Additionally, the certification can help healthcare organizations to identify professionals who have the necessary skills and knowledge to work effectively with Salesforce Health Cloud.

Salesforce Health Cloud Accredited Professional Sample Questions (Q87-Q92):

NEW QUESTION # 87

A company based In the United States requires a way to track medications that patients take in a standardized format and detect potential drug-to-drug Interactions.

Which two Health Cloud solutions should a consultant recommend?

Choose 2 answers

- A. Medication Audit
- **B. Medication Reconciliation**
- C. Medication Administration
- **D. Medication Review**

Answer: B,D

Explanation:

To track medications and detect potential drug-to-drug interactions in a standardized format, Salesforce Health Cloud offers features designed for healthcare organizations to manage medication data effectively.

Correct Features Explanation:

Medication Reconciliation:

This feature enables the accurate tracking of patient medications across different points of care. It ensures all prescribed and over-the-counter medications are recorded in a standardized format, preventing duplications, omissions, or errors.

By reconciling medications, healthcare providers can identify potential drug-to-drug interactions and avoid adverse drug events.

Medication Review:

This involves reviewing the patient's entire medication list to assess safety, appropriateness, and effectiveness.

Healthcare providers can use this review process to flag potential drug interactions, dosage inconsistencies, and other risks, thereby ensuring comprehensive medication management.

Why Other Options Are Incorrect:

A . Medication Audit:

While this could involve reviewing medication-related data, it is not a standard Health Cloud feature designed for drug-to-drug interaction detection or medication tracking.

D . Medication Administration:

This feature focuses on the administration of drugs to patients, such as documenting doses and timing, and does not handle tracking or interaction detection in a standardized way.

Key Benefits of the Correct Features:

Ensuring Patient Safety: Tracks and reconciles medications to avoid harmful drug interactions.

Standardized Format: Maintains consistent records, compliant with healthcare regulations like HIPAA and FHIR standards.

Improved Coordination: Enables care teams to collaborate effectively in managing patient medications.

NEW QUESTION # 88

How Can you restrict access to an entire patient / member list or to specific columns of that list? (Choose two)

- A. Permission Sets
- B. Field Level Security
- C. Sharing setting
- D. List View Permissions

Answer: B,C

Explanation:

Reference and details below.

Control Access to Patient or Member Lists

Use sharing settings to control access to patient or member lists.

By default, any patient or member list created in your org is available to all users with access to the Health Cloud console.

Field-level and object-level security can also restrict access to an entire patient or member list or to columns in the list.

NEW QUESTION # 89

Bloomington Caregivers has decided to enable Integrated Care Management so that its end users can leverage Health Cloud Assessments. Administrators must now configure their org to be able to use Assessments.

Which three steps should the administrator take as part of the org setup to enable Assessments?

- A. Update sharing settings in Setup.
- B. Download and Install OmniStudio.
- C. Enable users to view and complete Assessments.
- D. Add the Assessment component to the Patient page.
- E. Enable Discovery Framework in Setup.

Answer: C,D,E

Explanation:

The three steps that the administrator should take as part of the org setup to enable Assessments are enabling Discovery Framework in Setup, adding the Assessment component to the Patient page, and enabling users to view and complete Assessments. Discovery Framework is a feature that allows the administrator to create and manage assessments in Health Cloud. The Assessment component is a Lightning component that displays the assessments assigned to a patient on their record page. Enabling users to view and complete Assessments requires assigning them the appropriate permission sets and page layouts.

NEW QUESTION # 90

How does an administrator display device information on a patient card?

- A. Create a custom field on the EHR_DeviceRequest object with a formula that return the information.
- B. Create a custom field on the EHR_MedicalDevice object with a formula that return the information.
- C. Create a custom field on the FilterCondition__c object with a formula that return the information.
- D. Create a custom field on the EHR_Patient object with a formula that return the information.
- E. Create an Asset record and create a care registered device record that look up to the patient.

Answer: E

NEW QUESTION # 91

A MedTech company is implementing Health Cloud to better plan and track surgical case visits, manage device inventory, and run cycle counts.

Which data model should a consultant recommend the company use?

- A. Inventory Management
- B. Intelligent Sales
- C. Provider Engagement
- **D. Life Sciences**

Answer: D
