NEW QUESTION # 28

Which of the following applies in a Greenfield deployment scenario when migrating configurations from your test site?

- A. If any configuration type fails during the migration process, you cannot create a new migration request.
- B. You can revert migrated configurations from the target site.
- C. The status changes to Complete when migration is finished.
- D. You cannot make other configuration updates in ICM when a migration operation is in progress.

Answer: C,D

Explanation:

During Greenfield migrations using the Intelligent Configuration Manager (ICM), no other configuration updates can be made in ICM while a migration operation is active to ensure stability and consistency of the migration bundle. Additionally, once the migration finishes successfully, the status updates to

"Complete", indicating the configuration is fully migrated and applied.
