We are engaged in IT certification examinations guide torrent many years, most our products are similar with the real test. Normally questions quantity of our Scrum SAFe-Practitioner guide torrent materials are more than the real test. Sometimes candidates may doubt why our questions are more than the real test. Our SAFe-Practitioner Guide Torrent materials are not only including a part of real test questions but also a part of practice questions, buyers can master exam key knowledge better.

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) Exam is a certification program designed for Agile professionals who want to demonstrate their knowledge and expertise in implementing the Scaled Agile Framework (SAFe) methodology. SAFe Practitioner Exam (6.0) certification program provides a comprehensive understanding of the SAFe methodology, including its principles, practices, and key concepts. By passing SAFe-Practitioner exam, professionals can validate their skills and knowledge in implementing SAFe practices within their organization.

The SAFe 5 Practitioner Exam is the second level in the SAFe certification path. It covers the SAFe® 5.0 Framework and the role of SAFe Practitioners in its implementation. SAFe-Practitioner Exam takers must have prior SAFe experience, Scrum experience, and should be familiar with Agile methodologies. SAFe 5 Practitioner Exam certification is a prerequisite for higher-level SAFe certifications such as SAFe-Advanced Scrum Master (SASM) or SAFe-Release Train Engineer (RTE).

The SAFe 5 Practitioner certification exam is a computer-based exam that consists of 45 multiple-choice questions. SAFe-

Practitioner exam duration is 90 minutes, and the passing score is 35 out of 45 (77%). SAgile-Practitioner exam fee includes one attempt, and candidates can retake the exam by paying an additional fee. SAgile-Practitioner Exam is conducted by Scaled Agile, Inc., which is the certifying body for SAgile certifications.

Scrum SAgile Practitioner Exam (6.0) Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which statement is true about the purpose of a work in process constraint?

- A. It identifies possible constraints for Solution completion
- B. It captures where all new "big" ideas come from
- **C. It encourages collaboration and enables flow**
- D. It helps analyze, approve, and track Portfolio Epics and Enablers

Answer: C

Explanation:

According to the SAgile for Teams SP (6.0) - SAgile Practitioner handbook and study guide, a work in process (WIP) constraint is a limit on the amount of work that can be done at any stage of the value stream. The purpose of a WIP constraint is to reduce the batch size, manage the queue length, and improve the flow of value. By limiting the WIP, teams can focus on completing the most important work items, collaborate more effectively, and deliver value faster and more frequently. A WIP constraint also helps teams identify and resolve bottlenecks, reduce waste, and increase quality. References: Exam Study Guide: SP (6.0) - SAgile Practitioner, SAgile for Teams - Know Your Role on an Agile Team, [Visualize and limit WIP, reduce batch sizes, and manage queue lengths]

NEW QUESTION # 30

What does the Continuous Delivery Pipeline enable?

- A. Scheduled Releases
- **B. Release on Demand**
- C. Quarterly Release
- D. Annual Release

Answer: B

NEW QUESTION # 31

What is the product vision?

- **A. A method for aligning to the product direction**
- B. The user stories required to meet customer needs
- C. An explanation of the architectural runway needed to deliver products to the customer
- D. A set of prioritized Features

Answer: A

Explanation:

The product vision is a description of the future state of the product or service under development. It reflects customer and stakeholder needs, as well as the features and capabilities proposed to meet those needs. The product vision is both aspirational and achievable, providing the broader context and purpose of the product or service. It describes the markets, customer segments, user needs, and how the product or service will be different from the competition. The product vision is owned by the product owner, but its development requires input from stakeholders and the scrum team(s). The product vision helps align the team to the product direction and motivates them to deliver value to the customers and stakeholders. NEW QUESTION # 32

It is recommended to use the same layout and colours for planning boards in order to create shared

understanding and transparency.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 33

On the seventh day of the Iteration, the team realizes that they will not complete 5 of the 13 Stories. The Product Owner (PO) says she cannot negotiate the scope of the remaining Stories any further. What is the PO's best course of action?

- A. Defer acceptance testing to the next Iteration
- B. Have an emergency Iteration Planning meeting
- C. Stop the current Iteration and plan a new Iteration with the new knowledge
- D. Communicate the status of the Iteration to all stakeholders

Answer: D

Explanation:

The PO's best course of action is to communicate the status of the Iteration to all stakeholders, including the other teams on the Agile Release Train (ART), the Release Train Engineer (RTE), the System Architect /Engineer, the Product Management, and the Business Owners. This will help to align expectations, manage dependencies, and mitigate risks. The PO should also collaborate with the team and the stakeholders to prioritize the remaining work and identify the most valuable Stories to deliver by the end of the Iteration. The PO should not defer acceptance testing to the next Iteration, as this would violate the Definition of Done and compromise the quality of the system increment. The PO should not have an emergency Iteration Planning meeting, as this would disrupt the cadence and synchronization of the ART and waste time and resources. The PO should not stop the current Iteration and plan a new Iteration with the new knowledge, as this would also disrupt the cadence and synchronization of the ART and create confusion and uncertainty.
