Salesforce Analytics-DA-201 Exam Dumps Free, Analytics-DA-201 Valid Exam Labs

What's more, part of that iPassleader Analytics-DA-201 dumps now are free: https://drive.google.com/open?id=1OWh8ZW8j52V65Q3H525Vk2YJ7kswFCFv

The research and production of our Analytics-DA-201 exam questions are undertaken by our first-tier expert team. The clients can have a free download and tryout of our Analytics-DA-201 test practice materials before they decide to buy our products. They can use our products immediately after they pay for the Analytics-DA-201 Test Practice materials successfully. There are so many advantages of our Analytics-DA-201 learning guide that we can't summarize them with several simple words. You'd better look at the introduction of our Analytics-DA-201 exam questions in detail as follow by yourselves.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S • 4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.
Topic 2	• Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S • 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.
Topic 3	• ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S • 4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.

Topic 4	• ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.

You can use your smart phones, laptops, the tablet computers or other equipment to download and learn our Analytics-DA-201 learning dump. Moreover, our customer service team will reply the clients' questions patiently and in detail at any time and the clients can contact the online customer service even in the midnight. The clients at home and abroad can purchase our Analytics-DA-201 Certification Questions online. Our service covers all around the world and the clients can receive our Analytics-DA-201 study practice guide as quickly as possible.

Salesforce Certified Tableau Data Analyst Sample Questions (Q113-Q118):

NEW QUESTION # 113
You have a data source that contains the following columns.

Name	Data type
Order Date	Date
Region	String
State	String
City	String
Sales	Number (decimal)
Profit	Number (decimal)

You have the following view that shows the percentage of total sales by category:

Region	Category	2019	2020	2021	2022
Central	Furniture	20.09%	21.73%	31.00%	27.18%
	Office Supplies	22.15%	15.24%	27.42%	35.19%
	Technology	19.91%	24.54%	29.85%	25.70%
East	Furniture	22.68%	25.84%	22.27%	29.22%
	Office Supplies	17.50%	20.76%	30.07%	31.67%
	Technology	17.16%	22.59%	27.36%	32.89%
South	Furniture	22.99%	20.55%	23.80%	32.66%
	Office Supplies	20.66%	24.87%	22.81%	31.65%
	Technology	34.23%	10.76%	24.89%	30.13%
West	Furniture	19.83%	22.57%	29.22%	28.39%
	Office Supplies	23.93%	17.14%	21.59%	37.34%
	Technology	17.84%	17.90%	26.18%	38.08%

You want to change the calculation to show the percentage of total sales within the categories of every region annually. Which Compute Using option should you use? (Click the appropriate Option in the Answer Area.)

NEW QUESTION # 114

You plan to publish a workbook to Tableau Server.

You want to ensure that users can see other published dashboards from their current dashboard.

Which setting should you configure? (Click the appropriate Option in the Answer Area.)

Answer:

Explanation:

Answer Area

Explanation:

To achieve the requirement of letting users navigate between different published dashboards directly from their current dashboard, you need to enable the "Show sheets as tabs" option. This setting allows each sheet in your workbook, including dashboards, to be displayed as a tab, making it easy for users to switch between different views or dashboards within the same published workbook. Here is the option you should configure:

* Check the Show sheets as tabs checkbox in the 'More Options' section.

This action will ensure that all sheets, when published to the Tableau Server, appear as tabs, facilitating user navigation across multiple dashboards included in the workbook.

NEW QUESTION # 115

You have the Mowing two tables that contains data about the books in a library.

Both tables are incomplete so there are books missing from the tables.

You need to combine the tables. The solution must ensure that all the data is retained Which type of join should you use?

- A. Inner join
- B. left join
- C. Right join
- D. Full outer join

Answer: D

Explanation:

To combine the two tables that contain data about books in a library and ensure that all the data is retained, you should use a full outer join. A full outer join is a type of join that returns all rows from both tables, regardless of whether there is a match or not. If there is no match, null values are filled in for the missing fields.

To perform a full outer join, you need to do the following steps:

* Connect to both tables as your data sources in Tableau. You can use either live or extract connections.

* Drag one table to the canvas and drop it on top of another table. This will create a join between them based on a common field.

* Click on the join icon between the tables and select Full Outer Join from the drop-down list. This will change the join type to full outer join and show all rows from both tables.

* Optionally, you can add or remove join clauses by clicking on Add or Remove buttons next to each clause. You can also change or rename fields by clicking on them.

The other types of joins are not correct for this scenario. An inner join returns only the rows that have a match in both tables, which will exclude any books that are missing from either table. A left join returns all rows from the left table and only the matching rows from the right table, which will exclude any books that are only in the right table. A right join returns all rows from the right table and only the matching rows from the left table, which will exclude any books that are only in the left table. References:

htm
When combining two datasets that are both incomplete and where it's important to retain all data from both sources, a full outer join is appropriate. This type of join ensures that all records from both tables are included in the combined dataset, even if there are no matching records in the other table.

NEW QUESTION # 116
A Data Analyst would like to receive the draft results of a colleague's Tableau Prep flow to start work on a dashboard before it has been published.
What should the analyst do to accomplish this?

- A. Open Tableau Desktop and make a connection to Tableau Prep, then choose the colleague's flow that the analyst wants to connect to.
- B. Have the colleague output the results of the flow to a .hyper file. Create a new workbook in Tableau Cloud, choose Files on the Connect to Data page, and upload the .hyper file from the computer.
- C. Have the colleague output the results of the flow to a .hyper file. On the Tableau Desktop Connect page, under To a File, choose "More ...", and browse for the .hyper file on the local file system.
- D. On the Tableau Desktop Connect page, under To a File, choose "More ...", and browse for the colleague's .tf file on the local file system.

Answer: C

NEW QUESTION # 117
A Data Analyst has the following chart that shows the cumulative volume of sales from various dates.

The analyst wants the months to appear as shown in the following chart.

What should the analyst do?

- A. Change the Sort Order
- B. Convert the date to Exact Date
- C. Convert the date to Continuous
- D. Convert the date to Attribute

Answer: C

NEW QUESTION # 118
