NEW QUESTION # 125

Which three resources in an Azure Component can contain JavaScript functions?

- A. Style
- B. **Renderer**
- C. **Controllers**
- D. Design
- E. **helper**

Answer: B,C,E

Explanation:

- * Controllers, helpers, and renderers are three resources in an Aura Component that can contain JavaScript functions. They are used to implement the client-side logic and behavior of the component¹².
- * Controllers are the primary resource for handling user interactions and events. They define the actions that are executed on the client or sent to the server¹².
- * Helpers are the secondary resource for sharing common code and logic across controllers and other helpers. They can also access component attributes and call server-side actions¹².
- * Renderers are the optional resource for customizing the rendering lifecycle of the component. They can override the default rendering, rerendering, and unrendering methods of the component¹².
- * Design and style are two other resources in an Aura Component, but they do not contain JavaScript functions. They are used to define the design-time attributes and the CSS styles of the component¹².
