| Topic | Details |
|-------|---------|
|       |         |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> <li>ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S</li> <li>4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.</li> </ul> |
| Topic 2 | <ul style="list-style-type: none"> <li>SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S</li> <li>4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.</li> </ul>                                                 |
| Topic 3 | <ul style="list-style-type: none"> <li>Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S</li> <li>4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.</li> </ul>                                                                                    |
| Topic 4 | <ul style="list-style-type: none"> <li>ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.</li> </ul>                                                                             |

## Salesforce Certified Tableau Data Analyst Sample Questions (Q141-Q146):

### NEW QUESTION # 141

You have a data source that contains the following columns.

| Name          | Data type        |
|---------------|------------------|
| Order Date    | Date             |
| Order Number  | String           |
| Customer Name | String           |
| Sales         | Number (decimal) |
| Profit        | Number (decimal) |

You want to sort customers based on the most expensive orders.

How should you complete the formula? (Use the dropdowns in the Answer Area to select the correct options to complete the formula.)

FIRST ( AVG ([Sales]), ASC )  
 FIRST  
 RANK  
 WINDOW\_MAX

**Answer:**

**Explanation:**

#### NEW QUESTION # 142

A Data Analyst creates the following story that contains two story points.

The analyst wants to change the story point format to show the current story point number out of the total number of story points. Which Layout option should the analyst use?

- A. Dots
- B. Arrows only
- C. Caption boxes
- D. Numbers

**Answer: B**

#### NEW QUESTION # 143

You have a data source that contains data for every city in the United States. The following is a sample of the data.

| City     | State      | Country       | Population |
|----------|------------|---------------|------------|
| Miami    | Florida    | United States | 454,279    |
| New York | New York   | United States | 8,419,000  |
| Seattle  | Washington | United States | 724,305    |
| Chicago  | Illinois   | United States | 2,710,000  |

You need to use the City dimension to create a dynamic filter that shows the cities that have a population greater than one million. Which type of filter should you use?

- A. Wildcard filter
- B. General filter
- C. Top filter
- D. Condition filter

**Answer: D**

Explanation:

To use the City dimension to create a dynamic filter that shows the cities that have a population greater than one million, you should

use a condition filter. A condition filter is a type of filter that shows only the values that meet a specified condition based on a measure or a calculation. You can create a condition filter by dragging a dimension to the Filters shelf and selecting Condition from the dialog box. Then you can enter a formula or choose an option that defines your condition.

In this case, you want to create a condition filter based on Population, which is a measure. You can drag City to the Filters shelf and select Condition from the dialog box. Then you can choose By field from the tab and select Population > Sum > Greater than > 1000000 from the drop-down lists. This will create a condition filter that shows only the cities that have a sum of population greater than one million.

The other options are not correct for this scenario. A general filter is not a specific type of filter, but a term that refers to any type of filter in Tableau. A wildcard filter is a type of filter that shows only the values that match a specified pattern or string, such as "New\*" or "\*ton". A top filter is a type of filter that shows only the top or bottom N values of a measure or dimension based on a ranking or an aggregation. References:

#### NEW QUESTION # 144

A Data Analyst has a large data source that contains more than 10 million rows. Users can filter the rows by a field named Animal. The following is a sample of the data.

| Animal      | Type   |
|-------------|--------|
| Antelope    | Mammal |
| Angelfish   | Fish   |
| Ant         | Insect |
| Arctic Wolf | Mammal |
| Bird        | Mammal |

The analyst wants to ensure that every calculation is affected by including only animals of a particular type. Which type of filter should the analyst create on the worksheet?

- A. Context
- B. Extract
- C. Table calculation
- D. Measure

**Answer: A**

#### NEW QUESTION # 145

You have a dashboard that contains two sheets named Sheet 1 and Sheet 2.

You want to add an object to the dashboard that users can click to switch to a different dashboard in the workbook.

Which object should you add to the dashboard?

**Answer Area**

**Answer:**

**Explanation:**

Explanation:

The object that you should add to the dashboard to allow users to switch to a different dashboard in the workbook is Navigation. Navigation objects are used to create links between dashboards or sheets in a workbook. You can add a navigation object to a dashboard by dragging it from the list of objects and dropping it on the dashboard. You can then configure the navigation object to specify the destination dashboard or sheet that you want users to navigate to when they click on it.

You can learn more about navigation objects and how to use them in this article: [https://help.tableau.com/current/pro/desktop/en-us/dashboards\\_navigation.htm](https://help.tableau.com/current/pro/desktop/en-us/dashboards_navigation.htm)

## NEW QUESTION # 146

.....

Every candidate wants to pass the Analytics-DA-201 exam in the least time successfully. More importantly, it is necessary for these people to choose the convenient and helpful Analytics-DA-201 test questions as their study tool in the next time. Because their time is not enough to prepare for the Analytics-DA-201 exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the Analytics-DA-201 Exam and get the related certification in a short time are willing to pay more attention to our Analytics-DA-201 study materials as the pass rate is high as 99% to 100%.
