

Salesforce-MuleSoft-Developer-I Valid Learning Materials & Latest Braindumps Salesforce-MuleSoft-Developer-I Ebook

What's more, part of that VCE4Plus Salesforce-MuleSoft-Developer-I dumps now are free: https://drive.google.com/open?id=1usSmmqYurx_X9hlGdT4OQYvIauax1aV

Modern people are busy with their work and life. You cannot always stay in one place. So our three versions of the Salesforce-MuleSoft-Developer-I exam questions are suitable for different situations. For instance, you can begin your practice of the Salesforce-MuleSoft-Developer-I guide materials when you are waiting for a bus or you are in subway with the PDF version. When you are at home, you can use the windows software and the online test engine of the Salesforce-MuleSoft-Developer-I practice prep. And every version has its respect advantages.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.
Topic 2	Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 3	Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Topic 4	Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.
Topic 5	Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.
Topic 6	Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.

Topic 7	Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.
Topic 8	Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.
Topic 9	Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.
Topic 10	Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIKit.
Topic 11	Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.

Latest Braindumps Salesforce-MuleSoft-Developer-I Ebook | Salesforce-MuleSoft-Developer-I Certification

VCE4Plus is a professional website. It can give each candidate to provide high-quality services, including pre-sales service and after-sales service. If you need VCE4Plus's Salesforce Salesforce-MuleSoft-Developer-I exam training materials, you can use part of our free questions and answers as a trial to sure that it is suitable for you. So you can personally check the quality of the VCE4Plus Salesforce Salesforce-MuleSoft-Developer-I Exam Training materials, and then decide to buy it. If you did not pass the exam unfortunately, we will refund the full cost of your purchase. Moreover, we can give you a year of free updates until you pass the exam.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q232-Q237):

NEW QUESTION # 232

Refer to the exhibits. APIKit router is used to generate the flow components for RAML specification.

The Mule application must be available to REST clients using the two URL's

`http://localhost:8081/internal`

and `http://localhost:8081/external`

How many APIKit Router components are generated to handle requests to every endpoint defined in RAML specification?

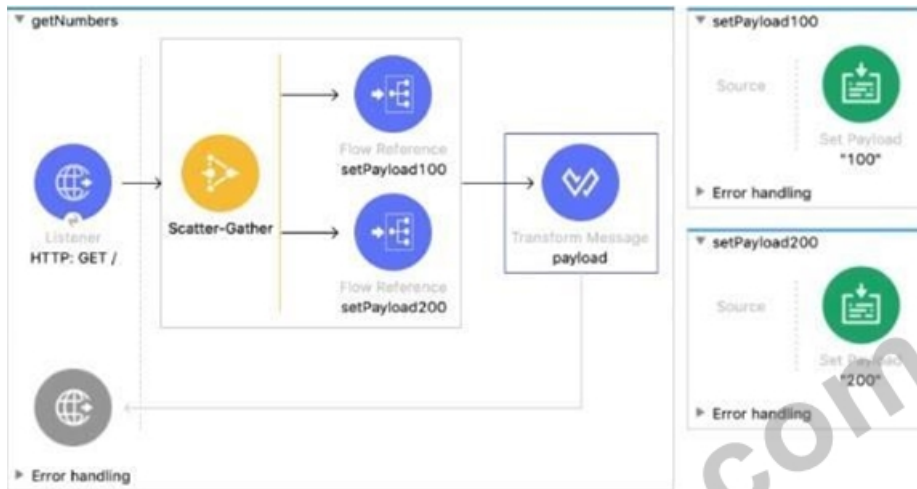

- 1.Library.raml
- 2./books
- 3.get:
- 4.post:
- 5./order:
- 6.get
- 7.patch
- 8./members
- 9.get:

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 233

Refer to the exhibits.

```
<flow name="getNumbers" >
  <http:listener doc:name="HTTP: GET /" config-ref="HTTP_Listener_config" path="/" />
  <scatter-gather doc:name="Scatter-Gather" >
    <route >
      <flow-ref doc:name='setPayload100' name='setPayload100' />
    </route>
    <route >
      <flow-ref doc:name="setPayload200" name="setPayload200" />
    </route>
  </scatter-gather>
  <ee:transform doc:name="payload">
    <ee:message >
      <ee:set-payload ><![CDATA[%dw 2.0
        output application/json
        ---
        payload]]></ee:set-payload>
    </ee:message>
  </ee:transform>
</flow>
<flow name="setPayload100" ><set-payload value='#["100"]' doc:name='100' /></flow>
<flow name="setPayload200" ><set-payload value='#["200"]' doc:name='200' /></flow>
```

Each route in the Scatter-Gather sets the payload to the number shown in the label. What response is returned to a web client request to the HTTP Listener?

- A. 

```

{
  "0": {
    "attributes": ...,
    "payload": "100"
  },
  "1": {
    "attributes": ...,
    "payload": "200"
  }
}

```

salesforce

• B.

```
["100", "200"]
```

• C.

```

[
  {
    "attributes": ...,
    "payload": "100"
  },
  {
    "attributes": ...,
    "payload": "200"
  }
]

```

salesforce

• D.

Answer: B

Explanation:

Correct answer is as below. After all processing routes have finished execution, the Scatter-Gather component creates a new Mule event that combines all resulting Mule events from each route, and then passes the new Mule event to the next component in the flow.

```

{
  "0": {
    "attributes": ...,
    "payload": "100"
  },
  "1": {
    "attributes": ...,
    "payload": "200"
  }
}

```

Bottom of Form

NEW QUESTION # 234

An app team is developing a mobile banking app. It took them two months to create their own APIs to access transaction information from a central database. The app team later found out that another team had already built an API that accesses the transaction information they need.

According to MuleSoft, what organization structure could have saved the app team two months of development time?

- A. Central API Review Board
- B. MuleSoft Support Center
- **C. Center for Enablement**
- D. Center of Excellence

Answer: C

Explanation:

Reference:

Center for Enablement is correct answer .It is a cross-functional team typically staffed with members from central IT, line-of-business departments, and digital innovation teams charged with productizing, publishing, and harvesting reusable assets and best practices. In this case , app team would have checked first with Center for Enablement before developing their own API's. Hence could have avoided re-work

NEW QUESTION # 235

Refer to the exhibits.

All three of the conditions for the Choice router are true. What messages are written in the application log?

- A. Route1,Route2
- **B. Route1**
- C. Route1,Route2,Default
- D. Route2

Answer: B

Explanation:

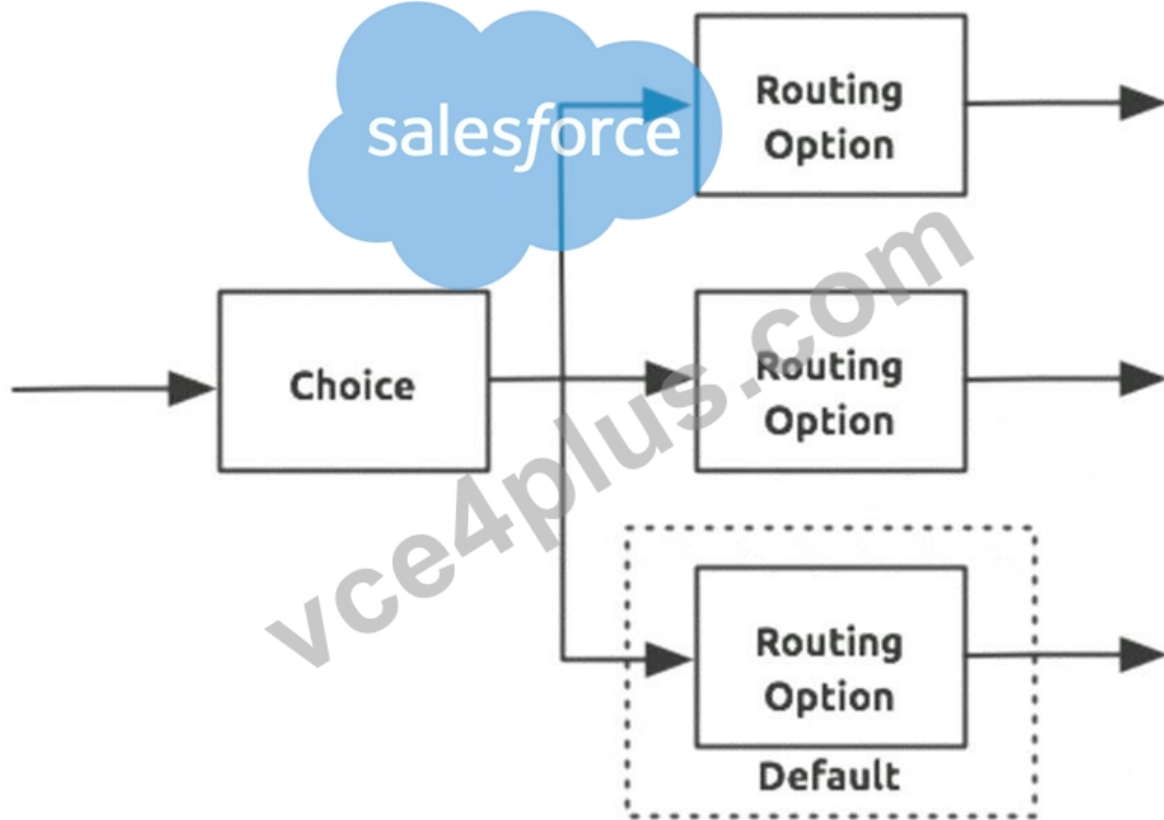

Only one of the routes in the Choice router executes, meaning that the first expression that evaluates to true triggers that route1 execution and the others are not checked. If none of the expressions are true, then the default route executes. Hence only Route1 will be executed as it is the first expression. hence output of logger is Route1.

MuleSoft Doc Ref: <https://docs.mulesoft.com/mule-runtime/4.3/choice-router-concept> The Choice router dynamically routes messages through a flow according to a set of DataWeave expressions that evaluate message content. Each expression is associated with a different routing option. The effect is to add conditional processing to a flow, similar to an if/then/else code block in most

programming languages.

Only one of the routes in the Choice router executes, meaning that the first expression that evaluates to true triggers that route's execution and the others are not checked. If none of the expressions are true, then the default route executes.

Diagram Description automatically generated

NEW QUESTION # 236

A

web client submits a request to `http://localhost:8081?firstName=john`. What is the correct DataWeave expression to access the `firstName` parameter?

- A. `#[attributes.'http.query.params'.firstName]`
- B. `#[message.queryParams.firstName]`
- C. `#[message.inboundProperties.'http.query.params'.firstName]`
- D. `#[attributes.queryParams.firstName]`

Answer: D

NEW QUESTION # 237

.....

Inlike other teaching platform, the Salesforce Certified MuleSoft Developer (Mule-Dev-201) study question is outlined the main content of the calendar year examination questions didn't show in front of the user in the form of a long time, but as far as possible with extremely concise prominent text of Salesforce-MuleSoft-Developer-I test guide is accurate incisive expression of the proposition of this year's forecast trend, and through the simulation of topic design meticulously. With a minimum number of questions and answers of Salesforce-MuleSoft-Developer-I Test Guide to the most important message, to make every user can easily efficient learning, not to increase their extra burden, finally to let the Salesforce-MuleSoft-Developer-I exam questions help users quickly to pass the exam.
