Attract users interested in product marketing to know just the first step, the most important is to be designed to allow the user to try before buying the SAFe-Practitioner study training materials, so we provide free pre-sale experience to help users to better understand our SAFe-Practitioner Exam Questions. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of SAFe-Practitioner latest questions to download.

Scrum is a widely recognized method for Agile project management. It is used worldwide by software development, marketing, real estate, construction, and even law firms. The Scrum Alliance has developed the Scrum Alliance Certified ScrumMaster (CSM)

certification, which sets a high standard for the practice of Scrum. However, with the increasing demand for Agile methodologies in bigger companies, the Scrum Alliance decided to update and extend its certificate program by introducing the SAFe-Practitioner (SAFe 5 Practitioner (SP)) Certification.

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) Certification Exam is a globally recognized certification program designed to assess the skills and knowledge of individuals in implementing and executing Agile methodologies within an organization. SAFe Practitioner Exam (6.0) certification exam is based on the Scaled Agile Framework (SAFe) which is a methodology for implementing Agile practices at an enterprise level. The SAFe 5 Practitioner (SP) certification exam is intended for Agile professionals who are seeking to improve their knowledge and skills in implementing Agile methodologies and practices in large-scale organizations.

The SAFe 5 Practitioner (SP) Exam is designed to validate the knowledge and skills of individuals who are looking to become practitioners of the Scaled Agile Framework (SAFe). SAFe Practitioner Exam (6.0) certification exam is administered online, and it focuses on the skills required to implement SAFe principles and practices in an organization. The SP certification is ideal for individuals who are looking to lead agile transformations, as it helps them develop the skills needed to be successful in this role.

What's more, you will enjoy one year free update after purchase of SAFe-Practitioner practice cram.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q237-Q242):

NEW QUESTION # 237

What is one of the dimensions of Lean-Agile Leadership?

- A. Support organizational change
- **B. Mindset and Principles**
- C. Relentless improvement
- D. Emotional Intelligence

Answer: B

Explanation:

= Mindset and Principles is one of the three dimensions of Lean-Agile Leadership, along with Leading by Example and Leading the Change. Mindset and Principles refers to how leaders embed the Lean-Agile way of working in their beliefs, decisions, responses, and actions. Leaders model the expected norm throughout the organization by learning and applying the SAFe Core Values, Lean-Agile Mindset, and SAFe Principles. NEW QUESTION # 238

What is the purpose of building a continuous delivery pipeline?

- A. To prioritize development speed over system stability
- B. To prioritize system stability over development speed
- **C. To deliver new functionality more frequently than with traditional processes**
- D. To identify key stakeholders within the system architecture

Answer: C

Explanation:

The purpose of building a continuous delivery pipeline is to enable a streamlined and automated process of delivering software value to the end users. A continuous delivery pipeline consists of four aspects: continuous exploration, continuous integration, continuous

deployment, and release on demand. These aspects work together to support the delivery of small batches of new functionality, which are then released to fulfill market demand. Building and maintaining a continuous delivery pipeline allows each Agile Release Train (ART) to deliver new functionality to users far more frequently than with traditional processes, which often involve long and complex release cycles. By delivering value more frequently, the ART can respond faster to customer feedback, reduce waste, improve quality, and increase business agility. NEW QUESTION # 239

According to the Agile Manifesto, the highest priority is to satisfy the customer through early and continuous delivery of _____ software.

- A. cheap
- B. Working
- C. valuable
- D. optimal

Answer: C

NEW QUESTION # 240

What team level event has its focus mostly on the next Iteration, but it allows time to discuss future Iterations and even Features for the next PI?

- A. Backlog Refinement Session
- B. Iteration Review
- C. Daily standup
- D. Iteration Retrospective

Answer: A

NEW QUESTION # 241

What is used to describe functional and non-functional requirements?

- A. Milestones
- B. Architectural Runway
- C. Enablers
- D. Features

Answer: D

Explanation:

Features are used to describe functional and non-functional requirements in SAFe. Features are services that fulfill stakeholder needs and deliver value to the customer. They are typically 10-12 weeks of development effort and can span multiple iterations. Features are derived from the Program Backlog and are prioritized by the Product Management. Features are also used to define the PI Objectives and measure the business value delivered by the Agile Release Train (ART).
