

Salesforce Platform-App-Builder Exam | Platform-App-Builder Exam Consultant - One Year Free Updates of Platform-App-Builder Latest Test Prep

What's more, part of that VCE4Plus Platform-App-Builder dumps now are free: https://drive.google.com/open?id=1Ci28XhadvOG_tMmOupDRjHmCAsRaG708

In this era of the latest technology, we should incorporate interesting facts, figures, visual graphics, and other tools that can help people read the Salesforce Certified Platform App Builder (Platform-App-Builder) exam questions with interest. VCE4Plus uses pictures that are related to the Salesforce Certified Platform App Builder (Platform-App-Builder) certification exam and can even add some charts, and graphs that show the numerical values.

Salesforce Platform-App-Builder certification is an excellent way to demonstrate your expertise in building custom applications on the Salesforce platform. Whether you're a developer, administrator, or consultant, this certification can help you take your skills to the next level and advance your career. With the right preparation and study materials, you can pass the exam and become a Salesforce Certified Platform App Builder.

Salesforce Platform-App-Builder (Salesforce Certified Platform App Builder) exam is a certification that validates an individual's knowledge and skills in building custom applications using the Salesforce platform. The Salesforce Platform is a cloud-based platform that allows users to create and manage applications without the need for hardware or software installation. With the Salesforce Platform, users can build custom applications that fit their specific business needs, automate workflows, and integrate with other systems.

Earning the Salesforce Platform-App-Builder Certification can open up a range of career opportunities for professionals in the Salesforce ecosystem. Salesforce Certified Platform App Builder certification is ideal for developers, administrators, and consultants who work with the Salesforce platform and want to advance their careers in app building. With this certification, individuals can demonstrate their knowledge and skills to potential employers, clients, and colleagues, and gain recognition as experts in app building on the Salesforce platform.

We also hired dedicated IT staff to continuously update our question bank daily, so no matter when you buy Platform-App-Builder Study Materials, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our Platform-App-Builder test answers, we will still provide you with the benefits of free updates within a year.

Salesforce Certified Platform App Builder Sample Questions (Q109-Q114):

NEW QUESTION # 109

Universal Containers (UC) wants to test code against a subset of production data that is under 5 GB.

Additionally, UC wants to refresh this sandbox every weekend.
Which type of sandbox should be used to accomplish this?

- A. Full Copy
- **B. Partial Copy**
- C. Developer
- D. Developer Pro

Answer: B

Explanation:

To test code against a subset of production data under 5 GB and to refresh the sandbox environment weekly, the most suitable type of sandbox is:

* Partial Copy (B). A Partial Copy sandbox includes a copy of your production org's metadata and a subset of your production data as defined by the sandbox template. It allows up to 5 GB of data and can be refreshed every 5 days, making it ideal for scenarios where a representative sample of production data is needed for testing without the storage and refresh limitations of a Full Copy sandbox.

Developer Pro (A) and Developer (D) sandboxes also allow for testing and development but do not include a subset of production data-they either have no data or only limited sample data. A Full Copy sandbox (C) provides a full replica of production data, far exceeding the 5 GB requirement and generally is refreshed less frequently due to larger data volume and longer copy times.

Which are possible fields to store the data? (Choose two.)

- A. Email
- B. Multi Picklist
- **C. Text**
- D. Phone
- **E. Number**

Answer: C,E

Explanation:

Explanation

NEW QUESTION # 112

What sandbox is used for virtually any development, testing, or training purpose?

- A. Full Sandbox
- **B. Partial Copy**
- C. Developer
- D. Developer Pro

Answer: B

NEW QUESTION # 113

universal containers has several large customers that sell their products through dealers. Each customer and dealer have an individual rep who works directly with uc and each is billed separately. How can an app builder implement these requirements?

- A. Create both customer and dealer as accounts, create account teams on each account and associate the dealer records with the parent account.
- B. Create a single account record, add each rep as a contact and create a custom dealer object
- C. Create a single parent record, add each rep as a contact to the parent account and add each dealer as a child record
- D. Create both customer and dealer as accounts, add each rep as a contact on the corresponding account and create an account hierarchy.

Answer: A

Explanation:

Explanation

Creating both customer and dealer as accounts, creating account teams on each account and associating the dealer records with the parent account would allow UC to track each customer and dealer separately, as well as their relationships and reps. Account hierarchy is not suitable for this scenario, as it is used to show the relationships among parent and child accounts within a single company

NEW QUESTION # 114
