## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q75-Q80):

### NEW QUESTION # 75

What is the benefit of separating release elements from the Solution?

- A. It allows the Agile Release Train to demo value every two weeks
- B. It allows the Systems Team to integrate with ease
- **C. It allows the release of different Solution elements at different times**
- D. It allows Agile Teams to launch untested Features

**Answer: C**

Explanation:

n: = Separating release elements from the Solution means identifying specific release elements, such as Features or components, that can be released independently of the entire Solution. This technique provides several benefits, such as1:

- \* It enables faster delivery of value to customers by releasing the most important or urgent elements first
- \* It reduces the risk of releasing complex or interdependent elements that may cause errors or failures
- \* It allows for more flexibility and responsiveness to changing customer needs and market conditions
- \* It supports continuous integration and deployment by allowing smaller and more frequent releases

### NEW QUESTION # 76

How does SAFe provide a second operating system that enables Business Agility?

- A. By creating a hierarchy to provide stability
- B. By organizing around functional areas to focus on skills development
- **C. By focusing on customers, products, innovation, and growth**
- D. By achieving economies of scale

**Answer: C**

Explanation:

SAFe provides a second operating system that enables Business Agility by creating a network of Agile teams and trains that are aligned to a common vision and strategy, and empowered to deliver value to customers and users. SAFe leverages the Lean-Agile mindset, the core competencies, and the principles and practices to foster a culture of innovation, learning, and collaboration. SAFe also supports the continuous delivery pipeline, which enables fast feedback and frequent value delivery. ### NEW QUESTION # 77

What is the goal of the PI Planning event?

- A. Create a plan for the upcoming PI showing how Stories map to Iterations
- B. Identify the risks in the upcoming Features using a ROAMing exercise
- **C. Achieve alignment on what needs to and can be built**
- D. Build a release Roadmap

**Answer: C**

Explanation:

The PI Planning event is a two-day event that brings together all the teams and stakeholders of an Agile Release Train (ART) to align on a common vision, mission, and goals for the upcoming Program Increment (PI). The goal of the PI Planning event is to achieve alignment on what needs to and can be built by the ART in the next PI, based on the business context, customer needs, and technical

dependencies. The PI Planning event also fosters collaboration, communication, and commitment among the teams and stakeholders, and helps identify and address the risks and impediments that may affect the delivery of value. References: Exam Study Guide: SP (6.0) - SAFe Practitioner, [PI Planning]

### NEW QUESTION # 78

Which team type is organized to assist other teams with specialized capabilities and help them become more proficient in new technologies?

- A. Complicated subsystem team
- **B. Enabling team**
- C. Platform team
- D. Stream-aligned team

#### Answer: B

Explanation:

Enabling teams are one of the four team topologies defined by Skelton and Pais in their book Team Topologies. They are organized to assist other teams with specialized capabilities and help them become more proficient in new technologies. They provide guidance, coaching, and mentoring to stream-aligned teams, platform teams, or complicated subsystem teams, and help them adopt new practices, tools, or frameworks.

They also collaborate with them to deliver specific features or components that require their expertise.

Enabling teams are temporary and dissolve once their mission is accomplished or no longer needed. References: Organizing Agile Teams and ARTs: Team Topologies at Scale, Team Topologies at Scale: A Worked Example, Exam Study Guide: SP (6.0) - SAFe Practitioner

### NEW QUESTION # 79

What is one approach to unlock the intrinsic motivation of knowledge workers?

- A. Reduce work in process (WIP) limits
- B. Centralize decision-making
- C. Strive to achieve a state of continuous flow
- **D. Provide autonomy**

#### Answer: D

Explanation:

Providing autonomy is one approach to unlock the intrinsic motivation of knowledge workers. Autonomy means giving knowledge workers the freedom and responsibility to make decisions about their work, such as how to do it, when to do it, and who to do it with. Autonomy fosters a sense of ownership, empowerment, and self-determination, which are essential for creativity and innovation. Autonomy also supports the Lean-Agile principle of decentralizing decision-making, which enables faster and better outcomes. SAFe provides several mechanisms to enable autonomy for knowledge workers, such as self-organizing and self-managing Agile teams, ARTs and Solution Trains, Communities of Practice, and Innovation and Planning Iterations.
