Salesforce-Slack-Administrator Pass4sure Dumps & Salesforce-Slack-Administrator Sichere Praxis Dumps

Qualitativ hochwertige Salesforce-Slack-Administrator Prüfungsunterlagen. Gehen Sie einen entscheidenden Schritt weiter. Mit der Salesforce Salesforce-Slack-Administrator Zertifizierung erhalten Sie einen Nachweis Ihrer besonderen Qualifikationen und eine Anerkennung für Ihr technisches Fachwissen. Salesforce bietet eine Reihe verschiedener Zertifizierungsprogramme für professionelle Benutzer an. Untersuchungen haben gezeigt, dass zertifizierte Fachleute häufig mehr verdienen können als ihre Kollegen ohne Zertifizierung.

Salesforce Salesforce-Slack-Administrator Prüfungsplan:

Thema	Einzelheiten
Thema 1	• User Lifecycle Management: This area focuses on managing user accounts throughout their lifecycle in Slack. Candidates will implement authentication options based on organizational requirements and recommend processes for new account creation.

Thema 2	• Workspace Administration: This domain assesses the competencies of Salesforce administrators in creating and managing Slack workspaces to meet organizational needs. Candidates will determine when a new workspace should be created and manage the approval process for workspace creation.
Thema 3	• Channel and User Group Administration: This section measures the skills of Salesforce Administrators in setting up and managing Slack channels. Candidates will learn when to use channels versus direct messages or group DMs, as well as when to opt for public or private channels.
Thema 4	• Fundamentals: This section of the exam measures the skills of Salesforce Administrators and covers the key privileges and responsibilities associated with each Slack user role. Candidates will identify unique features of Slack's paid plans and understand the common responsibilities shared by Admins and Owners. Additionally, this section emphasizes the importance of workspace and organization-level settings and dashboards, focusing on how they contribute to effective Slack management.
Thema 5	• Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.
Thema 6	• Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.

Salesforce Certified Slack Administrator Salesforce-Slack-Administrator Prüfungsfragen mit Lösungen (Q72-Q77):

72. Frage

Moshi is a Workspace Owner on the Plus plan. John is leaving the company on Friday, and Moshi will be deactivating John's IdP account.

What does Moshi need to do to ensure that John won't have access to Slack?

- **A. Check that the IdP supports de-provisioning via SCIM and that the connector app is installed and configured correctly.**
- B. Deactivating the IdP account will automatically delete the Slack account that was bound to it via SSO.
- C. Activate "Just-in-Time" de-activations to automatically remove John and any users who are inactivate for more than 14 days.
- D. Change the email, and reset the password. Changing the email will end John's Slack session.

Antwort: A

73. Frage

You're a Workspace Owner at a small business that used Slack's Free plan in their first year. However, its business is growing fast enough to justify upgrading to a paid plan.

The requirements:

* Users want to be able to access their old messages and integrate Slack with their calendars.

* You want to use Okta to provision users in order to provide additional security and simplicity to the employee onboarding process.

* Field representatives need to be able to access Slack securely on their company-owned mobile devices.

Based on the requirements, what should you recommend?

(Select the best answer.)

- A. Move to the Slack Enterprise Grid plan.
- **B. Move to the Slack Business+ plan.**
- C. Move to the Slack Pro plan.
- D. Stay with the Slack Free plan for another year.

Antwort: B

Begründung:

The Business+ plan is the appropriate recommendation here because:

- * It includes full message history access (unlike the Free plan, which limits access to recent messages only).
- * It supports SAML-based SSO integrations like Okta, allowing for secure user provisioning and onboarding.
- * It provides Enterprise Mobility Management (EMM) integrations for managing and securing Slack access on company-owned mobile devices.

Official Slack documentation confirms:

"Slack Business+ includes enhanced administration and security controls, including SAML-based SSO, user provisioning with supported IdPs, and mobile device management (MDM) support via EMM." Enterprise Grid (option D) would be overkill for a small growing business unless they required multi- workspace organization and complex compliance features.

(Reference: Slack Administration Study Guide - Plans and Feature Comparison)

74. Frage

Large Inc. is a consumer goods company that uses the Slack Enterprise Grid org. Large Inc.'s Human Resources (HR) Director is looking to streamline how HR disseminates policy information and handles sensitive hiring manager questions related to recruiting and hiring. HR has its own designated workspace.

How should you advise the HR Director use Slack for this use case?

(Select the best answer.)

- **A. Create a private channel in the HR workspace, and add all hiring managers in the organization**
- B. Create a public channel in the HR workspace, and add all hiring managers in the organization.
- C. Create an org wide private channel for recruiting and hiring, and add all hiring managers in the organization.
- D. Create an org wide public channel for recruiting and hiring, and add all hiring managers in the organization.

Antwort: A

75. Frage

Big Corp uses an IdP (Identity Provider) to manage access for its members to its Plus plan on Slack. Their security team wants to make sure members will be automatically deactivated when they leave the company.

Which of the following must be true to ensure that members are automatically deactivated?

- A. Each member's access must be set to expire after 90 days.
- **B. The IdP must support deprovisioning via SCIM.**
- C. The member who is leaving the company must have left all channels.
- D. The member must not be a Workspace Admin or Owner.

Antwort: B

Begründung:

To automatically deactivate users who leave a company, Slack relies on SCIM (System for Cross-domain Identity Management) provisioning. SCIM allows an Identity Provider (IdP) to manage user accounts, including provisioning, deprovisioning, and updating user profiles directly from the IdP.

According to the official Slack documentation for user provisioning:

"When SCIM provisioning is enabled, changes made in your Identity Provider - such as deactivating a user

- will be reflected in Slack automatically. Deprovisioning ensures that when someone leaves the company, their Slack account is also deactivated without manual intervention." None of the other options (A, B, or C) are requirements for automatic deactivation. SCIM deprovisioning is the only supported and correct method for automated account deactivation through IdP integrations.

(Reference: Slack Administration Study Guide - User Management and SCIM Provisioning)

76. Frage

You're an Org Owner at a 10,000-person company that uses Slack across the organization.

In a recent feedback survey, employees have expressed the following frustrations:

1. There are too many discreet silos between teams.
2. The organization is not very transparent.
3. It is difficult to locate important information.

In developing a plan to address these concerns, IT leadership asks you to provide metrics that can be tracked over the course of the next year to help measure progress towards increasing transparency.

What type of data would you recommend the team track?

(Select the best answer.)

- A. Number of multi-workspace channels across the organization
- B. Percentage of message engagement in org-wide announcements channels in the last six months
- C. Number of weekly active members (i.e., active in the last 7 days)
- **D. Percentage of messages viewed in public channels vs. in private channels and direct messages (DMs)**

Antwort: D

77. Frage
