation, publication, and consumption of UI Libraries, including the use of static and dynamic descriptors, offering a structured approach to UI element management. |
| Topic 10 | • Data Manipulation: This topic covers a range of data manipulation techniques, including string manipulation using VB.Net methods and the RegEx Builder. It also guides users through working with arrays, lists, and dictionaries, as well as building and iterating through DataTables. |
| Topic 11 | • Logging: The section provides insights into interpreting robot execution logs and adhering to logging best practices, ensuring effective issue identification and resolution. |
| Topic 12 | • Version Control Integration: The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches. |
| Topic 13 | • Studio Interface: Here, the topic guides users through installing Studio Community Edition and connecting to Orchestrator. It covers profile differences, backstage view options, compatibility modes, and package management. Additionally, it offers an in-depth exploration of the Studio interface and its various elements. |
| Topic 14 | • Business Knowledge: This topic covers the fundamental concepts of business process automation, highlighting its value proposition. It also explores key ideas related to business processes, offering a comprehensive understanding of this domain. |
| Topic 15 | • Control Flow: The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others. |
| Topic 16 | • Implementation Methodology: The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development. |
| Topic 17 | • Debugging: Here, we explore various debugging techniques, including debug modes, actions, and ribbon options. It also guides users through setting breakpoints, utilizing debugging panels, and optimizing performance with profile execution. |
| Topic 18 | • Email Automation: This topic covers retrieving emails via IMAP<br>• POP3, sending SMTP messages, and managing integrations with Microsoft and Gmail accounts, utilizing their respective packages. |

## UiPath-ADAv1 Test Dumps Demo - UiPath-ADAv1 Valid Test Dumps

By propagating all necessary points of knowledge available for you, our UiPath-ADAv1 practice materials helped over 98 percent of former exam candidates gained successful outcomes as a result. Our UiPath-ADAv1 practice materials have accuracy rate in proximity to 98 and over percent for your reference. Up to now we classify them as three versions. They are pdf, software and the most convenient one app. Each of them has their respective feature and advantage including new information that you need to know to pass the test.

## UiPath Automation Developer Associate v1 Exam Sample Questions (Q131-Q136):

**NEW QUESTION # 131**
While working in an RPA testing project, you encountered the following activity in one of the workflows included in the project.

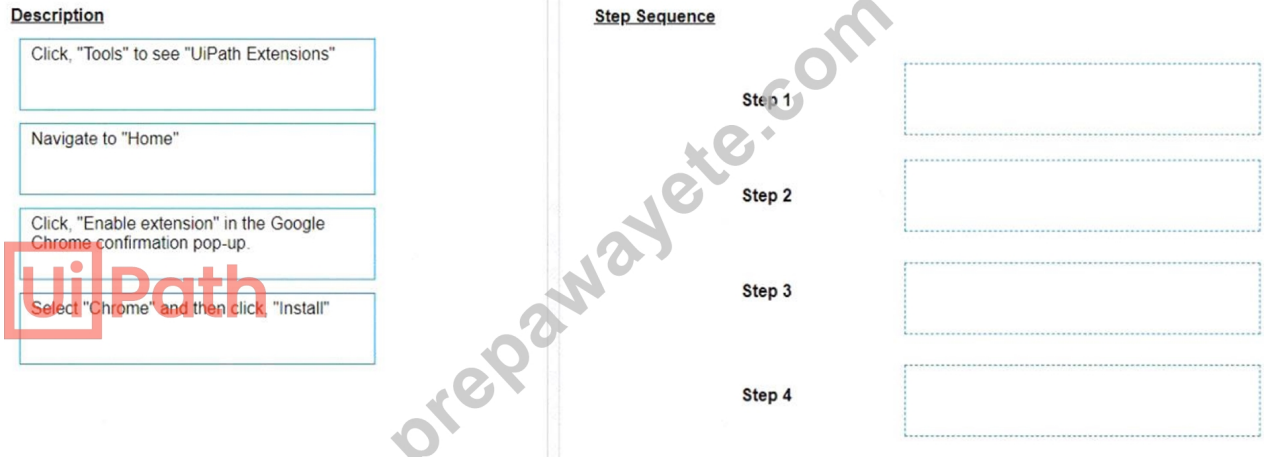
What action can you perform in your mocked file to replace the functionality of the MessageBox with a LogMessage during mock testing?

- A. Surround activity with mock.
- B. Remove mock activity.
- C. Synchronize mock.
- D. Create mock workflow.

**Answer: A**

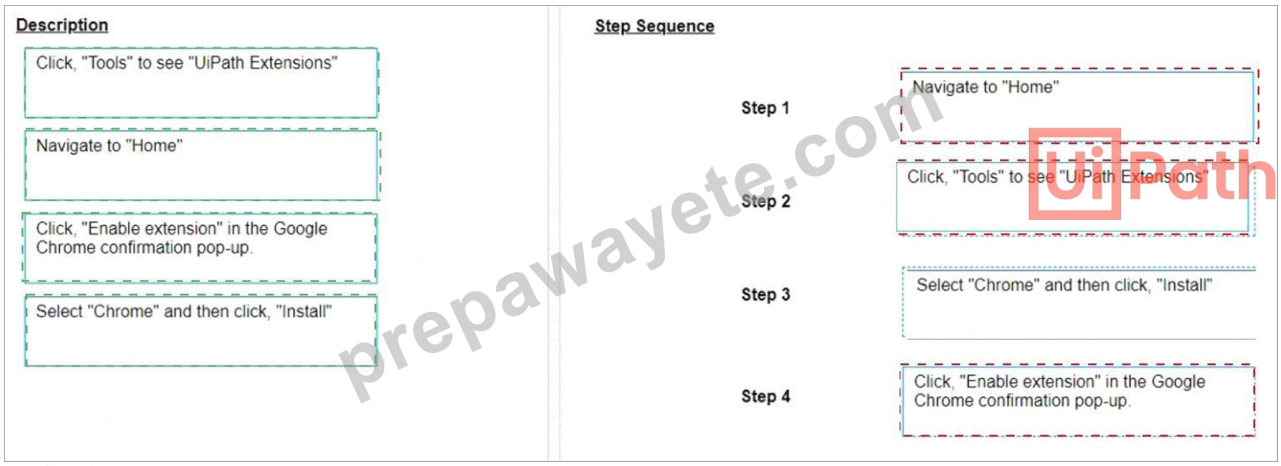
Explanation:
The Surround activity with mock option is used to create a mock activity that wraps around the original activity in the workflow. The mock activity can have different properties and actions than the original activity, depending on the testing scenario. In this case, the MessageBox activity can be surrounded with a mock activity that has the LogMessage action. This will replace the functionality of the MessageBox with a LogMessage during mock testing, which can be useful for logging the test results without interrupting the workflow execution. (UiPath Studio documentation1) References:
1: Configuring Activity Project Settings - UiPath Studio.

**NEW QUESTION # 132**
A developer loaded an existing workflow that uses Ul Automation in Google Chrome. The Google Chrome extension has not been installed on the developer's machine How should the developer load the Google Chrome extension from UiPath Studio?
Instructions: Drag the Description found on the left and drop on the correct Step found on the right.



**Answer:**

Explanation:



prepawayete.com

Explanation:
The developer can load the Google Chrome extension from UiPath Studio by following these steps:
* Step 1 = Navigate to Home in UiPath Studio. This is the section where you can create, open, or manage your projects.
* Step 2 = Click Tools to see UiPath Extensions. This is the section where you can install or update various extensions for different applications or browsers.
* Step 3 = Select Chrome and then click Install. This will launch the Chrome browser and redirect you to the Chrome Web Store page for the UiPath extension.
* Step 4 = Click Enable extension in the Google Chrome confirmation pop-up. This will add the UiPath extension to your browser and allow you to use UI automation activities in Chrome.

**NEW QUESTION # 133**
What is the functionality of the Include Subfolders filter in the Monitoring pages when a modern folder is selected?

- A. It enables you to sort the displayed data based on job priorities.
- B. It allows you to select whether the contents of the selected folder's subfolders are displayed.
- C. It allows you to choose between background and foreground processes for the displayed data.
- D. It allows you to allocate licenses per machine for the displayed data.

**Answer: B**

Explanation:
Explanation
The Include Subfolders filter is a toggle button that appears in the Monitoring pages when a modern folder is selected from the Folders drop-down list1. The modern folders are folders that can have subfolders and support role-based access control2. The Include Subfolders filter allows you to choose whether to display the data for the selected folder only, or for the selected folder and all its subfolders3. This filter applies to the Jobs, Queues, Triggers, and Robots pages4. The Include Subfolders filter helps you to monitor and manage the processes and resources across different levels of folders.

**NEW QUESTION # 134**
Which activity can be used to transition a Background Process to Foreground?

- A. Use Foreground
- B. Activate
- C. Maximize Window
- D. Set Focus

**Answer: A**

Explanation:
The Use Foreground activity can be used to transition a Background Process to Foreground. It allows you to perform UI automation tasks that require user interaction or visibility1. The other activities are not suitable for this purpose.

**NEW QUESTION # 135**
What is a function of unattended robots?

- A. Unattended robots only run on a workstation operated by a human.
- B. Unattended robots can only work if they are not connected to Orchestrator.
- C. Unattended robots must be triggered manually.
- D. Unattended robots can run independently without human interaction.

**Answer: D**

Explanation:
Unattended robots are designed to run without human interaction. They can be triggered by events, schedules, or via a command from Orchestrator and are capable of executing processes independently. This is particularly useful for batch processing or automations that need to run at specific times without requiring a human to initiate them. Hence, the correct answer is D.

**NEW QUESTION # 136**
