Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) Exam is a certification exam that assesses an individual's knowledge and understanding of the Scaled Agile Framework (SAFe) methodology. The SAFe methodology is a widely used framework for scaling agile practices across large organizations. SAFe-Practitioner exam is designed to test an individual's ability to implement SAFe practices in a real-world setting.

To prepare for the SAFe 5 Practitioner (SP) Certification Exam, individuals can take a variety of training courses. These courses cover the fundamental principles of Agile and SAFe, as well as the practical application of these principles in a SAFe environment. They also provide individuals with the necessary knowledge to pass the exam.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q168-Q173):

NEW QUESTION # 168

Which of the following is the recommended approach to create T-shaped skills on the ART?

- A. Cross-training
- **B. All of the above**
- C. Pair-programming
- D. rotating team members between different teams

Answer: B

NEW QUESTION # 169

A User Story includes which three things? (Choose three.)

- **A. What**
- B. Level of Risk
- C. Definition of Done
- **D. Who**
- E. How
- **F. Why**

Answer: A,D,F

Explanation:

A user story is a short description of a small piece of desired functionality written from the user's perspective and in their language. A user story has three primary components, each of which begin with the letter 'C':

Card, Conversation, and Confirmation. The card is a written or digital note that captures the essence of the user story using the format: "As a (who), I want (what), so that (why)." The conversation is the ongoing dialogue between the team and the customer or product owner to elaborate and refine the user story details. The confirmation is the set of acceptance criteria and tests that verify the user story is done and meets the customer's expectations¹². NEW QUESTION # 170

During which PI planning activity are Stories written and sequenced?

- A. The draft plan review
- B. The business context presentation
- **C. The team breakout session**
- D. The management Review and Problem-Solving workshop

Answer: C

Explanation:

During the team breakout session, each team creates and estimates their Stories, and sequences them into a draft plan for the upcoming PI. This is where the team backlog is refined and prioritized, and dependencies are identified and resolved.
