NEW QUESTION # 101

What is the best measure of progress for complex system development?

- A. System Demo
- B. Inspect and Adapt
- C. Iteration Review
- D. Prioritized backlog

Answer: A

Explanation:

The system demo is the best measure of progress for complex system development because it provides an integrated, comprehensive view of the new features delivered by the Agile Release Train (ART) over the past iteration. The system demo offers the ART a fact-based measure of current, system-level progress within the Program Increment (PI). It also allows the stakeholders to give feedback on the solution's fitness for purpose and alignment with the vision. The system demo tests and evaluates the complete solution in a production-like context to receive feedback from stakeholders, including Business Owners, executive sponsors, other Agile Teams, development management, and customers (and their proxies).
