And if you get any questions, please get contact with us, our staff will be online 24/7 to solve your problems all the way.

Salesforce Certified OmniStudio Consultant Sample Questions (Q34-Q39):

NEW QUESTION # 34

A company has account Information that they want to display to agents in a summarized view. For each account they want to display icons that allow the user to launch guided processes for frequent tasks. The processes are reused in other parts of the business.

Which three OmniStudio tools are needed to meet these requirements?

Choose 3 answers

- A. OmniStudio Actions
- B. Flyouts
- C. Navigate Actions
- D. FlexCards
- E. Omni Script

Answer: A,D,E

Explanation:

The three OmniStudio tools that are needed to meet these requirements are: FlexCards, OmniStudio Actions, and OmniScript. A FlexCard is a tool that can display data and actions in a card format. The consultant can use a FlexCard to display the account information and icons for each action. An OmniStudio Action is a button that can invoke an OmniScript or an Integration Procedure from a FlexCard. The consultant can use OmniStudio Actions to launch guided processes for frequent tasks, such as change of plan, new sale, or loyalty. An OmniScript is a tool that can design customer interactions using elements and actions. The consultant can use OmniScripts to create the guided processes for each task

NEW QUESTION # 35

An auto insurance company has different rates for each state in the country. The company needs to manage the rates separately, but the formula to calculate the premiums is the same. All the input and output are the same; only the values in the rating tables differ. Which OmniStudio tool should the consultant recommend to meet this requirement?

- **A. Grouped Calculation Matrix**
- B. Aggregation Steps in a Calculation Procedure
- C. DataRaptor Transform with an interface Map
- D. Class-based Calculation Procedure

Answer: A

NEW QUESTION # 36

A business wants to display customer 360° information in a console for their call center agents. The customer information will come from a variety of sources, and the information should be grouped together logically.

The agents will need to take different actions depending on the context of each group of information.

Which tool should a consultant recommend to meet this requirement?

- **A. Lightning web components**
- B. FlexCards
- C. Visualforce Page
- D. Omniscript

Answer: A

Explanation:

Explanation

The tool that the consultant should recommend to meet this requirement is Lightning web components.

Lightning web components are custom HTML elements built using HTML and modern JavaScript. They can be used to create rich and interactive user interfaces that display data from various sources and allow users to take actions. In this case, a Lightning web component can be used to display customer 360° information in a console using FlexCards, OmniScripts, or other components. Omniscript is not a tool, but a type of component that can be used to create guided interactions. Visualforce Page is not suitable for this requirement, as it is a legacy technology that uses server-side rendering and does not support modern web standards. FlexCards are not a tool, but a type of component that can be used to display contextual data on record pages.

NEW QUESTION # 37

A company has a process that requires a birthday validation. At the beginning of the process, the user is asked to input their birthday. If the user is less than 18 years old, then the process should display an error stating that the age cannot be less than 18. The process should restrict users from continuing. If the user is 18 or older, then the process should proceed without any error message.

Which two OmniScript features should the consultant recommend to meet this validation requirement?

Choose 2 answers

- A. Alert
- **B. Formula**
- **C. Messaging**
- D. Calculation

Answer: B,C

Explanation:

Explanation

The two OmniScript features that the consultant should recommend to meet this validation requirement are:

Messaging and Formula. A Messaging element is an element that can display a text message with an icon and a color, such as blue for information or yellow for warning. The consultant can use a Messaging element to display an error message stating that the age cannot be less than 18 if the user's birthday indicates they are under 18 years old. A Formula element is an element that can perform calculations or validations on data values using expressions or functions. The consultant can use a Formula element to validate the user's birthday by subtracting it from the current date and checking if the result is greater than or equal to 18 years

NEW QUESTION # 38

What is the purpose of the Messaging element in OmniScript?

- A. Display a warning to users based on logical conditions
- B. Display a custom styled message
- C. Trigger an event to external data sources based on logical conditions
- D. Send email/text to users based on logical conditions

Answer: A

Explanation:

The purpose of the Messaging element in OmniScript is to display a warning to users based on logical conditions. A Messaging element can show a message with an icon and a color, such as red for error or green for success. The message can be configured to appear or disappear based on certain criteria, such as field values or user actions

NEW QUESTION # 39

.....

First and foremost, you can get the latest version of our OmniStudio-Consultant study materials for free during the whole year.
